

ZTV indicating the cumulative theoretical visibility of the proposed Coumragappul Wind Farm in combination with all other wind farms in the study area

Proposed Turbines

Existing Turbines

Permitted Turbines

In-Planning Turbines

Wind Farm Visibility

31.9% Visibility of existing, permitted or In-Planning turbines only

28.3% Visibility of proposed turbines as well as existing, permitted or In-Planning turbines

4.8% Visibility of proposed turbines only

35% of the entire study area to 20km will not have any view of the turbine blades of the proposed Wind Farm or that of any existing, permitted or In-Planning wind farms

20km Extent

This ZTV map has been calculated such that a turbine registers as been theoretically visible to observers in the surrounding landscape once there is an unobstructed line of sight to its blade tip.

Observer Height assumed: 2m to eye-level height
Blade Tip Heights: Variable

Note: This ZTV map is calculated for landform screening only and does not take account of the significant screening effects of vegetation (hedgerows, trees) and buildings inherent across the study area.

Scale: 1 : 80,000 if printed @ A1 size
