Graphic Representation of Tree Form, Balance and Protection Zone

Canopy Extent
Cardinal Radii
Stem Circumference
Root Protection Area (RPA)
Canopy is drawn to account for any natural asymmetry or imbalance. Crown Representation is scaled to account for north, east, west and south radii.
This area relates the "RPA" radius as defined in the Tree Survey Table and is measured from the tree centre. This area defines the primary Construction Exclusion Zone (CEZ) that must be protected by fencing from the potentially damaging effects of construction activity.
