National Planning Framework vs National Development Plan Differences in National Strategic Objectives

Table 0.1: National Planning Framework vs National Development Plan Differences in National Strategic Objectives

NPF National Strategic Outcome (NSO)	Revised NDP NSO Explanatory Text	Consideration of Explanatory Text Changes between NPF and Revised NDP
<p>NSO1 Compact Growth</p> <p><i>‘Carefully managing the sustainable growth of compact cities, towns and villages will add value and create more attractive places in which people can live and work. All our urban settlements contain many potential development areas, centrally located and frequently publicly owned, that are suitable and capable of re-use to provide housing, jobs, amenities and services, but which need a streamlined and co-ordinated approach to their development, with investment in enabling infrastructure and supporting amenities, to realise their potential. Activating these strategic areas and achieving effective density and consolidation, rather than more sprawl of urban development, is a top priority.’</i></p>	<p>NSO1 Compact Growth</p> <p><i>‘Carefully managing the sustainable growth of compact cities, towns and villages will add value and create more attractive places in which people can live and work. All our urban settlements contain many potential development areas, centrally located and frequently publicly owned, that are suitable and capable of being developed to provide housing, jobs, amenities and community services, but which need a streamlined and co-ordinated approach to their development, with investment in enabling infrastructure and supporting amenities, to realise their potential. Activating these strategic areas and achieving effective density and consolidation, rather than more sprawl of urban development, is a top priority.’</i></p>	<p>The explanatory text in the revised NDP mostly mirrors that within the NPF. The only change is the insertion of the word ‘community’ when it refers to services that have the potential to be developed within urban settlement ‘potential development areas’.</p>
<p>NSO2 Enhanced Regional Accessibility</p> <p><i>‘A co-priority is to enhance accessibility between key urban centres of population and their regions. This means ensuring that all regions and urban areas in the country have a high degree of accessibility to Dublin, as well as to each other. Not every route has to look east and so accessibility and connectivity between places like Cork and Limerick, to give one example, and through the Atlantic Economic Corridor to Galway as well as access to the North-West is essential.’</i></p>	<p>NSO2 Enhanced Regional Accessibility</p> <p>The revised NDP does not fully replicate the explanatory text as set out under the NPF. However, it does comment (inter alia), as follows: <i>‘This National Strategic Outcome seeks to enhance intra-regional accessibility through improving transport links between key urban centres of population and their respective regions, as well as improving transport links between the regions themselves.’</i></p>	<p>The revised NDP maintains the objectives of NPF NSO2 and emphasizes improving transport links as a means to enhancing intra-regional accessibility.</p>
<p>NSO4 Sustainable Mobility</p> <p><i>‘In line with Ireland’s Climate Change mitigation plan, we need to progressively electrify our mobility systems moving away from polluting</i></p>	<p>NSO4: Sustainable Mobility</p> <p>The revised NDP does not fully replicate the explanatory text as set out under the NPF. However, it does comment (inter alia), as follows: <i>‘The National Planning</i></p>	<p>The revised NDP maintains the objectives of NPF NSO4 and includes added emphasis on active travel and public transport as a means to support Ireland’s transition to a ‘low-carbon society and enhance</p>

NPF National Strategic Outcome (NSO)	Revised NDP NSO Explanatory Text	Consideration of Explanatory Text Changes between NPF and Revised NDP
<p><i>and carbon intensive propulsion systems to new technologies such as electric vehicles and introduction of electric and hybrid traction systems for public transport fleets, such that by 2040 our cities and towns will enjoy a cleaner, quieter environment free of combustion engine driven transport systems.'</i></p>	<p><i>Framework (NPF) recognizes the importance of significant investment in sustainable mobility (active travel and public transport) networks if the NPF population growth targets are to be achieved. Investing in high-quality sustainable mobility will improve citizens' quality of life, support our transition to a low-carbon society and enhance our economic competitiveness.'</i></p>	<p><i>our economic competitiveness.'</i></p>
<p>NSO5 A Strong Economy supported by Enterprise, Innovation and Skills</p> <p><i>'This will depend on creating places that can foster enterprise and innovation and attract investment and talent. It can be achieved by building regional economic drivers and by supporting opportunities to diversify and strengthen the rural economy, to leverage the potential of places. Delivering this outcome will require the coordination of growth and place making with investment in world class infrastructure, including digital connectivity, and in skills and talent to support economic competitiveness and enterprise growth.'</i></p>	<p>NSO5 A Strong Economy supported by Enterprise, Innovation and Skills</p> <p>The revised NDP does not fully replicate the explanatory text as set out under the NPF. However, it does comment (inter alia), as follows: <i>'A competitive, innovative and resilient enterprise base is essential to provide high-quality jobs and employment opportunities for people to live and prosper in all regions. The next decade will see profound changes in our economy and society. While the impacts of Brexit and the Covid-19 pandemic will continue to challenge businesses in the first part of the decade, the digitization of entire sectors and the transition to a low-carbon economy will be even more transformative.'</i></p>	<p>The revised NDP maintains the objectives of NPF NSO5 and places added emphasis on providing high quality jobs and employment opportunities. In addition, it acknowledges the impacts of Brexit, Covid-19, digitization and the transition to a <i>'low carbon economy'</i>.</p>
<p>NSO6 High-Quality International Connectivity</p> <p><i>'This is crucial for overall international competitiveness and addressing opportunities and challenges from Brexit through investment in our ports and airports in line with sectoral priorities already defined through National Ports Policy and National Aviation Policy and signature projects such as the second runway for Dublin Airport and the Port of Cork - Ringaskiddy Redevelopment.'</i></p>	<p>NSO6 High-Quality International Connectivity</p> <p>The revised NDP does not fully replicate the explanatory text as set out under the NPF. However, it does comment (inter alia), as follows: <i>'As an island, continued investment in our port and airport connections to the UK, the EU and the rest of the world, is integral to underpinning international competitiveness. It is also central to responding to the challenges as well as the opportunities arising from Brexit.'</i> It also comments <i>'Plans for strengthening surface connectivity to ports and airports will continue to be prioritised.'</i></p>	<p>The revised NDP maintains the objectives of NPF NSO6 and includes in the explanatory text not only aims to improve international connections via airports and ports but also the need to enhance the <i>'surface connectivity'</i> to same.</p>
<p>NSO7 Enhanced Amenity and Heritage</p>	<p>NSO7 Enhanced Amenity and Heritage</p>	<p>The revised NDP maintains the objectives of NPF N07.</p>

NPF National Strategic Outcome (NSO)	Revised NDP NSO Explanatory Text	Consideration of Explanatory Text Changes between NPF and Revised NDP
<p><i>'This will ensure that our cities, towns and villages are attractive and can offer a good quality of life. It will require investment in well-designed public realm, which includes public spaces, parks and streets, as well as recreational infrastructure. It also includes amenities in rural areas, such as national and forest parks, activity-based tourism and trails such as greenways, blueways and peatways. This is linked to and must integrate with our built, cultural and natural heritage, which has intrinsic value in defining the character of urban and rural areas and adding to their attractiveness and sense of place.'</i></p>	<p>The revised NDP does not fully replicate the explanatory text as set out under the NPF. However, it does comment (inter alia), as follows: <i>'Investment in our heritage has the dual benefit of protecting our natural and historic built environment while improving health, wellbeing and providing a catalyst for the economy through the development of recreational activities and the expansion of tourism as appropriate within heritage sites. Keeping this national tourism product intact, enhanced, developed and promoted will help secure the long-term viability of sustainable tourism incomes and will need to be a priority going forward.'</i></p>	
<p>NSO8 Transition to a Low Carbon and Climate Resilient Society</p> <p><i>'The National Climate Policy Position establishes the national objective of achieving transition to a competitive, low carbon, climate-resilient and environmentally sustainable economy by 2050. This objective will shape investment choices over the coming decades in line with the National Mitigation Plan and the National Adaptation Framework. New energy systems and transmission grids will be necessary for a more distributed, renewables-focused energy generation system, harnessing both the considerable on-shore and off-shore potential from energy sources such as wind, wave and solar and connecting the richest sources of that energy to the major sources of demand.'</i></p>	<p>NSO8 Transition to a Climate-Neutral and Climate-Resilient Society</p> <p>The revised NDP does not fully replicate the explanatory text as set out under the NPF. However, it does comment (inter alia), as follows: <i>'The next 10 years are critical if we are to address the climate crisis and ensure a safe and bright future for the planet, and all of us on it. In Ireland we have significantly stepped up our climate ambition. The Climate Action and Low Carbon Development (Amendment) Act 2021 commits us to a 51% reduction in our overall greenhouse gas emissions by 2030, and to achieving net zero emissions no later than by 2050.'</i> <i>'The investment priorities included in this chapter must be delivered to meet the targets set out in the current and future Climate Action Plans, and to achieve our climate objectives. The investment priorities represent a decisive shift towards the achievement of a decarbonized society, demonstrating the Government's unequivocal commitment to securing a carbon neutral future.'</i></p>	<p>The revised NDP has changed the NPF wording for NSO8 and replaces 'low carbon' to 'climate neutral'. Climate neutral infers removing all greenhouse gases to zero which appears to be a greater government commitment than to aspire to a 'low carbon' society'. The revised NDP refers to the 'climate crisis' and the carbon reduction commitments made within the Climate Action and Low Carbon Development (Amendment) Act 2021. This new legislation places a greater sense of urgency and importance on addressing climate change.</p>
<p>NSO9 Sustainable Management of Water, Waste and other Environmental Resources</p>	<p>NSO9 Sustainable Management of Water and Other Environmental Resources</p>	<p>The revised NDP omits the word 'waste' from NSO9 but otherwise maintains the objectives of NPF NSO9. The need for a circular</p>

NPF National Strategic Outcome (NSO)	Revised NDP NSO Explanatory Text	Consideration of Explanatory Text Changes between NPF and Revised NDP
<p><i>'Ireland has abundant natural and environmental resources such as our water sources that are critical to our environmental and economic wellbeing into the future. Conserving and enhancing the quality of these resources will also become more important in a crowded and competitive world as well as our capacity to create beneficial uses from products previously considered as waste, creating circular economic benefits.'</i></p>	<p>The revised NDP does not fully replicate the explanatory text as set out under the NPF. However, it does comment (inter alia), as follows: <i>'In a Circular Economy, the inherent value of products, materials and our natural resources is maintained for as long as possible. Additionally, the NPF highlights the centrality of our sustainable water resources to the implementation of the NPF to underpin our environmental and economic wellbeing into the future which is against the backdrop of the significant deficits in water services capacity and quality reflecting historic underinvestment.'</i></p>	<p>economy is re-emphasised within the revised NDP.</p>
<p>NSO10 Access to Quality Childcare, Education and Health Services</p> <p><i>'Good access to a range of quality education and health services, relative to the scale of a region, city, town, neighbourhood or community is a defining characteristic of attractive, successful and competitive places. Compact, smart growth in urban areas and strong and stable rural communities will enable the enhanced and effective provision of a range of accessible services.'</i></p>	<p>NSO10 Access to Quality Childcare, Education and Health Services</p> <p>The revised NDP does not fully replicate the explanatory text as set out under the NPF. However, it does comment (inter alia), as follows: <i>'Access to quality primary education, health services and childcare, relative to the scale of a region, city, town, neighbourhood or community is a defining characteristic of attractive, successful and competitive places.'</i></p>	<p>The revised NDP maintains the objectives of NPF NS10.</p>
