Observation on case reference VA20.321238

- Energia plan to install joint bays within roadside verges. On the map joint bays are shown in blue and are located every 600/700 metres along the road. However, the local roads are not wide enough to accomodate the joint bays. Width of roads can be as narrow as 3.0 metres. Joint bays are approx. 4.0 metres wide. How are these joint bays going to be accommodated?
- We are requesting an oral hearing in this case.
