                              

 Queue's are measured in meters

Cannot be seen from camera

- Signifies queue stretches to a minimum length of x and beyond the view of the camera +
- Signifies queue stretches to the next significant junction #
- Indicates an estimated queue length due to obscured vision. *

Queue's are measured in meters

Cannot be seen from camera

- + Signifies queue stretches to a minimum length of x and beyond the view of the camera
- # Signifies queue stretches to the next significant junction
- * Indicates an estimated queue length due to obscured vision.

Total Rates:			0.593	225.178			0.631	239.629			1.224	464.807		

This section displays the trip rate results based on the selected set of surveys and the selected count type (shown just above the table). It is split by three main columns, representing arrivals trips, departures trips, and total trips (arrivals plus departures). Within each of these main columns are three sub-columns. These display the number of survey days where count data is included (per time period), the average value of the selected trip rate calculation parameter (per time period), and the trip rate result (per time period). Total trip rates (the sum of the column) are also displayed at the foot of the table.

To obtain a trip rate, the average (mean) trip rate parameter value (TRP) is first calculated for all selected survey days that have count data available for the stated time period. The average (mean) number of arrivals, departures or totals (whichever applies) is also calculated (COUNT) for all selected survey days that have count data available for the stated time period. Then, the average count is divided by the average trip rate parameter value, and multiplied by the stated calculation factor (shown just above the table and abbreviated here as FACT). So, the method is: COUNT/TRP*FACT. Trip rates are then rounded to 3 decimal places.

The survey data, graphs and all associated supporting information, contained within the TRICS Database are published by TRICS Consortium Limited ("the Company") and the Company claims copyright and database rights in this published work. The Company authorises those who possess a current TRICS licence to access the TRICS Database and copy the data contained within the TRICS Database for the licence holders' use only. #### Parameter summary

Trip rate parameter range selected:	21 - 725 (units: )
Survey date date range:	01/01/14 - 15/10/21
Number of weekdays (Monday-Friday):	46
Number of Saturdays:	0
Number of Sundays:	0
Surveys automatically removed from selection:	0
Surveys manually removed from selection:	0

This section displays a quick summary of some of the data filtering selections made by the TRICS® user. The trip rate calculation parameter range of all selected surveys is displayed first, followed by the range of minimum and maximum survey dates selected by the user. Then, the total number of selected weekdays and weekend days in the selected set of surveys are show. Finally, the number of survey days that have been manually removed from the selected set outside of the standard filtering procedure are displayed.

# SECTION 1: INTRODUCTION

# 1.1 Background

J.B. Barry & Partners Ltd. was commissioned by JOM Investments Unlimited Company to prepare a Traffic & Transport Assessment (TTA) for a proposed large-scale residential development at Swift Square, Northwood, Dublin 9.

In summary, the proposed development will consist of the following:

- Site clearance, including the removal of all structures on site part of existing surface car parking;
- Relocation of existing surface car parking spaces catering for Swift Square Office Park personnel to the new basement accessible via a new ramp off the local road from Northwood Avenue, and the new undercroft parking area with access at street level off the local road to the north of the site;
- Construction of 3 no. apartment blocks (1, 2 and 3) over a partially shared podium structure, with heights ranging from 4 to 9 storeys, comprising 192 no. apartment units (4 no. 1-bedroom units and 188 no. 2-bedroom units), ancillary residential uses and associated car and bicycle parking; and
- Provision of public and communal open spaces, public realm, boundary treatments, landscaping and lighting; refuse storage, associated drainage, attenuation and services; temporary car parking area, construction access, and basement access route and ramp; and all associated site development works.

A detailed description of the proposed development is provided in the Planning Report prepared by RPS and enclosed with the submission package.

# 1.2 Consultation and Scoping Study

Section 247 meetings were held on the 01st Sept 2022 and 24th June 2022 with Fingal County Council (FCC) to discuss the development including the study area and agree the traffic junctions under consideration for this TTA. To determine current traffic behaviour in the vicinity of the subject site, it was agreed with Fingal County Council that a vehicle turning movement survey would include seven junctions surrounding the proposed development:

- Site 1- Junction 1) Ballymun Road (R108) / St. Margaret's Road;
- Site 2- Junction 2) Ballymun Road (R108) / Northwood Avenue;
- Site 3- Junction 3) Northwood Avenue / Old Ballymun Road;
- Site 4- Junction 4) Northwood Avenue / Access Road to Gulliver's Retail Park;
- Site 5- Junction 5) Northwood Avenue / Northwood Road;
- Site 6- Junction 6) Santry Avenue / Northwood Road; and
- Site 7- Junction 7) Northwood Avenue / Swords Road (R138).

These junctions were selected as they are considered the junctions mostly likely to be affected by traffic associated with the proposed development. The location of these seven junctions have been illustrated in **Figure 9** below (Page 12).

### 1.3 Objectives

This report provides an assessment of the potential traffic impacts associated with the proposed development. In this regard, the assessment aims to:

C1Users/chuenlamk/Desktop/Temp/21204 - Swift Square/TTA/21204-JBB-00-2Z -RP-C-00001_TTA - Traffic and Transport Assessment-P08 docx

- Identify the existing environment in terms of traffic, existing transport infrastructure and emerging transport developments;
- Quantify the likely vehicle traffic flows to and from the development onto the surrounding road network;
- Identify and quantify the likely traffic impacts on the surrounding road network resulting from the development;
- Identify any potential impacts on vulnerable road users in the study area;
- Produce a car and bicycle parking strategy; and
- Identify suitable measures to mitigate traffic and transportation impacts, if any, associated directly with the development.

The assessment is based on the findings of site visits, traffic observations, on-site traffic counts, architectural plans, discussions with the Design Team and consultation with FCC.

## 1.4 Methodology

The methodology adopted for this report is summarised as follows:

- A site audit was undertaken to quantify existing road network issues and identify local infrastructure characteristics, in addition to establishing the level of accessibility to the Site in terms of walking, cycling and public transport;
- Reference was made to site layout drawings;
- Existing and proposed access arrangements for the proposed development onto Northwood Avenue were considered;
- Historical traffic surveys were obtained (from Tuesday, 12th February 2019), at the junctions most likely to be impacted by the proposed development;
- A trip generation exercise has been carried out to establish the potential level of vehicle trips generated by the proposed development;
- In accordance with the Traffic and Transport Assessment Guidelines (2014), the specific level of influence generated by the proposed development upon the surrounding local road network was ascertained and the junctions which required assessment in greater detail were identified; and
- The junctions considered most likely to be impacted upon by traffic movements associated with the development were assessed in terms of capacity.

In preparing this assessment, reference has been made to the following documents:

- Traffic and Transport Assessment Guidelines (2014) as published by the former National Roads Authority (NRA) now Transport Infrastructure Ireland (TII);
- Traffic Management Guidelines (2019) as published by the Department of Transport, Tourism and Sport;
- TII PE-PAG-02017 Project Appraisal Guidelines for National Roads Unit 5.3 Travel Demand Projections (2021) as published by the former NRA now TII;
- Design Manual for Urban Roads and Streets (DMURS) (2013 and updated in 2022) as published by the Department of Transport;
- Fingal Development Plan 2017-2023 and Fingal Development Plan 2023-2029 as published by the Fingal County Council;
- Design Standards for New Apartments, Guidelines for Planning Authorities (2015 and updated in 2020) as published by the Department of Housing, Local Government and Heritage;
- Guidelines on the information to be contained in Environmental Impact Assessment Reports (2022) as published by the Environmental Protection Agency (EPA);

- Sustainable Mobility Policy Action Plan 2022 2025 as published by the Department of Transport;
- Greater Dublin Area (GDA) Transport Strategy 2022 2042 as published by the National Transport Authority (NTA);
- Greater Dublin Area Cycle Network Plan (2013) as published by the NTA; and
- Sustainable Urban Housing: Design Standards for New Apartments (2020) as published by the Department of Housing, Local Government and Heritage.

# SECTION 2: RECEIVING ENVIRONMENT

# 2.1 Site Location

The proposed development site is located in the Northwood area, in Dublin 9. Figure 1 and Figure 2 below illustrates the location and setting of the proposed development.

Figure 1: Location of the Proposed Development (indicative subject Site outline in red) (Source: Google Maps, annotation by J.B. Barry & Partners)

Figure 2: Location and Setting of the Proposed Development within the Northwood Area (indicative subject Site outline in red) (Source: Google Maps, annotation by J.B. Barry & Partners)

# 2.2 Land Use & Local Road Network

The existing Site is currently used as surface car parking area associated with the Swift Square Park Office buildings and temporary parking facilitating construction workers at Blackwood Square Strategy Housing Development (SHD) (ABP-306075-19) to the west of the subject Site. Vehicular access is currently connected to a sideroad Cedarview and vehicles can travel to Northwood Avenue from the existing carpark via Cedarview and the local access road to the west of the Site. The Site is bounded by Swift Square Office Park development to the south, Cedarview residential development to the north, local access road and Gulliver's Retail Park to the west, and the Whitehaven SHD to the south-east.

The land uses surrounding the development site are a mix of commercial, healthcare and residential (comprising both individual dwellings and larger residential apartment blocks), all of which benefit from access to / from Northwood Avenue.

The Site is zoned "ME-Metro Economic Corridor" within the Fingal Development Plan 2023-2029 with an objective description:

"Facilitate opportunities for high-density mixed-use employment generating activity and commercial development, and support the provision of an appropriate quantum of residential development within the Metro Economic Corridor"

The Zoning objective vision states;

"Provide for an area of compact, high intensity/density, employment generating activity with associated commercial and residential development which focuses on the Metro within a setting of exemplary urban design, public realm streets and places, which are permeable, secure and within a high-quality green landscape. Landmark buildings will provide strong quality architectural features, which respect and enhance the character of the area into which they sit. The designated areas will form sustainable districts which possess a high degree of connectivity and accessibility and will be developed in a phased manner subject to the necessary provision of social and physical infrastructure."

### 2.3 Sustainable Transport

An audit of the existing and proposed facilities and nearby transport was undertaken for the development site in the course of developing this Traffic and Transport Assessment. The proposed development is located approximately 600 metres to the south of M50, allowing easy access to and from the area by car from outer areas. The Site of the proposed development is located close to a number of bus routes and a number of emerging transport developments. The audit considered the quality and availability of the existing facilities and public transport services. The audit found that the subject Site and surrounding lands are currently very well serviced by public transport.

The existing public transport facilities and emerging transport developments in the area surrounding the Northwood area are detailed following.

#### Pedestrian and Cycle Infrastructure

As a modern development, the pedestrian and cycle facilities within the Northwood area are of a good quality. All pedestrian routes leading to / from the development benefit from the provision of street lighting in addition to good quality pedestrian footways. There are numerous pedestrians crossing facilities available along Northwood Avenue just south of the development. Additionally, off road cycle tracks are provided throughout the Northwood area and on the external road network. Ballymun Road has an off-road cycle track while Swords Road has an On-Road cycle track. **Figure 3** below illustrates the existing cycle network in the area and **Figure 4** illustrates the proposed improvements from the NTA's "Greater Dublin Area Cycle Network Plan (2013)". The off-road cycle lane along Northwood Avenue branches out at numerous locations
