Your Ref: 271715-00

27th April 2021

Re: Notice of Planning Application to An Bord Pleanála in respect of Strategic Infrastructure Development (Arklow Bank Wind Park Phase 2 - Onshore Grid Infrastructure) by Sure Partners Limited (SPL) from the landfall of the offshore export circuits at Johnstown North, to a proposed new 220kV substation at Shelton Abbey and connection from the new substation to the National Electricity Transmission Network (NETN).

Dear Ms. Walsh,

I am writing to you in response to an email received on 22nd February 2021 from ARUP acting on the behalf of Sure Partners Limited as the developer of the above proposed wind farm development off the coast of Wicklow and associated onshore grid infrastructure.

The Health and Safety Authority, acting as the Central Competent Authority under the Chemicals Act (Control of Major Accident Hazards Involving Dangerous Substances) Regulations 2015 (S.I. 209 of 2015), gives technical advice in response to a notice sent by a planning authority under Part 11 of the Planning and Development Regulations 2001-2015.

Under Regulation 24(2) of S.I. 209 of 2015, the technical advice on the effects of a proposed development on the risk or consequences of a major accident relates to the following types of developments within the consultation distance for an establishment:

- (a) the siting and development of new establishments;
- (b) modifications to establishments of the type described in Regulation 12(1);
- (c) new developments including transport routes, locations of public use and residential areas in the vicinity of establishments, where the siting, modifications or developments may be the source of, or increase the risk or consequences of, a major accident.

The advice given is for the purposes of assessing new development only. A full explanation of the Authority's Land-use Planning advice system can be found at:

https://www.hsa.ie/eng/Your_Industry/Chemicals/Legislation_Enforcement/COMAH/Land_Use_Planning/

In relation to strategic infrastructure, technical advice must be provided to An Bord Pleanála on request - Article 215 of the Planning and Development Regulations 2001, as inserted by S.I. No. 685 of 2006, sets out procedures for the Board to request technical advice from the Authority in cases of Strategic Infrastructure Development.

Where it is known that the proposed development will carry a significant inventory of dangerous substances, or where proposed development is in the vicinity of an existing or permitted Seveso (COMAH) establishment, the Board requests that such details be submitted to the Authority at the pre-application consultation stage by the prospective applicant.

In this instance details have been received from ARUP acting on the behalf of the prospective applicant – Sure Partners Limited.

The Health and Safety Authority can confirm, from the details received, that the development *will not* constitute a new COMAH establishment, *but that it is in the vicinity of a notified establishment, Sigma Aldrich.*

If technical advice is requested by the Board, the Authority would assess whether the development could increase the likelihood of a major accident (or its consequences) at the COMAH establishment. Documentation submitted to the Board should address this point, in the context of our published guidance (see link above).

If the Board forms the view, on examining the formal application, that technical advice is required, it may formally request technical advice from the Authority.

If you have any queries please contact the undersigned.

Yours sincerely

Tara Horigan

Note on the Approach of the HSA to the Provision of Land-use Planning advice.

The Authority, acting as the Central Competent Authority under the Chemicals Act (Control of Major Accident Hazards Involving Dangerous Substances) Regulations 2015 (S.I. 209 of 2015), gives technical advice in response to a notice sent by a planning authority under Part 11 of the Planning and Development Regulations 2001-2015. Under Regulation 24(2) of S.I. 209 of 2015, the technical advice on the effects of a proposed development on the risk or consequences of a major accident relates to the following types of developments within the consultation distance for an establishment:

- (a) the siting and development of new establishments;
- (b) modifications to establishments of the type described in Regulation 12(1);
- (c) new developments including transport routes, locations of public use and residential areas in the vicinity of establishments, where the siting, modifications or developments may be the source of, or increase the risk or consequences of, a major accident.

The advice given is for the purposes of assessing new development only. A full explanation of the Authority's Land Use Planning advice system can be found at https://www.hsa.ie/eng/Your_Industry/Chemicals/Legislation_Enforcement/COMAH/Land_Use_Planning/

Your attention is drawn to Regulation 24(3) of S.I. 209 of 2015:

(3) The technical advice provided by the Central Competent Authority to a planning authority pursuant to paragraph (2) may be generic or case specific in nature and shall be so formulated that it will assist the planning authority to take into account the need, in the long term—

- (a) to maintain appropriate safety distances between establishments covered by these Regulations and residential areas, buildings and areas of public use, recreational areas, and, as far as possible, major transport routes;*
- (b) to protect areas of particular natural sensitivity or interest in the vicinity of establishments, where appropriate through appropriate safety distances or other relevant measures; and*
- (c) for the operator to take additional technical measures, in the case of existing establishments, in accordance with Regulation 7, so as not to increase the risks to human health and the environment.*

In giving its advice the Authority does not deal with routine emissions. Such emissions will be subject to EPA or Local Authority scrutiny and control.

The operator of an establishment covered by S.I. 209 of 2015 is also required to take all necessary measures to prevent major accidents occurring and to limit the consequences of any such major accidents for human health and the environment
