Sub-Category 2Mainly cumulative landscape values such as woods, groups,
avenues, lines.Sub-Category 3Mainly cultural values such as conservation, commemorative or
historical links.

Table 1 – Tree Data Table

No.	Species	Age	Con	Ht	CH	Ν	E	S	W	Stm	Dia	RPA	Structural Condition	PMR	Yrs	Cat
TGA	Tree Group A Himalayan Birch <i>(Betula utilis)</i>	S	G/F	4.50-5.00	1.80	0.50	0.50	0.50	0.50	1	0.60	0.76	A Group of 9, recently planted Himalayan Birch. Tree is located within circa 1 m wide roadside landscape reserve. Majority of trees appear to be in good overall condition however small stature would allow for ready replacement with new stock.		L	C2
TGB	Tree Group B Hornbeam (Carpinus betulus)	S	G/F	4.00	1.75	0.35	0.35	0.35	0.35	1	70	0.84	A group of 9 young Hornbeam's recently planted in conjunction with existing site context. Trees appear to be maintaining good general vigour and vitality however, small stature would allow for ready replacement.		L	C2
TGC	Tree Group C Oak (Quercus robur)	S	G/F	5.00	1.75	1.25	1.25	1.25	1.25	1	153	1.83	A group of 3 trees planted in conjunction with existing landscape. All trees remain vigorous however westernmost tree has suffered basal damage and is conflicting with the existing pavement. Small stature would allow for ready replacement.		L	C2
TGD	Tree Group D Horse Chestnut (Aesculus hippocastanum)	S	F	4.50	2.00	1.50	1.50	1.50	1.50	1	153	1.83	3 young and vigorous but small stature trees. Western and northern-most trees have suffered substantial basal damage. Small stature allows for ready replacement.		L	C2

No.	Species	Age	Con	Ht	СН	N	E	S	W	Stm	Dia	RPA	Structural Condition	PMR	Yrs	Cat
TGE	Tree Group E Lime <i>(Tilia europea)</i>	S	G/F	5.00	2.00	2.25	2.25	2.25	2.25	1	172	2.06	Young and vigorous, comprising typical element of existing landscape. Small stature allows for ready replacement.	r	L	C2
TGF	Tree Group F Hornbeam <i>(Carpinus betulus)</i>	S	G/F	3.50-500	3.00	1.00	1.00	1.00	1.00	1	127	1.53	An element of formal planting where trees arise from within hedging or shrub planting. Whilst there is significant variation in tree size and potentially tree vigour, a clear majority of trees appear to be in good general condition. Notwithstanding the above, small stature would allow for ready replacement.		L	C2
TGG	Tree Group G Beech Hedge (Fagus sylvatica)	S	G/F	2.00	0.00	N/A	N/A	N/A	N/A	1	95	1.15	Four sections of Beech hedging planted in conjunction with raised planters. Trees have been formally proved to create prismatic effect. Small stature would allow for replacement.	,	L	C2
TGH	Tree Group H Hornbeam <i>(Carpinus betulus)</i>	S	F	3.50-500	3.00	1.00	1.00	1.00	1.00	1	127	1.53	Young trees planted within contex of raised planters. Growth potential for species in conjunction with Richard planter form raises some concern with regard to potential sustainability. Small stature would allow for ready replacement.	t	L	C2
1	Oak (Quercus robur)	S/M	G	6.00	2.00	2.50	2.50	2.00	2.50	1	197	2.37	Young and vigorous, planted above car parking entrance structure. Original tiedown hardware is causing strangulation	Remove hardware from lower stem.	L	C2

No.	Species	Age	Con	Ht	СН	Ν	Е	S	W	Stm	Dia	RPA	Structural Condition	PMR	Yrs	Cat
2	Oak (Quercus robur)	S/M	G	5.50	2.00	1.75	1.50	2.00	1.50	1	181	2.18	Slightly misshapen. Supports minor twiggy deadwood suggesting less vigorous status than tree A. Tiedown hardware including cables have caused strangulation and stem cutting near ground level	Remove hardware from lower stem.	L	C2
3	Oak (Quercus robur)	S/M	G	5.50	2.00	2.25	2.50	2.25	1.25	1	210	2.52	Young and vigorous though misshapen and typically unbalanced to east. Vigour is good. Original tiedown hardware is causing strangulation near stem base.	Remove hardware from lower stem.	L	C2
10	Hawthorn (Crataegus monogyna)	М	G/F	4.50	0.00	2.25	2.25	2.25	2.25	1	229	2.75	A broadly young and still vigorous specimen encroached upon at lower levels by extensive Bramble thicket.		L	B2
11	Elder (Sambucus nigra)	E/M	F/P	3.00	0.00	2.00	2.00	2.00	2.00	m/s	175	2.10	Comprising a dominating element of natural thicket redevelopment. Would not typically be regarded as suitable for retention as part of a Development.	Consider early removal.	N/A	U
GW1	Goat Willow <i>(Salix caprea)</i>	S/M	F	5.00	0.50	2.00	2.00	2.00	2.00	m/s	175	2.10	Comprises a natural element of scrub redevelopment.		М	C2
GW2	Goat Willow <i>(Salix caprea)</i>	S/M	F	3.50	0.00	2.00	2.00	2.00	2.00	m/s	143	1.72	Comprises a natural element of scrub redevelopment.		М	C2

No.	Species	Age	Con	Ht	CH	Ν	E	S	W	Stm	Dia	RPA	Structural Condition PMR	Yrs	Cat
WG1	Common Alder (Alnus glutinosa) Red Alder (Alnus rubra) Oak (Quercus robur) Ash (Fraxinus excelsior) Norway Maple (Acer platanoides) Hawthorn (Crataegus monogyna) Wild Cherry (Prunus avium)	S/M	G/F- P	3.50-17.00	0.00-2.00								A small remnant of what appears to have been a larger but recently planted population. Trees narrow arise from heavily disturbed and contaminated ground. Some specimens are dyed others have suffered direct mechanical damage. Tree population constitutes an insignificant proportion of the broader adjoining park population. The loss of these trees will constitute no significant visual loss and many are considered likely to be lost to existing degrees of damage and disturbance. Remove and replace in line with finalised and completed landscape works.	S	C2
WG2	Hazel (Corylus avellana) Hawthorn (Crataegus monogyna) Ash (Fraxinus excelsior) Silver Birch (Betula pendula) Oak (Quercus robur) Hybrid Black Poplar (Populus x Canadensis) Wild Cherry (Prunus avium)	S/M	G/F	4.50-10.00	0.00-2.00								A significant and densely planted corridor of trees. Clear majority of specimens are of good overall condition however, continued growth and coalescence of canopies will result in suppression. Population thinning is advised.	L	B2

Queue's are measured in meters

Cannot be seen from camera

- + Signifies queue stretches to a minimum length of x and beyond the view of the camera
- # Signifies queue stretches to the next significant junction
- * Indicates an estimated queue length due to obscured vision.

Queue's are measured in meters

Cannot be seen from camera

- + Signifies queue stretches to a minimum length of x and beyond the view of the camera
- # Signifies queue stretches to the next significant junction
- * Indicates an estimated queue length due to obscured vision.

#### Queue's are measured in meters

Cannot be seen from camera

- + Signifies queue stretches to a minimum length of x and beyond the view of the camera
- # Signifies queue stretches to the next significant junction
- * Indicates an estimated queue length due to obscured vision.

Queue's are measured in meters

Cannot be seen from camera

- + Signifies queue stretches to a minimum length of x and beyond the view of the camera
- # Signifies queue stretches to the next significant junction
- * Indicates an estimated queue length due to obscured vision.

Queue's are measured in meters

Cannot be seen from camera

- + Signifies queue stretches to a minimum length of x and beyond the view of the camera
- # Signifies queue stretches to the next significant junction
- * Indicates an estimated queue length due to obscured vision.

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 0 0 0
