## 1.0 Introduction

PUNCH Consulting Engineers were appointed by Crown Square Developments Ltd. to provide traffic, civil and structural consulting engineering services for the proposed development on a site located near Monivea Road in Galway City. Please refer to Fig. 1 for the location of the proposed development. The proposed development is surrounded to the north, east and west by an existing light industrial area and a residential development to the south.

The existing site has an area of approximately 5.12 hectares in total. A substantial element of the previously permitted development has been completed in that almost the entire site has been excavated through rock to a structural formation level. There is also extensive foundation construction across the site and three levels of floor construction (lower basement, upper basement and ground). This structure extends to approximately 26,800m<sup>2</sup> over ground and two basement slab levels. Rising column elements extend from ground floor slab in this area. It appears from review of previous structural engineering drawings that the gross area of the previous proposed enclosed basement construction over two levels was potentially c.70-75,000m<sup>2</sup>. The previously proposed development design at basement is complex, including service roadways and double height service areas, ventilation shafts etc.

Given the extent of this structure, its retention, adaptation and reuse is proposed as a sustainable development. The suitability and regulatory compliance of this proposed re-use will be established through architectural and structural engineering assessment.

Existing vehicular access to the development is available via Joyce's Road. (Note Connolly Avenue, as shown on the OSI mapping, is generally known locally as Joyce's Road.) The proposed works are outlined in a series of architectural drawings prepared by Henry J Lyons Architects and engineering drawings prepared by PUNCH and supplied as part of the planning documentation.

This report was prepared for Galway City Council in relation to the planning application for the proposed development and deals specifically with the Mobility Management Plan for the development. The site is proposed to be developed in two stages - commercial and residential. The commercial zone will be developed first followed by the residential. For the purposes of this report the development is considered as one total development.

*On 11/01/19, Galway City Council required further information be supplied in support of the planning application (18/363) for the development. This revised Mobility Management Plan includes the additional relevant traffic related information supplied in response. For ease of reference the additional/amended text is shown in bold italics. Some minor edits have also occurred to ensure consistency.*

*In June 2019, in anticipation of a submission to An Bord Pleanala further information was supplied in support of the SHD planning application for the development. This Outline Mobility Management Plan includes the additional relevant traffic related information supplied in response. For ease of reference the additional/amended text is shown in bold italics. Some minor edits have also occurred to ensure consistency.*

**Figure 1.1 - Location Map of the Proposed Development**

## 2.0 Mobility Management Plan

### 2.1 Introduction

This section outlines the provisions that the applicant proposes to put in place as a means of reducing car dependency associated with this proposed development in the interest of compliance with the following sustainable transport initiatives:

- Department of Transport National Policy, Smarter Travel: A Sustainable Transport Future - A New Transport Policy for Ireland 2009-2020, which provides that 500,000 more people will take alternative means to commute to work to the extent that the total share of car commuting will drop from 65% to 45%;
- The National Cycling Policy Framework 2010 target, which provides that cycling will be developed in Ireland to the extent that 10% of all trips, including commuting, will be by bike by 2020;
- The need to reduce transport emission to meet EU 2020 greenhouse gas reduction targets; and
- The need to reduce traffic congestion, particularly at peak commuting times.
- Galway Transport Strategy

Mobility Management Plans are developed for the purpose of enhancing travel via more sustainable modes of transport. Mobility Management Plans are conducted to identify travel demand strategies to reduce single occupancy private car travel which in turn reduces traffic congestion, noise pollution and environmental impacts. Employees and users of the site are informed of the alternatives to the private car and are given the required advice, support & encouragement to travel in a sustainable way. The Mobility Management Plan will also include proposed future transport improvements to those already available.

We consider that a site-specific Mobility Management Plan (or Workplace Travel Plan) can only be fully developed and implemented once the occupier/user and their employee travel behaviour is known and when the development is occupied. This initial Mobility Management Plan sets out the key infrastructural proposals and modal split targets for the development in general terms and will be further developed when the development is occupied.

The Mobility Management Plan can lead to benefits, such as offering substantial savings to staff by suggesting alternatives to travelling to work (other than by car), allowing commuters to avail of a healthier lifestyle by incorporating exercise into the daily commute and reducing stress experienced by staff caused by lack of alternatives in commuting to work.

The Mobility Management Plan should be considered as a dynamic process where a package of measures and campaigns are identified, piloted and monitored on an ongoing basis. The nature of the plan therefore changes during its implementation in that some measures prove successful and are therefore retained while others are not supported and are discarded. It is important that the plan retains the support of users and receives continuous monitoring. Feedback and active management of the plan is required for it to continue to be successful.

The Mobility Management Plan specific to the nature and location of the development will consist of a package of sustainable measures aimed at increasing sustainable travel. These measures can include facilitating walking, cycling and car sharing schemes. Soft measures such as education, information and

awareness can also be used. The Mobility Management Plan will be developed once the development is fully occupied.

The new development will cater for both vehicular and pedestrian traffic and includes provision of bicycle parking. Measures laid out in the Mobility Management Plan will aim to reduce the number of people travelling to the development by car, promote the use of public transport and encourage users to use more sustainable methods of travelling.

In order to establish an effective mobility management plan, the development once occupied should submit the following information:

- Staff / customer travel survey information to establish the origin and destination of trips to and from the development,
- Outline specific schemes/measures implemented to encourage a shift from car dependant transport to and from the site
- Results of customer/staff comments
- Targets to be set out in accordance to approved NTA guidelines and documents
- An outline of the various schemes that the development, plan to make available to its staff to encourage the desired change in their travel patterns to and from work; such as shared parking facilities, cycle facilities, public transport subsidies, car-pooling, walking groups, cycle groups, communication, consultation, promotion and tax saver schemes.

The success of the MMP depends on the co-operation of all parties. *The appointment of a Mobility Manager, from the start, as part of the site operations team, to co-ordinate the initial period of occupation by all the site users is necessary. In the fullness of time, a travel co-ordinator as part of a steering group is considered vital for the success of the plan. The steering group may comprise of representatives of the whole development i.e. commercial and residential.*

This **Outline** MMP will need to be reviewed on a regular basis within the steering group with updates occurring as improvements to the transport network in the vicinity of the development site are implemented.

The significant existing Transport Features are shown in Fig 2.1 below.

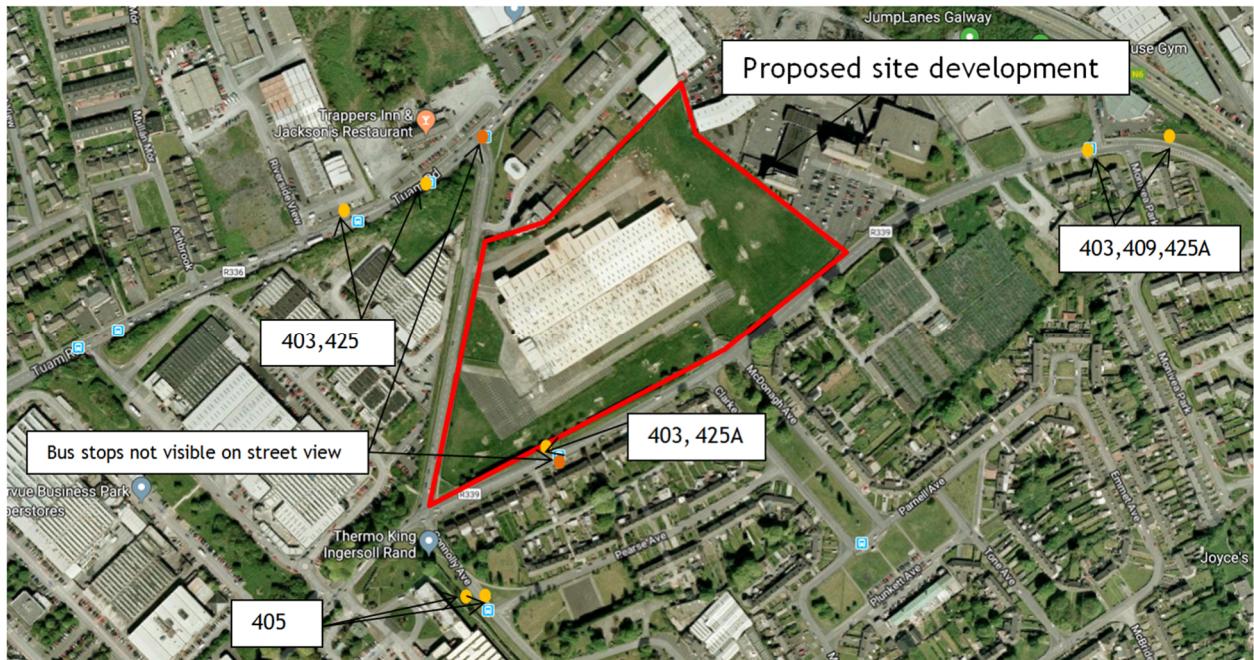

Figure 2.1 -Site Development Transport Features (ref. Google Maps)

The approximate travel times from the site to significant destinations within Galway City are shown in Table 2.1 below. (*Note distances are for cars.*)

Destination	Distance (km)	Time Taken (minutes)			
		Car	Bus	Cycle	Walking
Galway (Ceannt) Train Station	2.2	7	14	8	27
Galway Airport <small>*note that Galway Airport is closed to the public until further notice</small>	6.7	10	12	20	80
National University of Ireland Galway (NUIG)	3.4	9	27	11	40
Galway Mayo Institute of Technology (GMIT)	1.6	3	7	6	18
University Hospital Galway	3.4	12	22	13	42
Eyre Square, Galway City	3.8	7	14	9	35

**Table 2.1. Approximate Transport Times From the Proposed Development Site.**  
(ref. Google Maps)

The adjacent public transport features to the site (bus stops) are shown in Fig 2.2 below.

**Figure 2.2 - Detail of Site Development Adjacent Bus Stops** (ref. Google Maps)

## 2.2 Objective of the Plan

The objectives of the Mobility Management Plan for the proposed development are as follows:

- To encourage/increase the use of public transport, walking and cycling for staff and visitors and for work-related travel and to facilitate travel by bicycle, bus and train.
- To reduce the overall number of single occupant vehicles trips for journeys to work and work-related travel.
- To integrate mobility management into the development decisions, policies and practices to work closely with governing bodies on means and use of transport services around the vicinity of the development site
- To provide information and have resources readily available to increase awareness and continue education on sustainable modes of travel for both staff and visitors to the development
- To increase car-pooling amongst staff.

## 2.3 Cycling

Cycling is to be significantly encouraged as part of the development by providing facilities for cyclists (drying room and *secure*, sheltered bicycle parking) In addition to this the provision of lockers and staff shower facilities *will be included. Dedicated ramps are provided for cyclists, from surface level to basement level, so as to separate cyclists from vehicular traffic. Surface level cycle parking for visiting cyclists will be provided at various locations throughout the development. The locations of the ramps and other facilities are indicated on the Architect's drawings included in Appendix A.*

The development is located at a close distance from the town centre (circa 2 km away), which means that the trip to commute from Galway City centre to the proposed development is around 8 minutes (see table 2.1). The city centre has cycle lanes and designated routes for the use of cyclists It is noted that there is not an existing bicycle lane running along or surrounding Joyces Road to the east and Monivea Road to the south of the development. However, there are proposed future plans to improve cycle networks for the Galway City Development Plan 2017-2023 (see figure 2.3.).

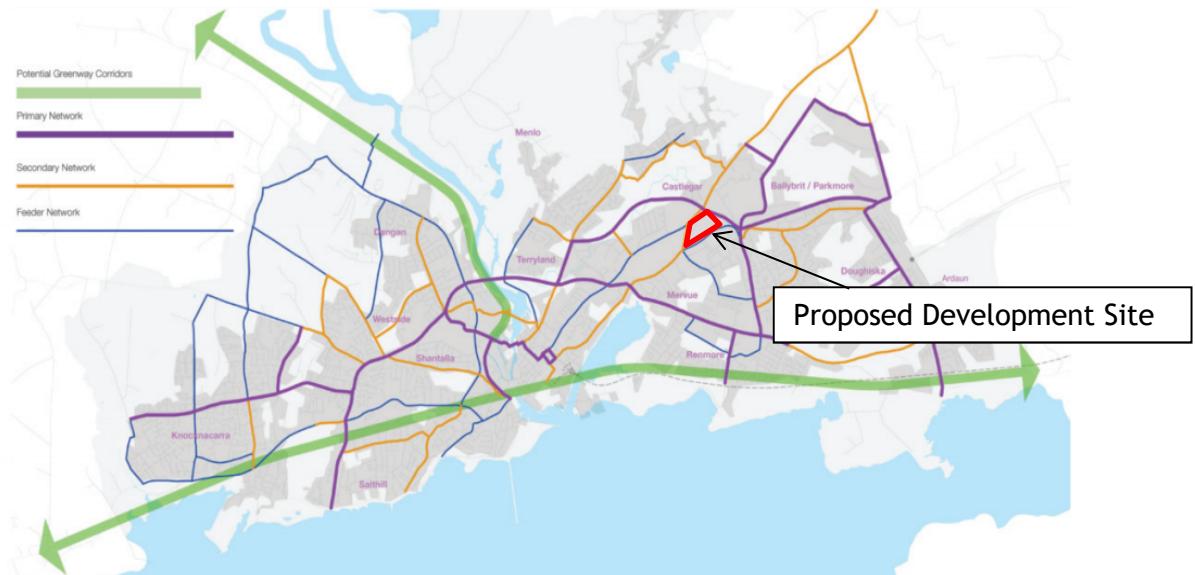

The development will facilitate the provision of a cycle lane along Joyce's Road and along Monivea Road. *Please refer to Appendix B Engineer's Proposed Road Re-alignment Drawings. The proposed works are in compliance with Design Manual for Urban Road and Streets (DMURS).*

The development will provide as a minimum, bike parking space in accordance with Galway City Development Plan's requirements. *It is intended to provide approximately 1,100 cycle parking spaces.*

*These facilities should encourage participation in the Government's Cycle to Work Initiative. This government initiative allows for tax breaks for employees to offset against the cost of a bicycle and accessories*

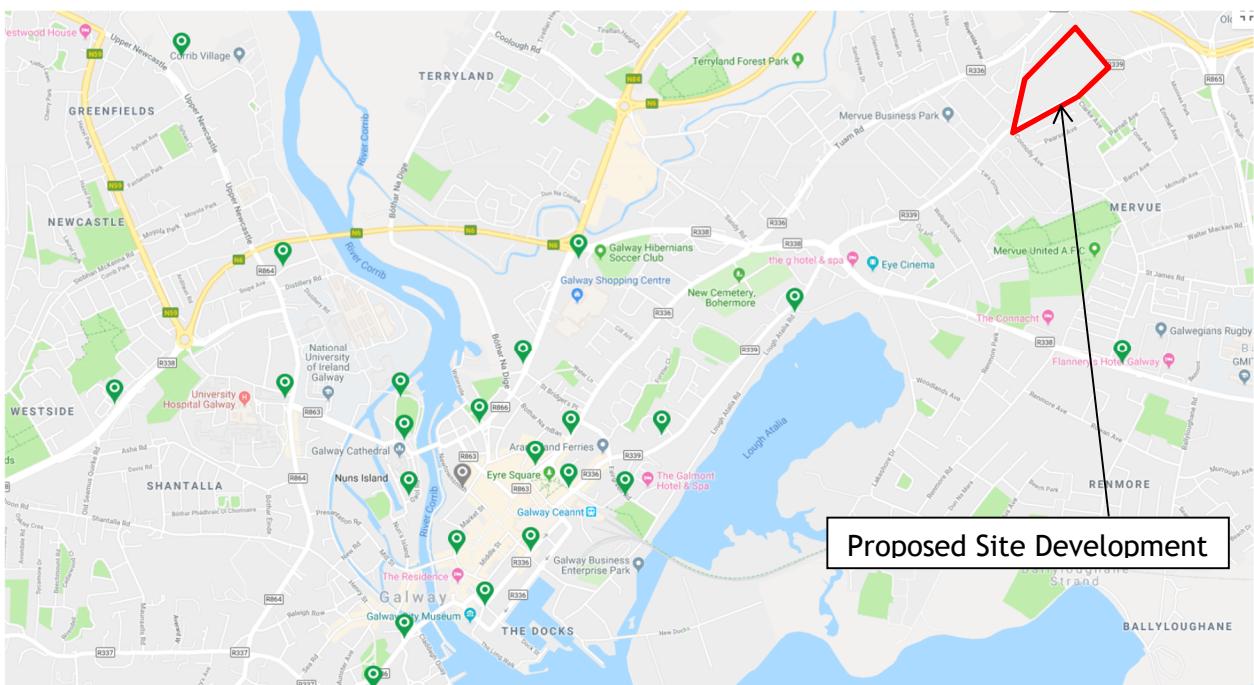

Consideration will be given to the provision of a cycle for rent scheme such as the existing 'Coke Zero' Galway Bike scheme. *Suitable areas for the location of this are available within the site. Suitable areas of land will be made available within the development for locating a bike rental station.*

*Please refer to Appendix C for the closest existing City Bikes Location.*

**Figure 2.3 - Proposed upgrade to the Galway Cycle Network.**  
(ref. Galway City Development Plan 2017 - 2023  
)

The ‘Coke Zero’ Galway Bike scheme also operates across central Galway City and this makes cycling much more accessible in Galway City. As shown in Figure 2.4 below, bicycle stations (indicated by Green pins) indicate the location of bicycle stations in the vicinity of the proposed development providing an easy and alternative mode of transport across the city.

**Figure 2.4 - Location of nearby ‘Coke Zero’ Bike Stations** (ref. Google Maps)

## 2.4 Car Parking

- a) Car parking serving the subject development is provided within a shared basement level car park. The total number of car park spaces proposed as part of the development is approximately 1,377 no. This will be split between a lower basement level and an upper basement level.

The Schedule of Accommodation produced by H J Lyons Architects indicates that, in accordance with the Galway City Council Development Plan, a significantly larger number of car parking spaces may be provided in excess of 1,377 no. However, in order to promote a more sustainable development, the car parking facilities will be used as a tool to encourage alternative transport use.

*It is noted the Galway City Council Development Plan advises a reduction in the car-parking standards may be acceptable when an application for development includes a Travel Plan, which demonstrates alternative methods of dealing with traffic generation associated with the proposed development*

In accordance with the GCC Development Plan Requirements provision will be made for:

- cycle parking
- disabled parking.
- an area within the car-park **visitor spaces may** be reserved for ‘GoCar’ type (rental) facilities
- **Electrical Vehicle (EV) charging Points will be provided in accordance with the EU Directive - Energy Performance in Building Directive 2018 and the Galway City Development Plan.**

### b) MANAGEMENT AND SECURITY

*A Management and Security Office suite is located at Upper Basement Level between the car park and lower level public open space to the east. This provides operational and welfare facilities for the overall and integrated site management and security staff on site as well as a public contact point.*

### c) CAR PARK LAYOUT AND ALLOCATION OF SPACES

*The overall site layout and design suggests car-park design and allocation of space as follows.*

#### i) Upper Basement Level

*The upper basement level is open to the public open space to the east. It is proposed that this car park level will provide for site visitors and public as well as hotel guest/public and office users. A set-down area is planned immediately adjacent to the public open space beside the visitor/public parking and Management and Security Office. This is to facilitate set-down including taxi pick-up, particularly for the adjacent residential and associated neighbourhood centre uses.*

*This set-down and visitor vehicular circulation is from Joyce Road and is designed as a ‘loop’ or short circuit around the block of visitor parking routing back out and up the exit ramp to Joyce Road.*

*It is proposed that the upper basement level car spaces will be allocated by the overall site management company in line with the site Mobility Management planning and for diverse and efficient use e.g. hotel demand will be higher in evening/over-night while office demand will peak during the day. Equally for evening/week-end public events or other amenity access, office spaces can be allocated for visitor/public use. These allocations are indicatively shown on the following car park plans.*

ii) Lower Basement Level

*It is proposed that the lower basement level will primarily be used by residential and office occupant users. Hotel staff parking is also provided immediately below the hotel. The residential parking is allocated on a 1 space / apartment resulting in 288 no. car-spaces provided exclusively for residential use. The balance of the spaces will be allocated by the site management company in line with the Mobility Management planning and for diverse and efficient use with those at upper basement level.*

The proposed allocation of car spaces is as per the table below.

Car Space Allocation				
Use	Upper Basement	Lower Basement	Total	Proposed Allocation
Hotel	142	27	169	Managed
Office	237	604	921	
Visitor	79	0	79	
Residential	0	288		Permanently Allocated
<b>Total</b>	<b>458</b>	<b>919</b>	<b>1377</b>	

*Motorcycles will utilise 154 parking spaces.*

In order to reduce car usage consideration for car sharing would include:

- Maintain an on-line database or a staff register including staff travel and contact details.
- Implement and foster a Car Sharing Programme.
- Match staff for car sharing and aim to match work schedules based on car sharing needs.
- Reserve preferential parking for participating cars.

When coupled with other proposals to enhance sustainable forms of development, such as promotion of cycling as an alternative transport mode, the proposed development car parking will deliver significant sustainability benefits by reducing existing levels of reliance on private car usage whilst encouraging the usage of more sustainable modes of transport, especially cycling and bus services to and from work.

*The, proposed development comprises of two phases. Phase 1 is the development of 5no. office blocks, 175 bedroom hotel and a double basement car park together with the infrastructure and public realm works. Phase 2 of the development will comprise of approximately 288 residential units, retail, gymnasium, creche and medical centre facilities. This MMP deals with the whole proposed development and the basement car park will be constructed in its entirety to provide car parking for both phases. The management of the car park will be undertaken by a management company who will deal with security, maintenance and the allocation of parking spaces. There will*

*be a continuous turnover of parking spaces (except for residential) and the car park is to be managed accordingly.*

*The residential development, after completion and occupation, will be allocated sufficient parking spaces generally in accordance with the Galway City Development Plan. The remaining spaces will be allocated in a systematic manner to ensure there is no overspill parking.*

*Based on TRICS surveys for the similar but various type of uses, the arrivals and departures of vehicles will occur throughout the day.*

*The largest employment type would be office work for which there is a generally discernible morning and evening peak hour for traffic. However, as with most modern office work practice, there is a significant use of a flexi time system in place resulting in a greater spread of arrivals and departures. It is noted that flexi time working is increasing in use. Home working is also increasing in its usage with limited attendance at the designated fixed office location.*

*Workers who participate in a car sharing scheme will receive preferential treatment in the allocation of parking spaces. The demand for car parking will vary at different times throughout the day and for the different employment uses. An example would be if the hotel had an evening or weekend function when there would be limited use of the car park by the offices.*

*A minimum amount of visitor parking will be maintained and appropriate electronic information signage provided that discourages queuing on the surrounding highway network. Note the car park is intended solely for on-site usage.*

*The mobility manager or travel coordinator will regulate the allocation of parking spaces as part of the site operating system. Illegal or inconsiderate parking within the site will be managed appropriately so as to discourage it.*

## 2.5 Pedestrians

The proposed development is located in the suburb area of Mervue, Galway City. As the potential for pedestrian trips to and from the development is high to moderate, it is important that the development is properly integrated into the existing footpath network. There are footpaths at the south (Monivea Road) and west (Joyces Road) of the site. *In order to assist pedestrians to cross the proposed ramp entrances to the site, the footpath will be delineated with coloured surfacing and necessary tactile paving for visually impaired pedestrians. The footpath levels will permit continuity between the surrounding footpath network. This is illustrated on the architect/landscape architect's drawings. This is considered to comply with the requirements of DMURS.*

The development is a 2.7km (33 minute) walk from Shop Street, which is the main thoroughfare of Galway City Centre.

In addition to direct pedestrian routes from the development to/from surrounding areas, the pedestrian network also provides routes to/from surrounding public transport network, including the nearby bus stops on Monivea Road. Refer to section 2.5 below for further details regarding public transport network.

*Galway City Council has indicated they may wish to construct a pedestrian crossing in Monivea Road to facilitate the movement of pedestrians from the existing Monivea area to the proposed development. The type of crossing and its location will be a matter for Galway City Council.*

*For illustration purposes of this report the External Roads drawings are included in Appendix B.*

## 2.6 Public Transport

*In order to facilitate the use of public transport the Mobility Manager will provide information on location of stops, routes, timetables, walking times to main public transport facilities, etc. The Mobility Manager will be the point of contact with all stakeholders.*

*The Mobility Manager may also advise site users of the availability of the national Taxsaver Scheme. Refer to Transport for Ireland web site:*

*(<https://www.transportforireland.ie/fares/taxsaver/>) for more details.*

High frequency public transport is available in the area of the development, as described below.

### 2.6.1 Train Services

Galway Train Station is very accessible from the site and there are regular train services between Galway and the surrounding areas, as follows:

- Dublin Heuston - Galway
- Galway - Limerick
- Galway - Limerick (Connections with Cork & Tralee)
- Waterford - Clonmel - Limerick Junction (Connections with Dublin, Cork, Limerick & Galway)  
Please refer to Appendix D for commuter train timetables.

The site is located 2.4km from Galway Train Station making it a 9 minute by bus, 7 minutes by bike and 39 minute and accessible by public transport and non-car based transport. Irish Rail connects Galway to the rest of the country and is a reliable and efficient service running throughout Ireland.

It should be noted that Oranmore Railway station on the outskirts of Galway City is nearby and also provides a convenient means for rail access to/from the development.

Please refer to Appendix D for Irish Rail service timetable.

### 2.6.2 Bus Services

The local area surrounding the development is served by existing Bus Éireann services. The following Bus Éireann routes serve the bus stops on Monivea Rd, located to the south of the proposed development. These services bring commuters directly into Galway's city centre

- 403 Route (Eyre Square - Castlepark)
- 405 Route (Rahoon - Eyre Square - Ballybane)
- 409 Route (Eyre Square - GMIT - Parkmore)

The following Bus Éireann routes serve the bus stops from the nearby Tuam Rd, located to the north of the proposed development.

- 425 Route (Galway - Mountbellew - Longford)
- 425A Route (Galway - Mountbellew)

Other bus routes (by private operators) may be available at other stops in the vicinity of the site e.g. Tuam Road. The site is in a prime location within Galway for availing of frequent and regular bus services. (See figure 2.6.)

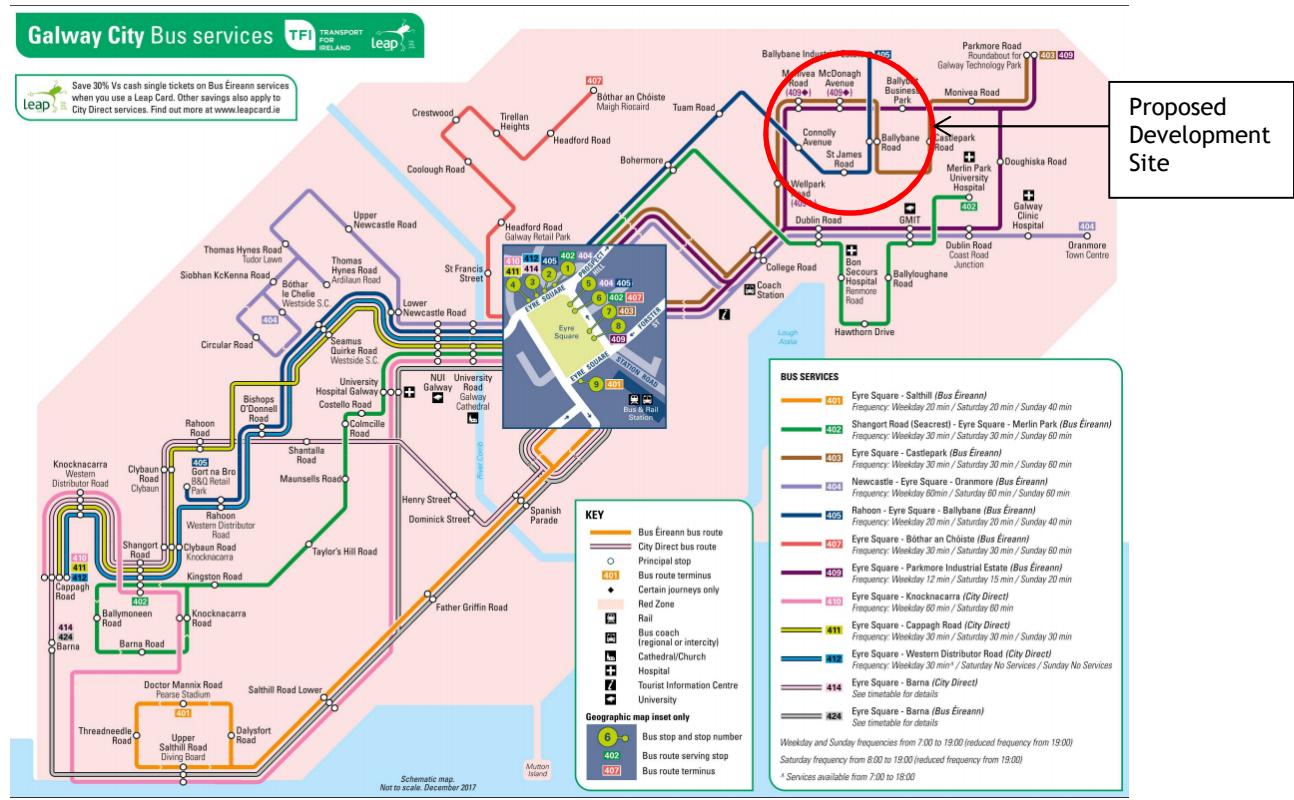

Figure 2.6: Galway City Bus Services (ref. TFI)

Please refer to Appendix E for Bus Éireann timetables.

Transport for Ireland (TFI) provide a phone App and a useful website called ‘Journey Planner’ this can be used to easily plan routes to and from work using bus routes and other forms of Transport. It is available as a free download and is highly recommended.

**Bus Eireann services in Galway accept the Leap Card which can offer bus passengers fare savings of up to 31% and provide a convenient payment method. As a result of Government legislation, employers can purchase monthly and annual Taxsaver Commuter Tickets on employee's behalf. This could cut commute costs by up to 52%. The [www.txsaver.ie](http://www.txsaver.ie) web site has further information.**

### 2.6.3 Taxi Services

There is a constant flow of taxis along Monivea Road and Tuam Road collecting and depositing passengers. This will facilitate taxi use by providing a safe and convenient means of accessing this form of transport. The objective is to encourage lift sharing in taxis to help reduce the demand on parking and congestion at peak times.

Please refer to Appendix F for the location map of taxi offices and ranks.

### 3.0 Modal Management

*Meetings have been held with the Transport Section of Galway City Council regarding the project and inter alia how the project addresses the objectives of the Galway Transport Strategy and the Galway City Centre Traffic Management Plan.*

*The overall employment occupancy of the whole proposed site has been given previously as approximately 3,500 persons. Based on recent data supplied by Henry J Lyons the breakdown of workers per block is estimated as follows:*

- a) *Office: 3,156 no. employees based on 1 person per 10 sq. and an approximate NIA of 31,556 sq.*
- b) *Proposed Phase 01 Ancillary (Block A, B, E): Approximately 40 no. staff required across 3 no. uses and split over a number of shifts*
- c) *Hotel: Daily average staff requirements of approx. 100 and split over a number of shifts*
- d) *Residential: 5 no. management/ maintenance employees*
- e) *Fitness/ Leisure Facilities: 12-15 employees over a number of shifts*
- f) *Phase 02 Ancillary*
- g) *Restaurant, Cafe and Convenience Store - approximately 35 no. staff required across 3 no. uses and split over a number of shifts*
- h) *Medical Centre - assumed staff of 10 people at one time*
- i) *Pharmacy - 3 employees at one time*

*This gives a total of 3,364 estimated maximum number of workers on site at any given time.*

*As described in Section 2.0 the work patterns of modern offices and the other various employment uses are evolving and the tendency is to avoid traditional peak hours. Section also 2.0 sets out in detail the means by which car usage will be reduced by the provision of the necessary infrastructure and the soft options of the input of a Mobility Manager.*

*Based on the 2016 Census, the local small area advises that:*

- *24% of households have no car*
- *17% of residents walk to work, school and college*
- *6% of residents cycle to work, school and college*
- *4% of residents use public transport to commute to work, school and college*

*It may be reasonable to assume that targets to reduce car usage and increase use of public transport are achievable subject to the input of the Mobility Manager and the provision of dedicated bus lanes and bus stops. The existing Bus Eireann Bus Route 403 and 425 travel along Monivea Road and Bus Route 405 and 425 travel along Tuam Road. It may be feasible to augment these services or provide additional bus services. The provision of the cycle lanes along Joyce's Road and Monivea Road coupled with the large capacity secure cycle parking facilities on site should increase the number of cyclists. The Mobility Manager will be the instigator and coordinator of all site measures to achieve an acceptable modal split that may be achieved in accordance with the principals and objectives set out in the Galway Transport Strategy .*

## 4.0 Implementation / Consultation / Monitoring

The Mobility Management Plan (MMP) is a document that evolves over time and requires ongoing implementation, management and monitoring, and for successful implementation requires organisational support, an internal Mobility Manager and financial resourcing.

To implement the MMP the following inputs are required:

- Senior Management support and commitment
- A Mobility Manager as the plan coordinator
- A Steering group to oversee the plan
- Working groups on various related issues
- Staff / union / partnership / external organisation consultations

To ensure effective results from any initial sustainable travel investment it is imperative to obtain the agreement of all the stakeholders and obtain the support of external partners like the Local Authority, public transport operators, etc. Ideally the MMP will be managed by a Mobility Manager or travel plan coordinator with the clear mandate to implement and evolve the plan. The Mobility Manager will also be best suited to monitor the results of the plan. Staff travel surveys should be carried out in the early stages and annually to monitor the initial success of the travel plan and to gain a better understanding of the staff travel habits. These survey results can also serve as a sustainable travel performance benchmark to indicate how the mobility management plan is performing in comparison to previous years and the sustainable travel targets initially outlined in the plan.
