Note: EPA licensed facilities typically report capacities in tonnes which is a unit of mass; the cut/fill balance figures included in Chapter 4 are based on cubic metres which is a unit of volume. S.I. No. 199/2008 - Waste Management (Landfill Levy) Regulations 2008 provides a conversion factor for inactive or inert waste such as subsoil / sands. Factor for converting Cubic metres to tonnes = multiply cubic meters by a factor of 1.5. **Key: Materials and Waste Categories: ASS: Anaerobic Stabilised Sludge; BD: Biodegradable; Bio: Biowaste; CDW: Construction and Demolition Waste; Comm: Commercial Waste; Haz: Hazardous Waste; HH: Household Waste; Ind: Industrial Waste; MSW: Municipal Solid Waste; Non-Haz: Non-Hazardous Waste; Non-Haz IBA: Non-Hazardous Incinerator Bottom Ash; Rec: Recyclable SS: Sewage Sludge; TMS: Treated Municipal Sludge.
