1.0 Introduction

PUNCH Consulting Engineers were appointed by Dún Laoghaire-Rathdown County Council to carry out a Travel Plan for the proposed residential development in Shanganagh, Shankill, Co. Dublin.

The existing site is predominantly meadowlands with part of the site formerly used for allotments. The existing site has an area of approximately 9.69 hectares. The southwest corner of the site is occupied by a greenhouse and Parks Department compound. The site is bounded by a residential development to the north, parklands to the east and south and the R119 Dublin Road to the west.

The proposed development comprises of 597 residential units, a creche and small local retail units constructed on parkland setting. Vehicular access to the development is available via the Dublin Road entrance. The proposed works are outlined in a series of architectural drawings prepared by ABK and engineering drawings prepared by PUNCH and supplied as part of the planning documentation.

An extract from the site layout is included in Figure 1. The site extents can be seen in Figure 2

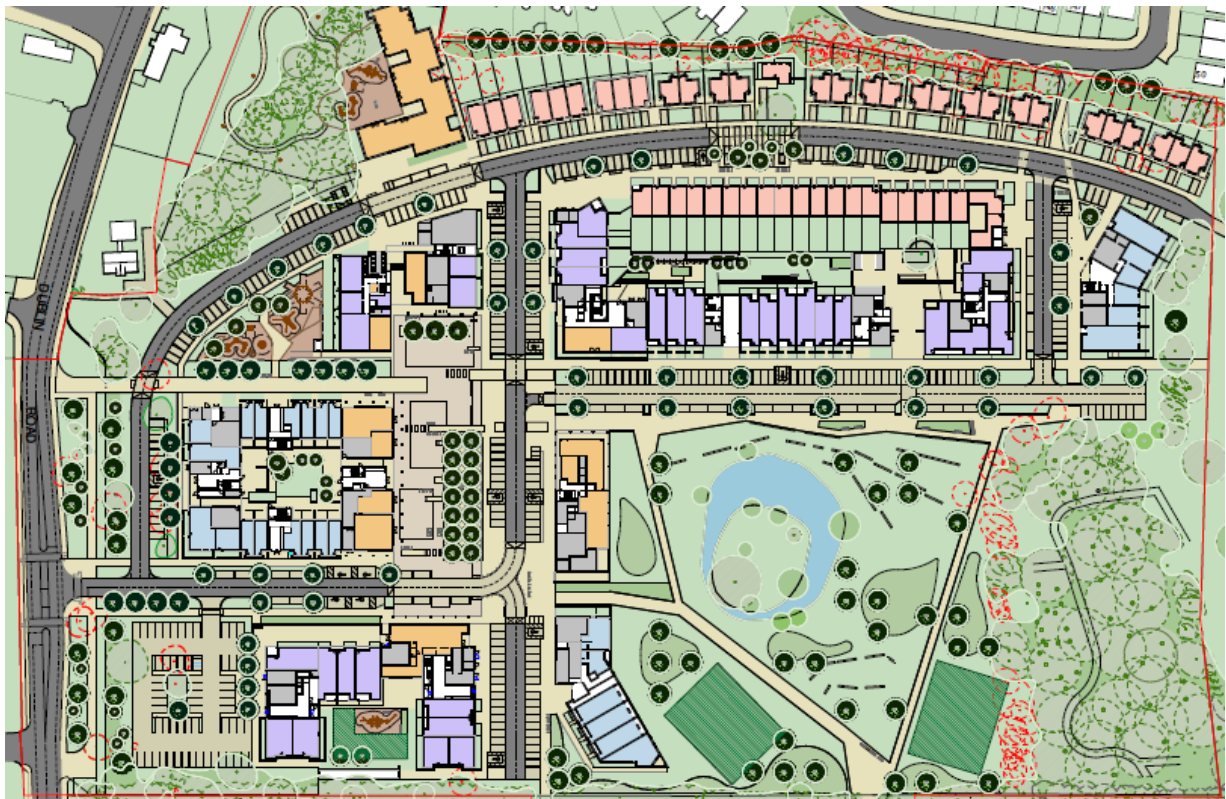

Figure 1: Architects Site Layout

Figure 2 - Location Map of the Proposed Development
(Ref: GeoHive.ie)

2.0 Travel Plan

2.1 Introduction

This section outlines the provisions that the applicant proposes to put in place as a means of reducing car dependency associated with this proposed development in the interest of compliance with the following sustainable transport initiatives:

- Department of Transport National Policy, Smarter Travel: A Sustainable Transport Future - A New Transport Policy for Ireland 2009-2020, which provides that 500,000 more people will take alternative means to commute to work to the extent that the total share of car commuting will drop from 65% to 45%;
- The National Cycling Policy Framework 2010 target, which provides that cycling will be developed in Ireland to the extent that 10% of all trips, including commuting, will be by bike by 2020;
- It would be appropriate to use additional guidance based on *UK sourced Making Residential Travel Plans Work: Guidelines for new development* - UK Department of Transport 2005.
- The need to reduce transport emission to meet EU 2020 greenhouse gas reduction targets; and
- The need to reduce traffic congestion, particularly at peak commuting times.

Travel Plans are developed for enhancing travel via more sustainable modes of transport. Travel Plans are conducted to identify travel demand strategies to reduce single occupancy private car travel which in turn reduces traffic congestion, noise pollution and environmental impacts. Residents and users of the site are informed of the alternatives to the private car and are given the required advice, support and encouragement to travel in a sustainable way. The Travel Plan will also include proposed future transport improvements to those already available.

For this development a site-specific Travel Plan can only be fully developed and implemented once the occupier/user and their travel behaviour is known and when the development is occupied. This initial Travel Plan sets out the key infrastructural proposals and modal split targets for the development in general terms and will be further developed when the development is occupied.

The Travel Plan can lead to benefits, such as offering substantial savings to residents by suggesting alternatives to travelling to work (other than by car), allowing commuters to avail of

a healthier lifestyle by incorporating exercise into the daily commute and reducing stress experienced by residents caused by lack of alternatives in commuting to work.

The Travel Plan should be considered as a dynamic process where a package of measures and campaigns are identified, piloted and monitored on an ongoing basis. The nature of the plan therefore changes during

its implementation in that some measures prove successful and are therefore retained while others are not supported and are discarded. It is important that the plan retains the support of users and receives continuous monitoring. Feedback and active management of the plan is required for it to continue to be successful. Based on the 2016 Census, it is evident that a significant percentage of residents in the area do not own a car (23%) and travel to work, school or college by walking, cycling and public transport (65%).

The Travel Plan specific to the nature and location of the development will consist of a package of sustainable measures aimed at increasing sustainable travel. These measures can include facilitating walking, cycling and car sharing schemes. Soft measures such as education, information and awareness can also be used. The Travel Plan will be developed once the development is fully occupied.

The new development will cater for both vehicular and pedestrian traffic and includes provision of bicycle parking. Measures laid out in the Travel Plan will aim to reduce the number of people travelling to and from the development by car, promote the use of public transport and encourage users to use more sustainable methods of travelling.

In order to establish an effective Travel plan, the development once occupied should submit the following information:

- Residents travel survey information to establish the origin and destination of trips to and from the development,
- Outline specific schemes/measures implemented to encourage a shift from car dependant transport to and from the site
- Results of resident's comments
- Targets to be set out in accordance to approved NTA guidelines and documents
- An outline of the various schemes that the development, plan to make available to its residents to encourage the desired change in their travel patterns to and from work; such as shared parking facilities, cycle facilities, public transport subsidies, car-pooling,

walking groups, cycle groups, communication, consultation, promotion and tax saver schemes.

The success of the Travel Plan depends on the co-operation of all parties. The appointment of a co-ordinator and a steering group is vital for the success of the plan. This MMP will need to be reviewed on a regular basis within the steering group with updates occurring as improvements to the transport network in the vicinity of the development site are implemented.

2.2 Objective of the Plan

The objectives of the Travel Plan for the proposed development are as follows:

- To encourage/increase the use of public transport, walking and cycling for residents and visitors for work-related travel and to facilitate travel by bicycle, bus and train.
- To reduce the overall number of single occupant vehicles trips for journeys to and from the development.
- To integrate mobility management into the development decisions, policies and practices to work closely with governing bodies on means and use of transport services around the vicinity of the development site
- To provide information and have resources readily available to increase awareness and continue education on sustainable modes of travel for both residents and visitors to the development
- To increase car-pooling amongst residents.

2.3 Transport Services

Table 1 below describes the approximate transport times from the proposed development site to various transport hubs and significant areas. Please note for bus and train journeys these times include walking, connections etc. Traffic conditions will vary, and the times may be different for car and bus times shown. The locations of the significant existing Transport Features are shown in Figure 3 Table 1 below.

Table 1 - Approximate Transport Times from the Proposed Development Site

Destination	Distance (km)	Approximate Time Taken (minutes)				
		Car	Cycle	Bus	Train (bus to Bray, Dart from Bray) ¹	Walking
Bus Stop 4204 Dublin Road (North Bound)	0.35	-	2	-	-	4
Bus Stop 4125 Dublin Road (South Bound)	0.35	-	2	-	-	4
Shankill DART Station	2.1	6	6	-	-	26
Bray Town Centre	2.8	9	10	9	-	35
Connolly Station *Dublin Area Trains	18.4	37	62	64	65	-
Busáras Central Station	17.9	37	62	64	67	-
Dublin City Centre (O'Connell Street)	18.0	42	64	59	69	-
Dun Laoghaire Town Centre (Marine Road)	8.5	20	31	38	38	106
Dublin Heuston Station *Regional Trains	19.2	28	68	68	-	-
Dublin Airport	27.2	33		75	-	-

¹ It should be noted that the assessment covers the existing Shankill Dart Station. The proposed Woodbrook Dart station will facilitate more convenient and faster access for residents to the Dart.

Figure 3 - Site Development Transport Features
(ref. Google Maps)

2.3.1 Cycling

Cycling is to be significantly encouraged as part of the development. (Based on the 2016 National Travel Survey) 25.5% of the journeys undertaken by those in the Dublin area were by walking or cycling

The DLRCC development plan requires a minimum of 1 cycle parking space per residential unit plus one short term space per five units. In order to allow for visitors, whilst the New Apartment guidelines require a higher provision rate. It is proposed to provide 1,039 no. resident and 279 visitor cycle parking spaces on site reflecting the emphasis on reducing dependency on motorised private transport. This is in accordance with the quantum outlined in the Cycle Parking Statement included as part of this planning submission. An extract is included below from the *Standards for Cycle Parking and associated Cycling Facilities for New Developments January 2018*.

Table 4.1 Cycle parking for residential development		
Residential Development type	1 short stay (visitor) parking space per: (Minimum of 2 spaces)	1 long stay parking space per: (Minimum of 2 spaces)
Apartments, Flats, Sheltered housing	5 units	1 unit
Houses - 2 bed dwelling	5 units	1 unit
Houses - 3+ bed dwelling	5 units	1 unit
Sheltered housing	5 units	1 unit
Student Accommodation	5 bedrooms	2 bedrooms

Figure 4: table 4.1 From the DLRCC Cycle Standards

It is anticipated that cycle parking will be monitored and addressed more fully as part of considerations for the Dublin Area, with potential for additional spaces if required in the future.

The development is located at a reasonable distance from the city centre (circa 18 km away), which means that the trip to commute from Dublin City centre to the proposed development is around 65 minutes. Additionally, the site is relatively close to Bray town centre which is 2.8 kilometres from the site. The city centre and local region has many cycle lanes and designated paths for the use of cyclists along with proposed development plans to provide more throughout the city.

The National Transport Authority in conjunction with DLRCC has proposals to upgrade the cycle network and Figure 5 shows the proposed improvements in the vicinity of the site.

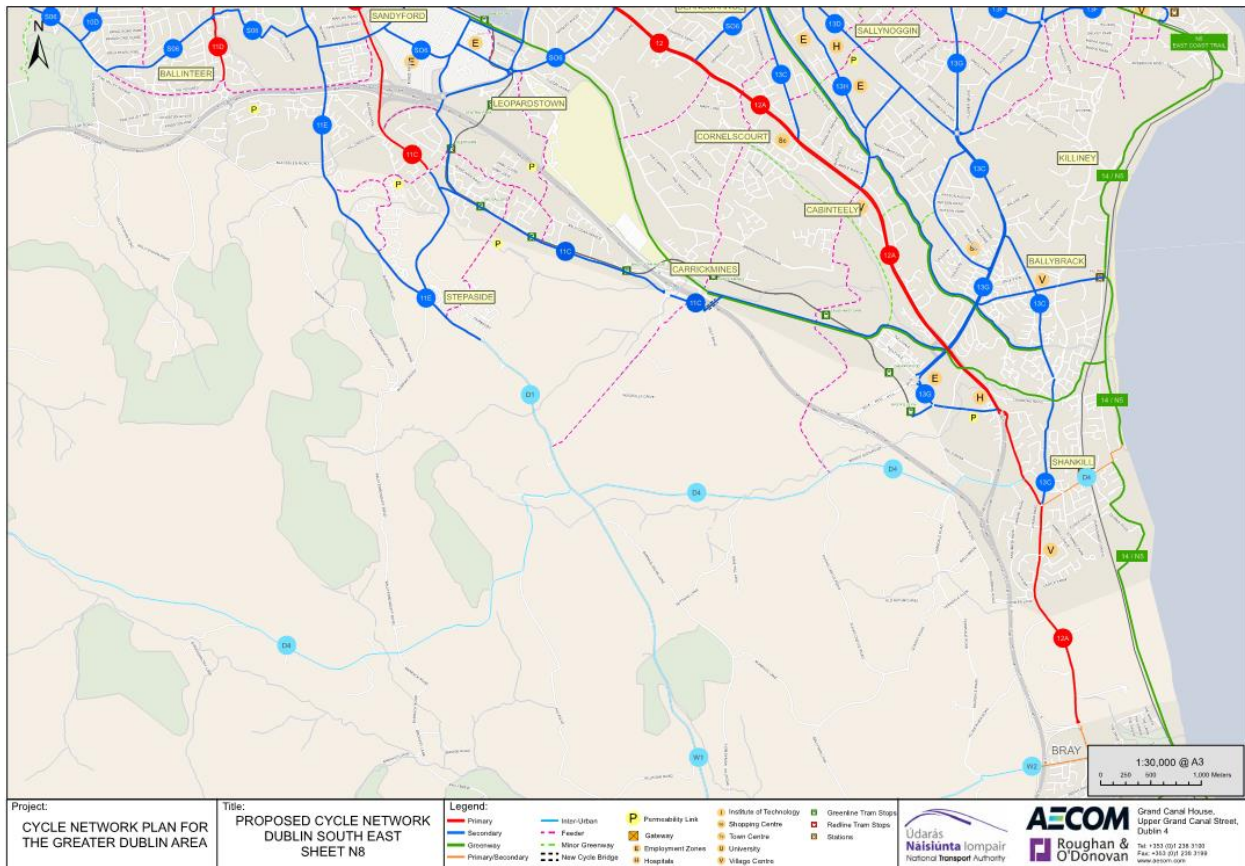

Figure 5 - Proposed upgrade to the Dublin Cycle Network (Ref Cycle Network Plan for Greater Dublin).

It is noted that there are existing bicycle lanes running either side along Dublin Road to the front of the development that facilitates the use of this sustainable form transport. There are also cycle tracks from the site connecting to tracks in Shanganagh Park and onwards to the proposed Woodbrook Dart Station.

2.3.2 Car Parking

Car parking serving the subject development is provided within the on-site car park. The total number of car park spaces proposed as part of the development is 365 no.

In accordance with the DDLRCC Development Plan Requirements provision will be made for:

- disabled car parking, 4% of all spaces provided
- 4 or more motorcycle parking spaces per 100 car spaces
- one car parking space for every 10 residential units shall be equipped with one fully functional and clearly marked EV charging point in accordance with the requirements of DLRCC Transportation Section and ESB. All car parking in public areas will be ducted to facilitate future EV charge points.
- cycle parking (see section 2.3.1)

When coupled with other proposals to enhance sustainable forms of development, such as promotion of cycling as an alternative transport mode, the proposed development car parking will deliver significant sustainability benefits by reducing existing levels of reliance on private car usage whilst encouraging the usage of more sustainable modes of transport, especially cycling and bus services to and from work.

There are not parking spaces allocated to each unit, in order to encourage the use of sustainable modes of transport and to promote a lifestyle where residents are not dependent on cars. It is proposed to provide 10 dedicated Go-Car spaces within the development at various convenient locations around the site. This is a car rental service where users rent cars by the hour from €9/hr. Insurance and fuel is included within the hourly rate. The service makes use of a mobile phone app where users can reserve a car in advance, with many different sizes of vehicles located all across the city.

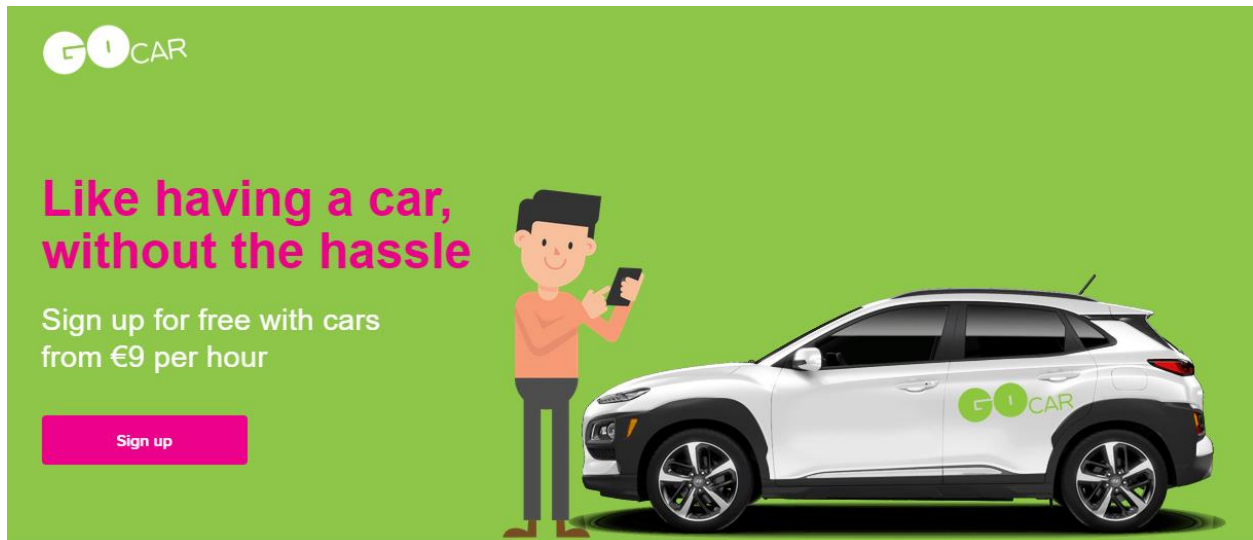

Figure 6: Go Car website

2.3.3 Pedestrians

The proposed development is located in the suburban area of Shankill, South Dublin. As the potential for pedestrian trips to and from the development is high, it is important that the development is properly integrated into the existing footpath network. There are footpaths already along both sides of the Dublin Road. Based on the 2016 National Travel Survey 25.5% of the trips of the nearby population (Dublin area) walk or cycle.

The development is approximately 850m (10-minute walk) from Shankill Main street which has many shops.

The development is bordered to the east and south by Shanganagh Park. Plans for the development seek to integrate them so residents can easily access the park for walking and recreational activities.

Shankill Beach is approximately 1.4km (17-minute walk) from the proposed development site, this links up to the north with Killiney Beach which is a popular location for both locals and tourists.

Heading south the development is approximately 2.8km (36-minute walk) from Bray Centre, this offers a large variety of shops, amenities, offices and leisure activities.

In addition to direct pedestrian routes from the development to/from surrounding areas, the pedestrian network also provides routes to/from surrounding public transport network, including the nearby Shankill DART station, Bray DART Station and the proposed Woodbrook DART Station, as well as the numerous bus routes on Dublin Road. Refer to section 2.3.4 below for further details regarding public transport network.

2.3.4 Public Transport

In order to facilitate the use of public transport consideration will be made to provide information on location of stops, routes, timetables, walking times to main public transport facilities, etc. (Based on the 2016 National Travel Survey) 14.5% of the trips taken by the nearby population (Dublin area) use public transport as a means to travel. Also to advise residents of the availability of the national Tax saver Scheme refer to Transport for Ireland web site (<https://www.transportforireland.ie/fares/taxsaver/>) for more details. High frequency public transport is available in the area of the development, as described below and shown in Figure 7.

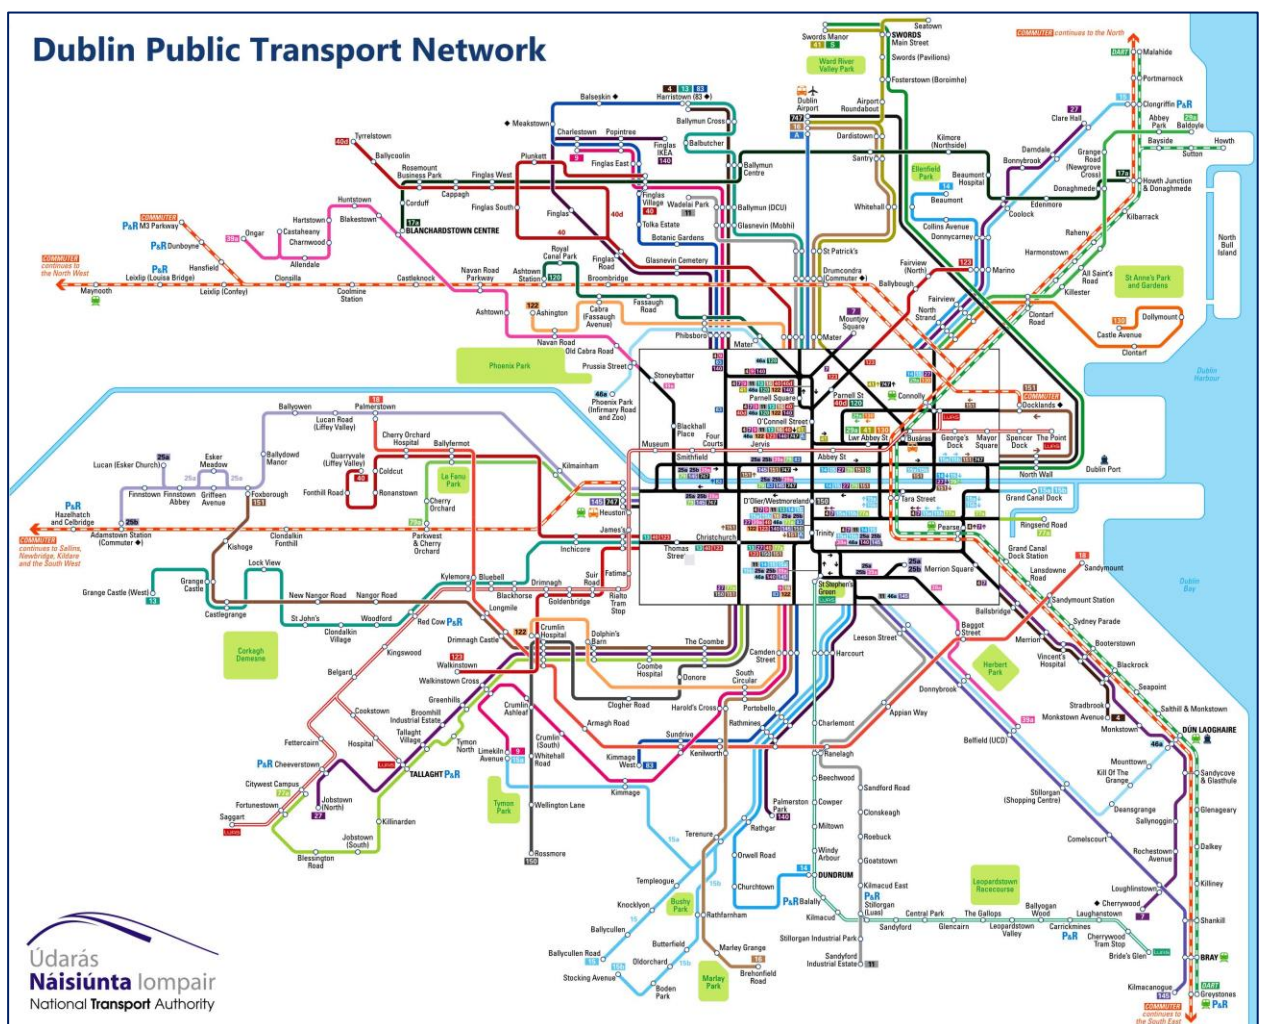

Figure 7: Dublin Public Transport Network
(Ref: National Transport Authority)

2.3.4.1 Train Services

The site is located 2.1 km from Shankill DART Station (26-minute walk). This will allow residents easy, quick and reliable transport into Dublin City Centre and also southbound to for example Greystones. The DART and Commuter train services provide access to regional transportation rail connections for travellers across Ireland. The 2016-2022 County Development Plan includes Specific Local Objective to provide the new Woodbrook DART station between Shankill and Bray. The Woodbrook station will provide a station within 1km walking distance of the proposed development. There are regular DART services between Shankill and Dublin and from there commuter services to surrounding areas, as follows:

- Dublin - Sligo
- Dublin - Rosslare Europort
- Dublin - Belfast,
- Bray - Dublin - Dundalk,
- Dublin - Maynooth/Longford/M3 Parkway

Please refer to Appendix A for DART and commuter train timetables.

The DART is a reliable and efficient service running from Malahide in the North to Bray in the South linking Dublin City centre and the suburbs.

Leap cards can be purchased which can reduce fares by 20-27% on the DART, Luas, Commuter and Bus services. Transport for Ireland also has a free Leap card phone application for download which allows you to top up your leap card and view previous journeys and fares.

2.3.4.2 Bus Services

The local area surrounding the development is served by existing public Dublin Bus and Air Coach services. The following Dublin Bus routes serve the bus stops on Dublin Road, located outside the entrance to the proposed development as shown in Figure 8 below:

Dublin Bus

- Route No. 45a
- Route No. 45b
- Route No. 84 - From Blackrock towards Newcastle
- Route No. 84a - From Blackrock towards Newcastle
- Route No. 145 - From Heustio Rail station to Ballywaltrim
- Route No. 155 - From Ikea (Ballymun) towards Bray Rail Station

Air Coach

- Route No. 702: Dublin Airport to Greystones/Bray
- Route No. 703: Dublin Airport to Killiney/Dalkey

There are other bus routes available at bus stops along Dublin Road in the vicinity of the site. The site is in a prime location to avail of the majority of bus services available nearby.

Please refer to Appendix B for Dublin Bus timetables.

Transport for Ireland provide a phone App and an useful website called ‘Journey Planner’ this can be used to easily plan routes to and from the development using bus routes and other forms of Transport. It is available as a free download and is highly recommended.

There are also Aircoach coach services serving the Dublin Road Bus Stop, specifically route no. 702 and route no. 703, providing connections to Dublin Airport, route 702 has a stop in Shankill Village.

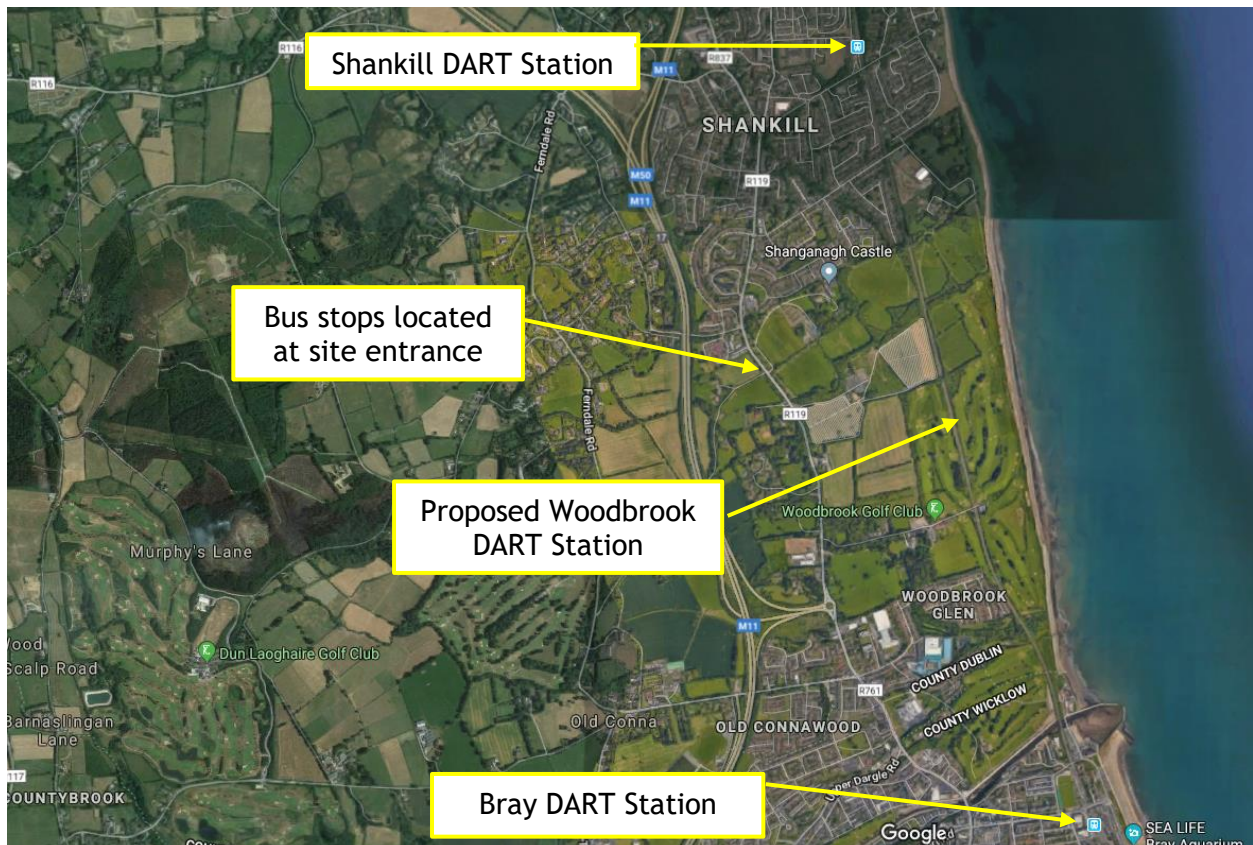

Figure 8-Adjacent Bus Stops to the Proposed Development
(ref. Google Maps)

The NTA is currently developing proposals to provide a Core Bus Corridor along Dublin Road from Bray to Dublin City Centre to further enhance bus travel.

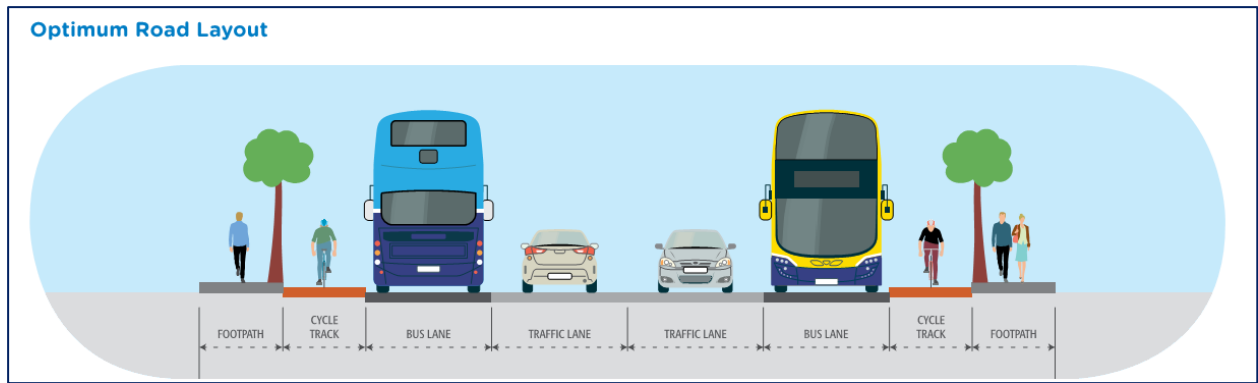

Figure 9: BusConnects Optimum Road Layout

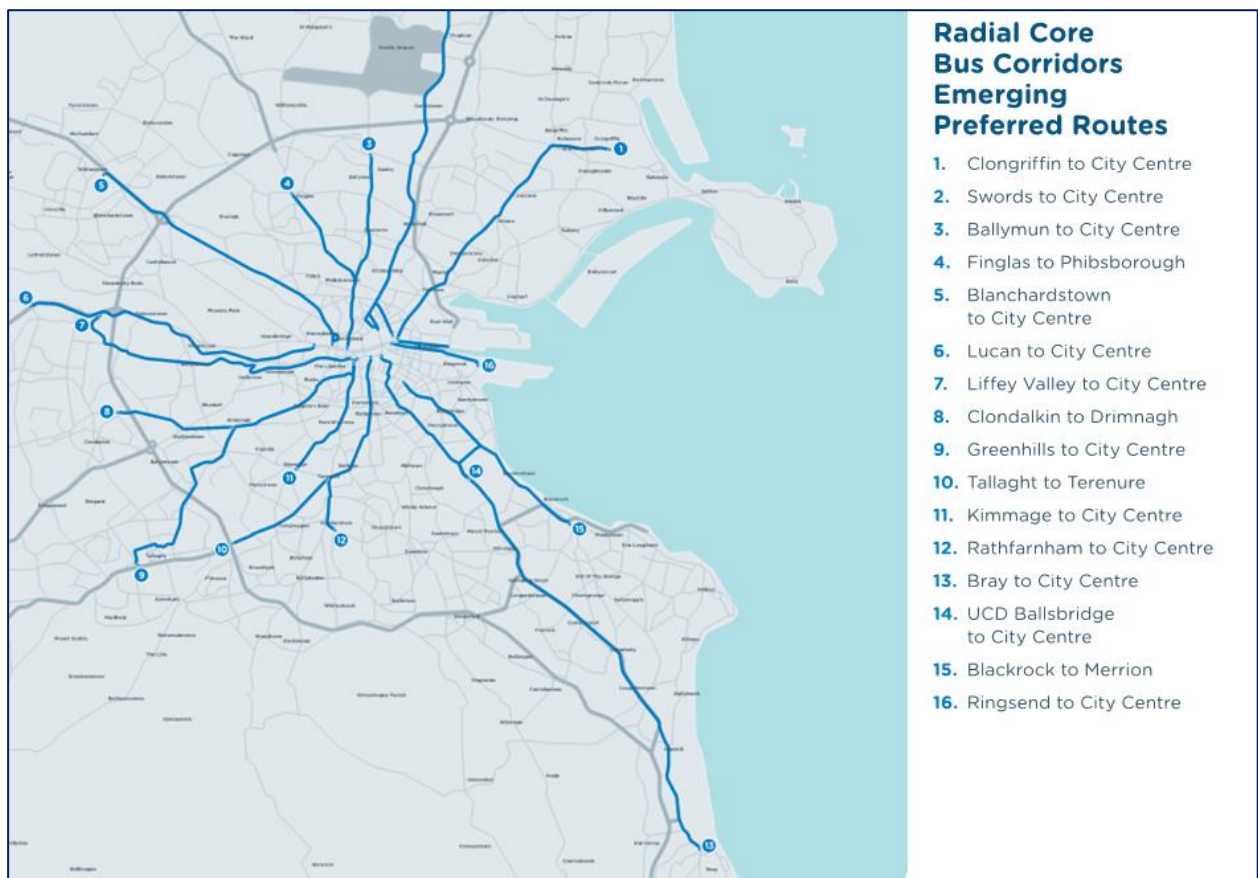

Figure 10: BusConnects Core Bus Corridors

2.3.4.3 Taxi Services

There is a constant flow of taxis along the Dublin Road collecting and depositing passengers. This will facilitate taxi use by providing a safe and convenient means of accessing this form of transport. The objective is to encourage lift sharing in taxis to help reduce the demand on parking and congestion at peak times.

3.0 Implementation / Consultation / Monitoring

The Travel Plan (TP) is a document that evolves over time and requires ongoing implementation, management and monitoring, and for successful implementation requires organisational support, an internal Mobility Manager and financial resourcing.

To implement the TP the following inputs are required:

- Senior Management support and commitment
- A Mobility Manager as the plan coordinator
- A Steering group to oversee the plan
- Working groups on various related issues

To ensure effective results from any initial sustainable travel investment it is imperative to obtain the agreement of all the stakeholders and obtain the support of external partners like the Local Authority, public transport operators, etc. Ideally the TP will be managed by a Mobility Manager or travel plan coordinator with the clear mandate to implement and evolve the plan. The Mobility Manager will also be best suited to monitor the results of the plan.

The TP will endeavour to influence the modal split from the outset of the completed development. Due to the location of the site and the alternatives transport modes available then the historic reliance on the car can be challenged. The issuance of welcome packs to the initial residents containing e.g. time tables of public transport and details of nearby facilities can be considered.

The document: *National Transport Authority Workplace Travel Plans - A Guide for Implementers* may be used as a reference. There is also an UK document: *Making Residential Travel Plans Work: Guidelines for new development* published by the UK Department of Transport 2005 which is relevant.

Residents travel surveys should be carried out in the early stages and annually to monitor the initial success of the travel plan and to gain a better understanding of the residents' travel habits. These survey results can also serve as a sustainable travel performance benchmark to indicate how the Travel Plan is performing in comparison to previous years and the sustainable travel targets initially outlined in the plan.
