## APPENDIX 11.2

General Geotechnical Site Photos

Probe location 001 (view east) – at Turbine T11

Probe location 004 (view east) – at Turbine T10

Probe location 006 (view south) – recently burnt vegetation exposing conglomerate boulders

Probe location 007 (view west) – at Turbine T08

Probe location 009 (view north) – proposed Colligan River crossing (east side)

Probe location 010 (view south) – proposed Colligan River crossing (west side)

Probe location 012 (view north) – conglomerate outcrop/large boulder.

Probe location 014 (view south) – at Turbine T12

Probe location 017 (view east) – boulders exposed. Possible shallow bedrock.

Probe location 018 (view north) – boulders exposed. Possible shallow bedrock.

Probe location 019 (view north) – at Turbine T07

Probe location 023 (view south) – at Turbine T06

Probe location 027 (view east) – conglomerate outcrops

Probe location 029 (view east) – at Turbine T02 and view of existing met mast

Probe location 036 (view north)

Probe location 038 (view north) – recently burnt vegetation exposing boulders

Probe location 039 (view west) – Till exposed at ground level at this location

Probe location 042 (view south) – recently burnt vegetation

Probe location 044 (view south) – recently burnt vegetation

Probe location 045 (view east) – at Turbine T01 (recently burnt vegetation)

Probe location 049 (view east)

Probe location 050 (view south) – at Turbine T04

Probe location 051 (view south)

Probe location 052 (view west-southwest)

Probe location 053 (view west)

Probe location 054 (view north) – at Turbine T05

Probe location 056 (view east) – at substation

Probe location 057 (view south) – at substation

Probe location 058 (view east) – at substation

Point of interest location Ph001 (view south-southeast) – 100mm blanket peat over till

Point of interest location Ph002 (view east) – bedrock exposed in stream bed

Point of interest location Ph003 (view west) – cut exposing 100mm blanket bog over till

Point of interest location Ph004 (view north-northeast) – ditch exposing 100mm blanket bog over till

Point of interest location Ph005 (view south) – massive to thickly bedded conglomerate outcrop

Point of interest location Ph006 (view east) – thickly bedded conglomerate outcrop

Point of interest location Ph007 (view northwest) – ephemeral valley feature

Point of interest location Ph008 (view east) - conglomerate boulder

Point of interest location Ph009 (view east-northeast) – sandstone boulder field

Point of interest location Ph010 (view northwest) – massive to thickly bedded conglomerate outcrop

Point of interest location Ph011 (view north) – stream exposing Till with no indication of Alluvium

Point of interest location Ph012 (view west) – stream exposing Till with no indication of Alluvium

Point of interest location Ph013 (view south-southwest) – likely ephemeral valley feature

Point of interest location Ph014 (view east) - shallow till under organic topsoil.

Point of interest location Ph015 (view south) – Colligan River Crossing. Till exposed in river bed

Point of interest location Ph016 (view west) – shallow Till exposed in stream bed

Point of interest location Ph017 (view east) - Possible outcrop or large boulder of conglomerate

Point of interest location Ph018 (view south-southeast) – large conglomerate boulders on slope

Point of interest location Ph019 (view northeast) – outcrop of thick to massively bedded purple conglomerate

Representative section through peaty topsoil (100mm) and coarse-grained till

Table 1: List of Photo Locations
