INTRODUCTION & POLICY OVERVIEW

1.1 INTRODUCTION

This Housing Quality Assessment Report has been prepared in support of an application submitted on behalf of Boweck Ltd (the applicant) for a new Strategic Housing Development at Golf Lane, Glenamuck Road, Carrickmines, Dublin 18.

The proposed development comprises (482 no. residential units (all apartments), along with ancillary residential amenities, and provision of a childcare facility, gym, and local shop. The proposed development is set out in 7 no. blocks with heights ranging from four to twenty-two storeys.

The Applicant vision is for the project to be set within an attractive, vibrant environment that integrates successfully with its local Dublin Carrickmines setting. In addition to the provision of high-quality apartment accommodation, the brief was to provide exemplary tenant amenities to encourage an active and integrated community.

This report assesses the residential mix of apartments within the proposed development against the provisions of the Sustainable Urban Housing: Design Standards for New Apartments Guidelines for Planning Authorities (March 2018).

All units in this development had been cross check and all areas and requirements are and follow the New Apartments Guidelines for Planning Authorities (March 2018).

Following the Board's Opinion this document provides "A housing quality assessment which provides specific information regarding the proposed apartments and which demonstrates compliance with the various requirements of the 2018 Guidelines on Design Standards for New Apartments, including its specific planning policy requirements. This also includes a schedule of floor areas for all proposed units, clearly setting out the aspect (single, dual, triple) of each unit

In addition to the Boards opinion we have included in this document's apendix all floor plans including all units clearly setting out the aspect.

Policy Overview

The document sets out the statutory context for the proposed development and the basis on which the housing quality assessment is carried out.

"Sustainable Urban Housing: Design Standards For New Apartments" - Guidelines For Planning Authorities, (March 2018)

These guidelines update the Sustainable Urban Housing: Design Standards for New Apartments guidelines, published in 2015.

The purpose of the 2015 apartment guidance was to reiterate ministerial guidance, setting out standards for apartment development, mainly in response to circumstances that had arisen whereby some local authority standards were at odds with national guidance.

The new Guidelines build on the content of the 2015 apartment guidance, much of which remains valid, particularly with regard to design quality safeguards such as internal space standards for 1-,2- and 3-bedroom apartments, internal storage and amenity space.

These Guidelines update previous guidance in the context of greater evidence and knowledge of current and likely future housing demand in Ireland taking account of the Housing Agency National Statement on Housing Demand and Supply, the Government's action programme on housing and homelessness Rebuilding Ireland and Project Ireland 2040 and the National Planning Framework, published since the 2015 guidelines.

The Guidelines are supported by legislation which introduces new powers whereby the Minister may expressly state specific planning policy requirements (hereafter SPPRs) which must be applied by planning authorities, or An Bord Pleanála, in the exercise of their functions. Where SPPRs are stated in the Guidelines, the Minister intends that such requirements must take precedence over policies and objectives of development plans, local area plans or SDZ planning schemes.

The 2018 Guidelines specify planning policy requirements for:

- Internal space standards for different types of apartments, including studio apartments
- Dual aspect ratios
- Floor to ceiling height
- Apartments to stair/lift core ratios
- Storage spaces
- Amenity spaces including balconies/patios
- Room dimensions for certain rooms

Planning And Development (Amendment) Act 2015) - The Act provides for amendments to section 28, 34 and Part IX of the Planning and Development Act 2000, as amended.

View of Podium

DLRCC Apartment Standards Now Superseded By The Guidelines

DLRCC must have regard to the Guidelines and must comply with the SPPRs outlined in the Guidelines.

The County Development Plan includes an 'Advisory Note' acknowledging the new Guidelines (and associated legislation) and stating that these will take precedence over the Development Plan where SPPRs are concerned.

Based on a review of the Dun Laoghaire Rathdown County Development Plan 2016-2022, the list below is a summary of the main provision guidelines.

In summary, SPPRs supersede the following provisions of the current County Development Plan;

• Section 8.2.3.3 (ii) Dual Aspect

• Section 8.2.3.3 (v) Internal Storage

• Section 8.2.3.3 (vii) Minimum Apartment Floor Areas

• Section 8.2.8.4 (iv) Private Open Space for Apartment Development

02
OVERVIEW & COMPLIANCE

2.1 OVERVIEW OF COMPLIANCE

This Housing Quality Assessment provides an assessment of compliance with requirements under the 2018 Sustainable Urban Housing Guidelines (SUHG).

Qualitative aspects such as the Residential Conceptual Design approach are covered under the Architectural Design Statement.

The SUHG cover a variety of key topics, an overview of each is provided below to provide a summary to the data provided in the Assessment tables.

Unit Mix

As stated within the SPPR 8; “No restrictions on dwelling mix and all other requirements of these guidelines shall apply, unless specified otherwise”. The mix of units for the Cornelscourt Residential Development is outlined in the table below:

Total	Studio (10%)	1 Bed (35%)	2 Bed (45%)	3 Bed (9%)	Duplex (1%)
	6%	38%	48%	8%	6%
482	31	183	229	37	2

Apartment Floor Areas

The minimum apartment floor areas have all been met. In addition to this, 51% of the units exceed the minimum floor areas by at least 10%.

Aspect

With regard to the Guidelines in urban locations, the minimum number of dual aspect apartments that may be provided in any single apartment scheme shall be 50%. A total of 246 of the 482 units proposed have the benefit of dual aspect equating to 51% of the units. In some cases, units have the benefit of triple aspect. When considering apartments, the dual aspect ratio is 51% (246 of 482 apartment units), again an exceptional level of quality dual aspect units in accordance with national planning policy standards.

The height, scale, and massing of each building has been carefully designed to correspond with the orientation of the site. By leaving taller elements of the development to the Motorway, with low-level units to the south, daylight and sunlight are invited into the courtyards and public amenity spaces. The three taller elements have uninterrupted views to the Dublin Mountains and The Irish Sea. The form of the buildings creates sunlit courtyards and areas of public realm for occupants to enjoy.

In addition, each building has excellent daylight and vista opportunities. The design of the scheme has sought to maximise the quantity of Dual Aspect units.

Total Units	Single Aspect	Dual Aspect	L Aspect
	46%	51%	3%
482	222	246	14

Two unit types are identied as having a North facing aspect.

Unit Type 2F, though defined as North facing in accordance with the Apartment Guidelines, is generally of a North Westerly aspect. The unit meets the BRE requirements for daylighting as noted in the Daylighting Report by JAK. The units overlook the large central courtyard affording it good daylighting and a pleasant aspect. The two units are located within a four storey block adjoining Golf Lane. Their location is immediately adjacent to the Block D stairs allowing the apartment to be a walk up type unit where use of the lift is not required for general access. The units also benefit from close access to the communal roof terrace.

Unit Type 1Q, though defined as North facing in accordance with the Apatrment Guidelines, is generally of a North Westerly aspect. The unit meets the BRE requirements for daylighting as noted in the Daylighting Report by JAK. The unit location within the B1 tower ensures that the units at lower level benefit from views into the proposed public landscaped area adjoining the stream. The upper floors benefit from panoramic views towards Dublin City with views to foothills of The Dublin Mountains and glimpses of Dublin Bay. There are eighteen of this unit type in the scheme.

Total Units	South Aspect	East Aspect	West Aspect	North Aspect
	8%	19%	18%	4%
482	38	93	87	20

View of Central Garden from Cycling Route

Floor to Ceiling Height

Currently the guidelines promote higher floor to ceiling heights for ground floor apartments.

Within the development we are providing the minimum 2.7m floor to ceiling height for the ground floor apartments and where appropriate greater floor to ceiling heights in open plan living areas. Floor to ceiling heights for all floors above ground floor level achieve greater floor to ceiling heights than the minimum 2.4m.

Floor to ceiling heights are in accordance with the Building Regulations, and the absolute minimum provided is 2.4m, and typically only found in Bathrooms and occasionally Kitchens.

Lift and Stair Cores

As per the guidelines we have sought to maximise the number of apartments per floor per stair/lift core to assist in ensuring that service charges and maintenance costs faced by residents into the future are kept at reasonable levels.

Having liaised with fire safety engineers we are achieving typically 6 to 11 apartments per core , in all of these instances, the ratio of 13 units per core is not exceeded.

Internal Storage

The Apartments are designed to be practical, feel generous, and make the most of their views and orientation. The proposed scheme's typical apartment is an open plan with a central living space. From the compact cores, the apartments are configured to provide a generous entrance leading straight to living rooms to ensure a pleasant sequence of spaces on arrival home. Kitchens are generally part of the living space, and utilities cater to noisy appliances and clutter. The storage rooms are located close to the apartments' front door; the storage spaces are in accordance with the minimum provision requirements throughout the units.

Private Amenity Space

The minimum private amenity areas have all been met. In addition to this, the majority of the units exceed the minimum private amenity area requirements.

As per the guidelines private amenity space is provided to all units .

The balconies and winter gardens provide the required minimum depth of at least 1.5m and are deeper where possible. In most cases the balconies are accessed off the living space and where possible also include an access from a bedroom.

Security Considerations

The design of the blocks provides both external passive surveillance of the surrounding spaces and internally where the central courtyards are both secure and overlooked.

For the internal ground floor apartments a private buffer zone has been incorporated into the design and realised with the landscape architects along with the appropriate boundary treatments. This allows passive surveillance of the adjacent communal gardens and public walkways around each of the apartment buildings. Ground floor units externally have an additional landscaped buffer beyond the private amenity space to enhance the sense of privacy, further providing an additional element of separation and security to the ground floor units in that zone.

The entrance reception lobby located in Building BO and D contains a generous double height space. The concierge in this lobbies will provide services and added security for all residents. At points around the perimeter of the other blocks the entry points to all stair cores will be well indicated and highly visible.

Daylight / Sunlight And Shadow Analysis

All the residential buildings have been designed in accordance with the relevant guidelines in relation to Daylight and Sunlight. For full details please refer to the 'Daylight & Shadow Report' by JAK Consulting Engineers

03
COMMUNAL FACILITIES

3.1 COMMUNAL FACILITIES

Access & Services

The proposals are designed in accordance with Part M of the Building Regulations, including Universal Access requirements. Internally circulation corridors exceed the minimum width requirements, and are punctuated by various increases in depth to articulate the corridor spaces. Service ducts are accessible from common areas as far as practicable and within apartments service runs line up to avoid any cross over to adjacent units.

Facilities

A large emphasis is placed on current best practice for provision of communal facilities. A range of residential amenities (total 742 sq. m (total includes the central amenity space of 292 sq. m, ground floor amenity space of 62 sq. m, concierge amenity space of 83 sq.m , communal amenity terraces of 91 sq.m and event space of 83 sq.m on top floors over looking at the Wiclow Mountains), communal amenity spaces and private balconies and terraces create a high quality living environment. A concierge is located at the main pedestrian and vehicular entrance on BO, a secondary concierge area is located on tower D; providing services for the residents and passive surveillance for all the residents. A shared office space is located at the entrance to allow residents the opportunity to work from home.

Another 340 sq.m of residential amenities are located within the podium. This will include a gym and cafe. The amenity building is accessed from podium level allowing all the residents easy access to the central facilities. It's located centrally within the proposal, benefiting from a pleasant aspect with views into the Central Garden.

Communal Amenity Space

Communal Open space is provided as fully accessible and secure private courtyard gardens. The minimum area requirements are met and significantly exceeded in the Golf Lane Residential Development. The minimum requirement is approx. 4770 sqm and the provided open space area is approx 7108 sqm.

Refuse Storage

Dedicated refuse storage spaces are provided throughout the overall scheme, please refer to the Waste Management Plan by AWN Consulting or details of same.
