

20.0 DIFFICULTIES ENCOUNTERED

In general, no significant difficulties, in terms of technical deficiencies or lack of sources of information, were encountered in compiling the specified information contained in the Statement.

References to published sources of information are acknowledged in the text and appendices. In addition, studies commissioned specifically for the purposes of this Environmental Impact Assessment Report are also referenced. A list of all consultants involved in the compilation of information for this Statement is provided in Chapter 1.

As the proposed development will not require the use of natural resources that are in short supply, nor will the development result in the emission of pollutants that will create nuisance or hazard, the matters referred to in *Schedule 6(2)(c) of the Planning and Development Regulations, 2001 (as amended)* do not apply.

The full impact analysis was carried out by experienced consultants and the best available methods were employed to forecast environmental effects.
