

TABLE OF CONTENTS

1.0 Non-technical Summary

- 1.1 Introduction
- 1.2 Description of Location
- 1.3 Description of the Project
- 1.4 Description of the Receiving Environment - Baseline
- 1.5 The 'Do-nothing' Scenario
- 1.6 Description of Reasonable Alternatives
- 1.7 A Non-Technical Summary of the factors likely to be significantly affect by the project
 - 1.7.1 Population and Human Health
 - 1.7.2 Biodiversity
 - 1.7.3 Land, Soils, Geology and Hydrogeology
 - 1.7.4 Hydrology
 - 1.7.5 Climate and Air
 - 1.7.6 Noise and Vibration
 - 1.7.7 Material Assets – Traffic
 - 1.7.8 Material Assets – Waste Management
 - 1.7.9 Material Assets – Built Services
 - 1.7.10 Cultural Heritage including Archaeology
 - 1.7.11 Landscape
- 1.8 Description of the expected significant adverse effects of the project on the environment deriving from the vulnerability of the project to risks of major accidents and/or disasters (if any)
- 1.9 Climate Change
 - Appendix 1.1 – Site Location Map
 - Appendix 1.2 – Proposed Site Layout Drawings

2.0 Introduction to Project and Legislative Context

- 2.1 Legislative Background
- 2.2 Need for Environmental Impact Assessment
- 2.3 Content of Environmental Impact Assessment
- 2.4 Structure of Environmental Impact Assessment Report (EIAR)
 - 2.4.1 Description of Effects
 - 2.4.2 Indirect, Secondary and/or Cumulative Impacts
- 2.5 Competency of Experts
- 2.6 EIA Portal
- 2.7 Errors
 - Appendix 2.1 EIA Portal Notification Confirmation

3.0 Introduction to Site and Project

- 3.1 Description of Location of the Proposed Development
- 3.2 Description of the Project
- 3.3 Breakdown of Development Proposed
 - 3.3.1 Residential
 - 3.3.2 Neighbourhood Uses
 - 3.3.3 Public Open Space Provision
 - 3.3.4 Car Parking
 - 3.3.5 Improvement Works to McGraths Lane and Railway Terrace
- 3.4 Construction Programme/Phasing
- 3.5 Main Characteristics of Operational Phase
- 3.6 Description of the Reasonable Alternatives
 - 3.6.1 Alternative Sites
 - 3.6.2 Alternative Uses
 - 3.6.3 Alternative Design and Layout
- 3.7 Main Reasons for Chosen Option

4.0 Population and Human Health

- 4.1 Introduction
- 4.2 Study Methodology
 - 4.2.1 Principal Receptors
- 4.3 The Receiving Environment – Baseline Scenario
 - 4.3.1 Land Use and Settlement Patterns
 - 4.3.2 Population and Housing Supply
 - 4.3.3 Employment and Commuting Pattern
 - 4.3.4 Community Infrastructure Capacity
 - 4.3.5 Human Health
- 4.4 ‘Do nothing’ Scenario
- 4.5 Cumulative Impacts
- 4.6 Likely Significant Effects on Receiving Environment
 - 4.6.1 Land Use and Settlement Patterns
 - 4.6.2 Population and Housing Supply
 - 4.6.3 Employment and Commuting Pattern
 - 4.6.4 Community Infrastructure Capacity
 - 4.6.5 Human Health
- 4.7 Mitigation Measures
- 4.8 Risk of Major Accidents and Disasters
 - 4.8.1 Introduction

4.8.2	Assessment Methodology
4.8.3	Assessment of Major Accident Hazards and Impacts on Human Health
4.8.4	Mitigating Measures
4.8.5	Residential Impacts
4.8.6	Difficulties Encountered Compiling Information
4.9	References
	Appendix 4.1 COMAH Land Use Planning Assessment
5.0	<u>Biodiversity</u>
5.1	Introduction
5.2	Study Methodology
5.3	Existing Receiving Environment
5.3.1	Zone of Influence
5.3.2	Stakeholder Consultation
5.3.3	Site Survey
5.3.3.1	Flora
5.3.3.2	Fauna
5.3.4	Overall Evaluation of the Context, Character, Significance and Sensitivity of the Proposed Development Site
5.4	Characteristics of the Proposed Development
5.5	Potential Impact of the Proposed Development
5.5.1	Construction Phase
5.5.2	Operation Phase
5.5.3	Do Nothing Impact
5.5.4	Cumulative Impacts
5.6	Avoidance, Remedial and Mitigation Measures
5.6.1	Mitigation Measures Proposed
5.7	Predicted Impacts of the Proposed Development
5.8	Monitoring
5.9	Difficulties Encountered
5.10	References
6.0	<u>Land, Soils, Geology and Hydrogeology</u>
6.1	Study Methodology
6.1.1	Appraisals Methodology
6.1.2	Sources of Information
6.2	Receiving Environment
6.2.1	Land Use

6.2.2	Drainage
6.2.3	Soil & Subsoil
6.2.4	Bedrock Geology
6.2.5	Aquifer Classification
6.2.6	Aquifer Vulnerability
6.2.7	Groundwater Wells and Flow Direction
6.2.8	Geological Heritage
6.2.9	Economic Geology
6.2.10	Geo-hazards
6.2.11	Soil Quality
6.2.12	Groundwater Quality
6.2.13	Hydrogeological Features
6.2.14	Area of Conservation
6.2.15	Rating of Site Important of Geological and Hydrological Features
6.2.16	Conceptual Site Model
6.3	Characteristics of the Proposed Development
6.4	Potential Impacts of the Development
6.4.1	Construction Phase
6.4.2	Assessment of Impact Pre-Mitigation – Construction
6.4.3	Operational Phase
6.4.4	Assessment of Impact Pre-Mitigation – Operation
6.5	Mitigation Measures
6.5.1	Construction Phase
6.5.2	Operational Phase
6.6	Predicted Impacts of the Proposed Development
6.6.1	Construction Phase
6.6.2	Operational Phase
6.6.3	‘Do Nothing Scenario’
6.6.4	‘Worst Case Scenario’
6.7	Monitoring
6.7.1	Construction Phase
6.7.2	Operational Phase
6.8	Interactions
6.8.1	Hydrology
6.8.2	Air Quality
6.9	Potential Cumulative Impacts

Appendix 6.1 Description of Impacts

Appendix 6.2 Criteria for Rating Site Attributes

7.0 Hydrology

7.1 Study Methodology

7.1.1 Appraisals Methodology

7.1.2 Sources of Information

7.2 Receiving Environment

7.2.1 Hydrology (Surface Water)

7.2.2 Surface Water Quality

7.2.3 Flood Risk

7.2.4 Area of Conservation

7.2.5 Rating of Site Importance of the Hydrological Feature

7.3 Characteristics of the Proposed Development

7.4 Potential Impacts of the Development

7.4.1 Constructions Phase

7.4.2 Assessment of Impact Pre-Mitigation – Construction

7.4.3 Operational Phase

7.4.4 Assessment of Impact Pre-Mitigation – Operation

7.5 Mitigation Measures

7.5.1 Construction Phase

7.5.2 Operational Phase

7.6 Predicted Impacts of the Proposed Development

7.6.1 Construction Phase

7.6.2 Operational Phase

7.6.3 ‘Do Nothing Scenario’

7.6.4 ‘Worst Case Scenario’

7.7 Monitoring

7.7.1 Construction Phase

7.7.2 Operational Phase

7.8 Interactions

7.8.1 Land, Soil, Geology and Hydrogeology

7.8.2 Biodiversity

7.9 Potential Cumulative Impacts

7.10References

Appendix 7.1 Criteria for Rating Site Attributes

8.0 Air Quality and Climate including Odour

8.1 Background Information

- 8.1.1 Ambient Air Quality Standards
- 8.1.2 Dust Deposition Guidelines
- 8.1.3 Climate Agreements
- 8.1.4 Gothenburg Protocol

8.2 Assessment Methodology

- 8.2.1 Local Air Quality Assessment
- 8.2.2 Regional Air Quality Assessment (including Climate)
- 8.2.3 Conversion of NO_x to NO₂
- 8.2.4 Ecological Sites
- 8.2.5 Odour Assessment
 - 8.2.5.1 Characteristics of Odour
 - 8.2.5.2 Odour Guidelines

8.3 Receiving Environment

- 8.3.1 Meteorological Data
- 8.3.2 Trends in Air Quality
- 8.3.3 Baseline Air Quality

8.4 Characteristics of the Proposed Development

8.5 Potential Impact of the Proposed Development

- 8.5.1 Construction Stage
 - 8.5.1.1 Air Quality
 - 8.5.1.2 Climate
 - 8.5.1.3 Human Health
- 8.5.2 Operational Stage
 - 8.5.2.1 Local Air Quality
 - 8.5.2.2 Modelling Assessment
 - 8.5.2.3 Regional Air Quality Impact
 - 8.5.2.4 Air Quality Impact on Sensitive Ecosystems
 - 8.5.2.5 Odour
 - 8.5.2.6 Climate
 - 8.5.2.7 Human Health
- 8.5.3 Do-Nothing Impact
- 8.5.4 Cumulative Assessment

8.6 Ameliorative, Remedial or Reductive Measures

- 8.6.1 Construction Stage
 - 8.6.1.1 Air Quality
 - 8.6.1.2 Climate

- 8.6.2 Operational Stage
- 8.7 Residual Impact of the Proposed Development
 - 8.7.1 Construction Stage
 - 8.7.1.1 Air Quality
 - 8.7.1.2 Climate
 - 8.7.2 Operational Stage
- 8.8 Monitoring
 - 8.8.1 Construction Stage
 - 8.8.2 Operational Stage
- 8.9 Difficulties Encountered
- 8.10 References
 - Appendix 8.1 Ambient Air Quality Standards
 - Appendix 8.2 Transport Infrastructure Ireland Significance Criteria
 - Appendix 8.3 Dust Minimisation Plan

9.0 Noise and Vibration

- 9.1 Introduction
- 9.2 Methodology
 - 9.2.1 Assessment Overview
 - 9.2.2 Assessment Criteria
 - 9.2.2.1 Construction Phase – Noise
 - 9.2.2.2 Construction Phase – Vibration
 - 9.2.2.3 Operational Phase – Noise
- 9.3 Receiving Environment
 - 9.3.1 Baseline Noise Survey
 - 9.3.1.1 Choice of Measurement Locations
 - 9.3.1.2 Survey Periods
 - 9.3.1.3 Monitoring Equipment
 - 9.3.1.4 Measurement Parameters
 - 9.3.1.5 Survey Results
 - 9.3.1.6 Summary of Noise Climate
 - 9.3.2 Baseline Vibration Survey
 - 9.3.2.1 Survey Details
 - 9.3.2.2 Survey Results
- 9.4 Characteristics of the Proposed Development
- 9.5 Do Nothing Scenario
- 9.6 Potential Impact of Proposed Development
 - 9.6.1 Construction Phase

- 9.6.1.1 Construction Phase – Noise
- 9.6.1.2 Construction Phase – Vibration
- 9.6.2 Operational Phase
 - 9.6.2.1 Additional Vehicular Traffic on Surrounding Roads
 - 9.6.2.2 Building Services Plant
- 9.7 Cumulative Impacts
- 9.8 Ameliorative, Remedial or Reductive Measures
 - 9.8.1 Construction Phase
 - 9.8.1.1 Selection of Quiet Plant
 - 9.8.1.2 Noise Control at Source
 - 9.8.1.3 Screening
 - 9.8.1.4 Liaison with the Public
 - 9.8.1.5 Project Programme
 - 9.8.2 Operational Phase
 - 9.8.2.1 Additional Traffic on Adjacent Roads
 - 9.8.2.2 Mechanical Services Plant
- 9.9 Monitoring
 - 9.9.1 Construction Phase
 - 9.9.2 Operational Phase
- 9.10 Residual Impacts of Proposed Development
 - 9.10.1 Construction Phase
 - 9.10.2 Operational Phase
- 9.11 Interactions
- 9.12 Inward Impact
 - 9.12.1 Existing Noise Climate
 - 9.12.2 Noise Model of Site
 - 9.12.2.1 Calibration of Noise Model
 - 9.12.3 Assessment of Site
 - 9.12.3.1 ProPG (2017)
 - 9.12.4 Proposed Development
 - 9.12.5 Future Noise Climate
 - 9.12.6 Stage 2 – Full Acoustic Assessment
 - 9.12.6.1 Element 1 – Good Acoustic Design Process
 - 9.12.6.2 Element 2 – Internal Noise Levels
 - 9.12.7 Conclusion

Appendix 9.1 Unattended Noise Monitoring Graphed Results

10.0 Material Assets – Traffic

- 10.1 Introduction
- 10.2 Assessment Methodology
- 10.3 Receiving Environment
 - 10.3.1 Site Location
 - 10.3.2 Local Road Network
 - 10.3.3 Baseline Traffic Data
 - 10.3.4 Pedestrian and cycling facilities
 - 10.3.5 Public Transport Accessibility
- 10.4 Characteristics of the Proposal
 - 10.4.1 Introduction
 - 10.4.2 Physical Infrastructure
 - 10.4.3 Car Parking Provision
 - 10.4.4 Trip Generation
 - 10.4.5 Traffic Distribution
- 10.5 Potential Impact of the Proposal
 - 10.5.1 Introduction
 - 10.5.2 Traffic Impact
 - 10.5.3 Walking and Cycling Infrastructure
 - 10.5.4 Do-Nothing Scenario
- 10.6 Mitigating Measures
 - 10.6.1 Introduction
 - 10.6.2 Construction Phase
 - 10.6.3 Operational Phase
- 10.7 Predicted Impact of the Proposal
 - 10.7.1 Traffic
 - 10.7.1.1 Construction Phase
 - 10.7.1.2 Operational Phase
- 10.8 Monitoring and Reinstatement
 - 10.8.1 Construction Phase
 - 10.8.2 Operational Phase
- 10.9 Interactions
- 10.10 Difficulties in Compiling Information
- 10.11 References

11.0 Material Assets – Waste Management

- 11.1 Introduction
- 11.2 Methodology
 - 11.2.1 Legislation and Guidance
- 11.3 Receiving Environment
- 11.4 Characteristics of the Proposed Development
 - 11.4.1 Construction Phase
 - 11.4.2 Operational Phase
- 11.5 Potential Impacts of the Proposed Development
 - 11.5.1 Construction Phase
 - 11.5.2 Operational Phase
- 11.6 Mitigation Measures
 - 11.6.1 Construction Phase
 - 11.6.2 Operational Phase
- 11.7 Predicted Impact of the Proposed Development
 - 11.7.1 Construction Phase
 - 11.7.2 Operational Phase
 - 11.7.3 Do Nothing Scenario
- 11.8 Monitoring Measures
 - 11.8.1 Construction Phase
 - 11.8.2 Operational Phase
- 11.9 Difficulties Encountered
 - Appendix 11.1 Construction and Demolition Waste Management Plan
 - Appendix 11.2 Operational Waste Management Plan

12.0 Material Assets – Build Services

- 12.1 Introduction
- 12.2 Assessment Methodology
- 12.3 Surface Water Drainage
 - 12.3.1 The Receiving Environment
 - 12.3.2 Characteristics of the Proposal
 - 12.3.3 Potential Impact of the Proposal – Construction Phase
 - 12.3.4 Potential Impact of the Proposal – Operational Phase
 - 12.3.5 ‘Do-Nothing’ Scenario
 - 12.3.6 Mitigating Measures – Construction Phase
 - 12.3.7 Mitigating Measures – Operational Phase
 - 12.3.8 Predicted Impact of the Proposal – Construction Phase
 - 12.3.9 Predicted Impact of the Proposal – Operational Phase

- 12.3.10 Predicted Impact of the Proposal ‘Worse Case Scenario’
- 12.4 Water Supply
 - 12.4.1 The Receiving Environment
 - 12.4.2 Characteristics of the Proposal
 - 12.4.3 Potential Impact of the Proposal – Construction Phase
 - 12.4.4 Potential Impact of the Proposal – Operational Phase
 - 12.4.5 ‘Do Nothing’ Scenario
 - 12.4.6 Mitigating Measures – Construction Phase
 - 12.4.7 Mitigating Measures - Operational Phase
 - 12.4.8 Predicted Impact of the Proposal – Construction Phase
 - 12.4.9 Predicted Impact of the Proposal – Operational Phase
 - 12.4.10 Potential Impact – Worst Case Scenario
- 12.5 Foul Water
 - 12.5.1 The Receiving Environment
 - 12.5.2 Characteristics of the Proposal
 - 12.5.3 Potential Impact of the Proposal – Construction Phase
 - 12.5.4 Potential Impact of the Proposal – Operational Phase
 - 12.5.5 ‘Do Nothing’ Scenario
 - 12.5.6 Mitigating Measures – Construction Phase
 - 12.5.7 Mitigating Measures - Operational Phase
 - 12.5.8 Predicted Impact of the Proposal – Construction Phase
 - 12.5.9 Predicted Impact of the Proposal – Operational Phase
 - 12.5.10 Potential Impact – Worst Case Scenario
- 12.6 ESB Supply
 - 12.6.1 The Receiving Environment
 - 12.6.2 Characteristics of the Proposal
 - 12.6.3 Potential Impact of the Proposal – Construction Phase
 - 12.6.4 Potential Impact of the Proposal – Operational Phase
 - 12.6.5 ‘Do Nothing’ Scenario
 - 12.6.6 Mitigating Measures – Construction Phase
 - 12.6.7 Mitigating Measures - Operational Phase
 - 12.6.8 Predicted Impact of the Proposal – Construction Phase
 - 12.6.9 Predicted Impact of the Proposal – Operational Phase
 - 12.6.10 Cumulative Impacts
- 12.7 Gas
 - 12.7.1 The Receiving Environment
 - 12.7.2 Characteristics of the Proposal
 - 12.7.3 Potential Impact of the Proposal – Construction Phase

- 12.7.4 Potential Impact of the Proposal – Operational Phase
- 12.7.5 ‘Do Nothing’ Scenario
- 12.7.6 Mitigating Measures – Construction Phase
- 12.7.7 Mitigating Measures - Operational Phase
- 12.7.8 Predicted Impact of the Proposal – Construction Phase
- 12.7.9 Predicted Impact of the Proposal – Operational Phase
- 12.7.10 Cumulative Impacts
- 12.8 Telecommunications
 - 12.8.1 The Receiving Environment
 - 12.8.2 Characteristics of the Proposal
 - 12.8.3 Potential Impact of the Proposal – Construction Phase
 - 12.8.4 Potential Impact of the Proposal – Operational Phase
 - 12.8.5 ‘Do Nothing’ Scenario
 - 12.8.6 Mitigating Measures – Construction Phase
 - 12.8.7 Mitigating Measures - Operational Phase
 - 12.8.8 Predicted Impact of the Proposal – Construction Phase
 - 12.8.9 Predicted Impact of the Proposal – Operational Phase
 - 12.8.10 Cumulative Impacts
- 12.9 Monitoring and Reinstatement
- 12.10 Interactions
- 12.11 Difficulties in Compiling Information
- 12.12 References
- Appendix 12.1 ESB Network
- Appendix 12.2 Gas Network
- Appendix 12.3 Eir Network
- Appendix 12.4 Virgin Media Network

13.0 Cultural Heritage including Archaeology

- 13.1 Introduction
- 13.2 Methodology
 - 13.2.1 Documentary Sources
 - 13.2.2 Sites and Monuments Record (SMR) and Record of Monuments and Places (RMP)
 - 13.2.3 National Monuments
 - 13.2.4 Database of Irish Excavation Reports
 - 13.2.5 Topographical Files, National Museum of Ireland
 - 13.2.6 Cartographic Sources
 - 13.2.7 Architectural Heritage (NIAH)

- 13.2.8 Site Survey / Walk over
- 13.2.9 Geophysical Survey
- 13.2.10 Test Trenching
- 13.3 Receiving Environment
- 13.4 Historical and Archaeological Assessment
 - 13.4.1 General prehistoric background
 - 13.4.2 General historic background
 - 13.4.3 Medieval Town of Drogheda
 - 13.4.3.1 Streets and Street Patterns
 - 13.4.4 Archaeological background of nearby townlands
 - 13.4.5 The River Boyne and the Marsh Road; post-medieval Drogheda
 - 13.4.6 The 20th century
- 13.5 Recorded Monuments
- 13.6 Previous Excavations
- 13.7 Cartographic Review
- 13.8 Aerial Photography
- 13.9 Field Survey
- 13.10 National Inventory of Architectural Heritage (NIAH) and Protected Structures
- 13.11 Geophysical Survey
 - 13.11.1 Field 1
 - 13.11.2 Field 2
- 13.12 Test Trenching
- 13.13 Predicted Impacts
 - 13.13.1 Direct Impacts on Recorded Archaeological Monuments
 - 13.13.2 Direct Impacts on Known and Potential Archaeological Sites
 - 13.13.3 Indirect Impacts
- 13.14 Mitigation Measures
- 13.15 Residual Impacts

14.0 Landscape and Visual

- 14.1 Introduction
- 14.2 Methodology
- 14.3 Nature of Impacts
 - 14.3.1 Impact Significance Criteria
- 14.4 Existing Visual Character
- 14.5 Landscape Type – Characteristics of the Proposed Development
- 14.6 Analysis

- 14.6.1 Potential Impact of the Proposed Development
- 14.6.2 Potential Visual Impact
- 14.6.3 Predicted Visual Impact of the Proposed Development
- 14.6.4 Visual Impact Assessment Viewpoints
- 14.6.5 Mitigation of Visual Impacts
- 14.6.6 Executive Summary
- 14.6.7 Monitoring
- 14.6.8 Interactions
- 14.6.9 Difficulty in Compiling Information

15.0 Summary of Impacts and Interactions

- 15.1 Introduction
- 15.2 Summary of Positive Impacts
- 15.3 Summary of Adverse Impacts without Mitigation and with Mitigation
- 15.4 Summary of Interactions

16.0 Mitigation and Monitoring

- 16.1 Introduction
- 16.2 Summary of Mitigation and Monitoring
 - 16.2.1 Population and Human Health
 - 16.2.2 Biodiversity
 - 16.2.3 Land, Soils, Geology and Hydrogeology
 - 16.2.4 Hydrology
 - 16.2.5 Air Quality and Climate
 - 16.2.6 Noise and Vibration
 - 16.2.7 Material Assets – Traffic
 - 16.2.8 Material Assets – Waste Management
 - 16.2.9 Material Assets - Built Services
 - 16.2.10 Cultural Heritage including Archaeology
 - 16.2.11 Landscape
