

Greenleaf Homes Ltd. Development at Airton Road, Tallaght - M & E Incoming Utility Services

MECHANICAL SERVICES

Gas Supply

The development shall be supplied from the existing gas network that is adjacent the site.

The estimated total gas load for the development shall be in the region of 4MW.

Bord Gais have confirmed that the gas supply is available to serve the development.

ELECTRICAL SERVICES

Electrical Supply Intake

The development shall be supplied from the existing ESB electrical network that is adjacent the site.

The estimated total electrical load for the development shall be in the region of 1.5MW.

ESB have confirmed that the electricity supply is available to serve the development.

Two ESB Substations will be located on the site to provide power for the development.

Communications

The development shall be supplied from the existing telecoms network that is adjacent the site.

Eir & Virgin Media Networks have the capacity to supply fibre and standard copper wire telecom services to the development.

The telecom supplies shall be connected to an on site comms room which in turn will be used to service the individual apartments.
