1 Plates

Plate 1 Proposed location of Turbine 1, associated crane hardstanding, assembly area and turning head as shown in Figure 14-1

Plate 2 Proposed location of Turbine 2, associated crane hardstanding, assembly area and turning head as shown in Figure 14-1

Plate 3 Proposed location of Turbine 3, associated crane hardstanding, assembly area and turning head as shown in Figure 14-1

Plate 4 Proposed location of Turbine 4, associated crane hardstanding, assembly area and turning head as shown in Figure 14-1

Plate 2 Proposed location of Turbine 5, associated crane hardstanding, assembly area and turning head as shown in Figure 14-1

Plate 3 Proposed location of Turbine 6, associated crane hardstanding, assembly area and turning head as shown in Figure 14-1

Plate 4 Proposed location of Turbine 7, associated crane hardstanding, assembly area and turning head as shown in Figure 14-1

Plate 5 Proposed location of Turbine 8, associated crane hardstanding, assembly area and turning head as shown in Figure 14-1

Plate 6 Proposed location of Turbine 10, associated crane hardstanding, assembly area and turning head as shown in Figure 14-1

Plate 7 Proposed location of Turbine 13, associated crane hardstanding, assembly area and turning head as shown in Figure 14-1

Plate 8 Proposed location of Turbine 14, assembly area and associated crane hardstanding as shown in Figure 14-1

Plate 9 Proposed location of Turbine 15, associated crane hardstanding, assembly area and turning head as shown in Figure 14-1

Plate 10 Proposed location of Turbine 16, associated crane hardstanding, assembly area and turning head as shown in Figure 14-1

Plate 11 Proposed location of Turbine 17, associated crane hardstanding, assembly area and turning head as shown in Figure 14-1

Plate 12 Proposed delivery access route on existing forest road as shown in Figure 14-1

Plate 13 View of CH075 (KE076-086----;) located to the west of delivery access route as shown in Figure 14-1

Plate 14 CH080 along CH079 - the Remains of dry stone structure at river crossing along the original route of the N22 as shown in Figure 14-1

Plate 15 Location of a field system with a single ruinous vernacular structure (CH078) marked on the First Edition Ordnance Survey Sheet. The vernacular structure will not be directly impacted as shown in Figure 14-1

Plate 16 View of part of the on-road section of the grid cable connection route in the townland of Cummeennabuddoge as shown in Figure 14-1

Plate 17 CH081 - A possible hut site located 120 m to the south of the proposed off-road grid cable connection route as shown in Figure 14-1

Plate 18 Compound 1 proposed location as shown in Figure 14-1

Plate 19 Compound 2 Proposed site location as shown in Figure 14-1

Plate 20 Compound 3 Proposed site location as shown in Figure 14-1

Plate 21 view of location of proposed substation adjacent to existing forestry road as shown in Figure 14-1

Plate 25 Figure 1 View from 'The Paps' trailhead in the Paps Archaeological Landscape facing east toward Proposed Development Site as shown in Figure 14-1

Plate 26 Figure 1 View to the Proposed Development boundary from within the Paps Archaeological Landscape facing south toward Proposed Development Site as shown in Figure 14-1

Plate 27 View from Proposed Development Site to the northeast towards adjacent Curragh/Coomacheo Windfarm as shown in Figure 14-1
