Appendix A21.1: Record of Stages 1 and 2 of the CEA

1.1 Introduction

This appendix provides a record of the outcomes of Stage 1 and 2 of the CEA. At Stage 1 a preliminary long list of other projects was reviewed and distances from the Proposed Scheme mapped against zones of influence (Zol) for different topics used in the EIAR. Projects which fell within a Zol for topic were included as part of the long list for review at Stage 2. Some projects were kept on the long list for further consideration at Stage 2 even if they were outside of the Zol if the topic specialist felt there was a potential pathway to likely significant cumulative impacts with the scheme.

At Stage 2 topic specialists considered each project on the long list further in relation to whether there were likely significant effects for further consideration. If it was considered there could be likely significant cumulative impacts, the project was shortlisted for further information gathering (Stage 3) and assessment (Stage 4).

The assessments are provided in Appendix A21.2 of this EIAR.

Where relevant a reference to a sifting note is included to explain the decision as to whether or not a project was shortlisted. Sifting notes are included in Section 1.2.

Table 1: Stages 1 and 2 Shortlisting of Projects for CEA

| Project Details | | | | Stage 1 – Long list | | Stage 2 Outcome: Shortlisted for topic (Yes (Y) or No (N))? | | | | | | | | | | | | | | |
|------------------------------------|-----------------------------|--|--------------------------------------|--|----------------------|---|---------------------------------|---------------|-------------------|------------|--------------|--------------|-------|-------------------------------------|---------------------------------|------------------------|--------------------------------|-------------------------|-----------------|---|

| MP36 | DCC | Dublin SPAR. Proposed 1.6km Southern Part Access Route (SPAR) which includes an opening bridge across the Liffey east of the existing Tom Clarke Bridge (East-Link Toll Bridge), has been identified in the Dublin Port Masterplan ("3FM Project"). The SPAR will be a private road which will take HGV traffic destined to/from the port off the local public road network. It will also allow access for other HGV traffic such as to the Covanta Waste-to-Energy plant. The SPAR will include an active travel corridor open to the public. Construction is anticipated in 2026 | 3.50 | Biodiversity | n | | N | | N | N | N | See notes | N | N | N | N | N | | N | | |

1.2 Shortlisting notes

1. Individual local planning applications have not been specifically identified and assessed by the Biodiversity topic. Instead the cumulative impacts assessment has considered the general pattern of development pressure and how this contributes to habitat loss and fragmentation.
2. This project was not considered to have a likely significant cumulative impact on any relevant aspect of population health because of the scale and nature of the development and/or distance or degree of separation from Proposed Scheme.
3. This project was not considered to have a likely significant cumulative impact on relevant water receptors.
4. The Proposed Scheme is not predicted to have any likely significant residual impacts on land, soils, geology or hydrogeology and therefore there is no potential cumulative impact with this project.
5. The Proposed Scheme is not predicted to have any likely significant residual impacts on archaeology or cultural heritage and therefore there is no potential cumulative impact with this project.
6. This project was not considered to have a likely significant cumulative impact on architectural heritage.
7. Although this project is outside of the Human Health study area for the Proposed Scheme in isolation, it has the effect of extending the potential area of influence on the population within the Proposed Scheme study area by linking communities by a project of a similar nature. The cumulative impact of the projects in combination was therefore deemed relevant.
8. Strategic Housing Developments (SHDs) – SHDs have not been specifically identified by Biodiversity topic. They are relevant for Biodiversity cumulative impacts assessment if within same water catchment as Proposed Scheme, or within close proximity for in-combination disturbance on fauna and habitat loss. See Figure 21.1.
9. There are utility diversions proposed by the Proposed Scheme in that area, however they will be carried out in accordance with the utility provider requirements and therefore any overlap in diversion requirements will be managed to limit disruption. Potential for overlap in requirement for construction materials, however the Proposed Scheme material requirements are insignificant and therefore significant cumulative impacts are unlikely.
10. There was insufficient information available to provide an assessment of cumulative impacts on health.
