- Meenbog Turbine Locations  
★
- Study Area  
□

- Theoretical Turbine Visibility**
- 8.3% Visibility of Meenbog and/or Meenadreen turbines only
  - 40.4% Visibility of proposed turbines as well as Meenbog and/or Meenadreen turbines
  - 3.6% Visibility of proposed Barnesmore turbines only

47.7% of the entire study area to 20km will not have any view of the turbines

This ZTV map has been calculated such that a turbine registers as been theoretically visible to observers in the surrounding landscape once there is an unobstructed line of sight to its blade tips.

Observer Height assumed: 2m to eye-level height  
Blade Tip Heights: Variable

Note: This ZTV map is calculated for landform screening only and does not take account of the significant screening effects of vegetation (hedgerows, trees) and buildings inherent across the study area.
