Memorandum Request for Comments from the EPA

ABP-319281-24

To: Processing
Re: Request for comments from the EPA
Date: 11th June 2025

The proposed development comprises the construction building to house a hot dip metal galvanising plant and all associated site works at Mell, Drogheda, Co. Louth. The proposed development would require an Industrial Emissions (IE) Licence under the EPA Act, 1992 as amended.

Please issue a letter inviting the EPA to make a submission or observation in writing to the Board within a period of 4 weeks. I have no specific requests in relation to the information requested.

Elaine Power
Senior Planning Inspector
