Contents

1.0 Introduction

- 1.1 IPC Licence Register No.
- 1.2 Name and Location of Site
- 1.3 Brief Description of Activities
- 1.4 Environmental Management of the Company
- 1.5 Environmental Policy Statement

2.0 Summary Information

2.1 Emissions to Water Summary

- 2.1.1 Silt Pond Emissions
- 2.1.2 Yard Discharges
- 2.1.3 Composite Sampler Report
- 2.1.4 Non - Compliances

2.2 Emissions to Air

- 2.2.1 Dust Monitoring
- 2.2.2 Non – Compliance's

2.3 Waste Arising

- 2.3.1 Non - Hazardous Waste
- 2.3.2 Hazardous Waste

2.4 Energy and Water Consumption

- 2.4.1 Energy Consumption
- 2.4.2 Water Consumption (if any)

2.5 Environmental Incidents and Complaints

2.5.1 Incidents

2.5.2 Complaints

3.0 Management of the Activity

3.1 Environmental Management Programme Report

3.2 Environmental Management Programme Proposal

3.2 Environmental Expenditure

4.0 Licence Specific Reports

4.1 Surface Water Discharge Monitoring Location Programme Review

4.2 Bunding Programme

4.3 Boiler Combustion Efficiency

4.4 Resource Consumption Summary

4.5 Report on de-silting Programme

4.6 Bog development and operational programme

4.7 Bog rehabilitation progress report

4.8 Silt Pond upgrade Programme

5.0 Summary

APPENDIX

(i) Composite Sampler Results

(ii) Silt Pond Inspection and Cleaning Records

1.0 Introduction

1.1 I.P.C. Licence No. **504**

1.2 Name and Location of Site

Name **Bord na Mona Energy Limited**

Full Address **Mountdillon Group**

C/o Mountdillon Works

Lanesboro

Co Longford

Telephone No. **043 21117** **Fax No** **043 21259**

National Grid Reference No. **E204720 N268880**

1.3 Brief Description of Activities

Mountdillon group of bogs is situated in Counties Longford Roscommon, and Westmeath.

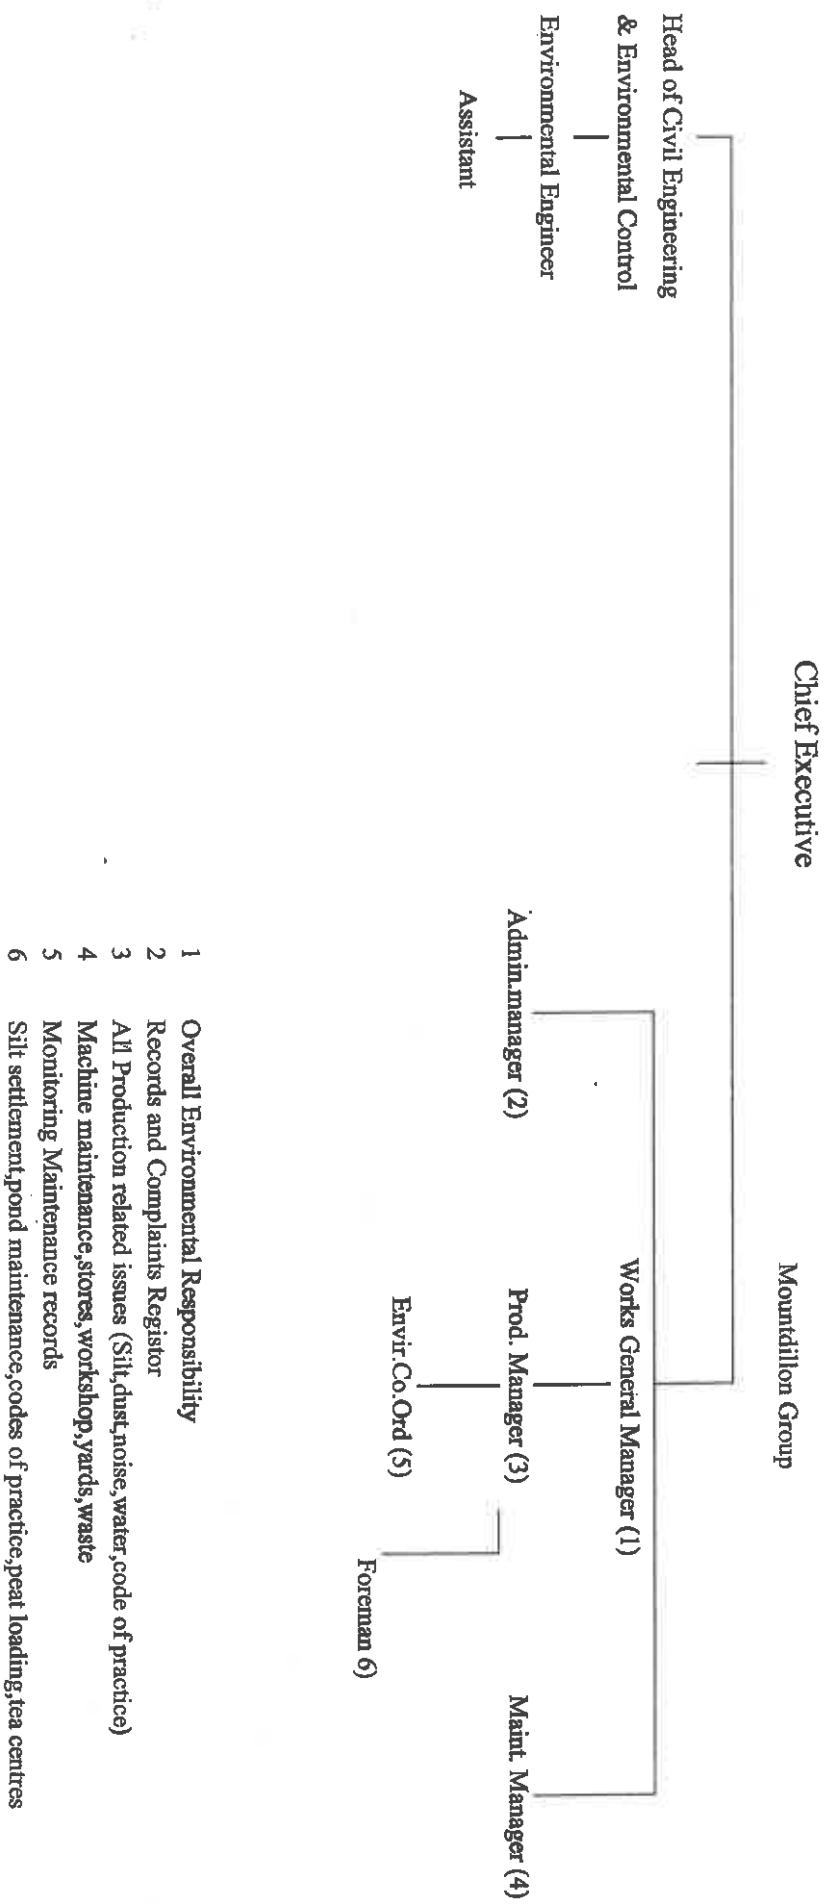

This group of bogs drain into the upper Shannon Catchment. Gross working hectares for Mountdillon is 4,950 and it is a completely milled peat operation.

Our sole customer is the E.S.B. Mountdillon is divided into 10 working areas namely Lough Bannow, Derryadd, Derryarogue, Knappoge, Begnagh , Clooneeny, Derrycolumb, Derryshannoge, Cloontuskert, Cloonshannagh, Derrymoylin, Mt/Dillon, Derrycashel, and Eddera. Cuil na gCun and Milkernagh

1.4 Environmental Management of the Company

Bord Na Mona Energy Limited

Environmental Responsibilities

1.5 Environmental Policy

BORD NA MÓNA

BORD NA MÓNA ENERGY LIMITED
Environmental Policy Statement

Bord Na Mona Energy Limited is a commercial semi-state body with responsibility to develop Ireland's peat resources in the national interest.

Bord Na Mona Energy Limited is committed to gather and make available information on all aspects of its environmental impact and to help improve understanding among the public generally of its role and of the importance of Irish peatlands.

Bord Na Mona Energy Limited recognises the importance of peatland conservation.

Bord Na Mona Energy Limited will leave behind all areas it owns as either an economically or socially integrated resource of high environmental value.

Bord Na Mona Energy Limited seeks to conduct all aspects of its business in an environmentally sensitive manner.

Bord Na Mona Energy Limited will establish an environmental management system specifically addressing the following impacts:

- Discharges to water
- Emissions to atmosphere
- Waste disposal
- Use of natural resources
- Noise, vibration, odour, dust and visual effects
- Natural environmental and eco-system

The environmental management system will be monitored, maintained and continually improved.

A system of regular environmental audits will be put in place.

Bord Na Mona Energy Limited will continue research and development(R&D) into all aspects of its environmental impact

This statement is published and is available at all locations within the section and its contents are brought to the attention of all employees.

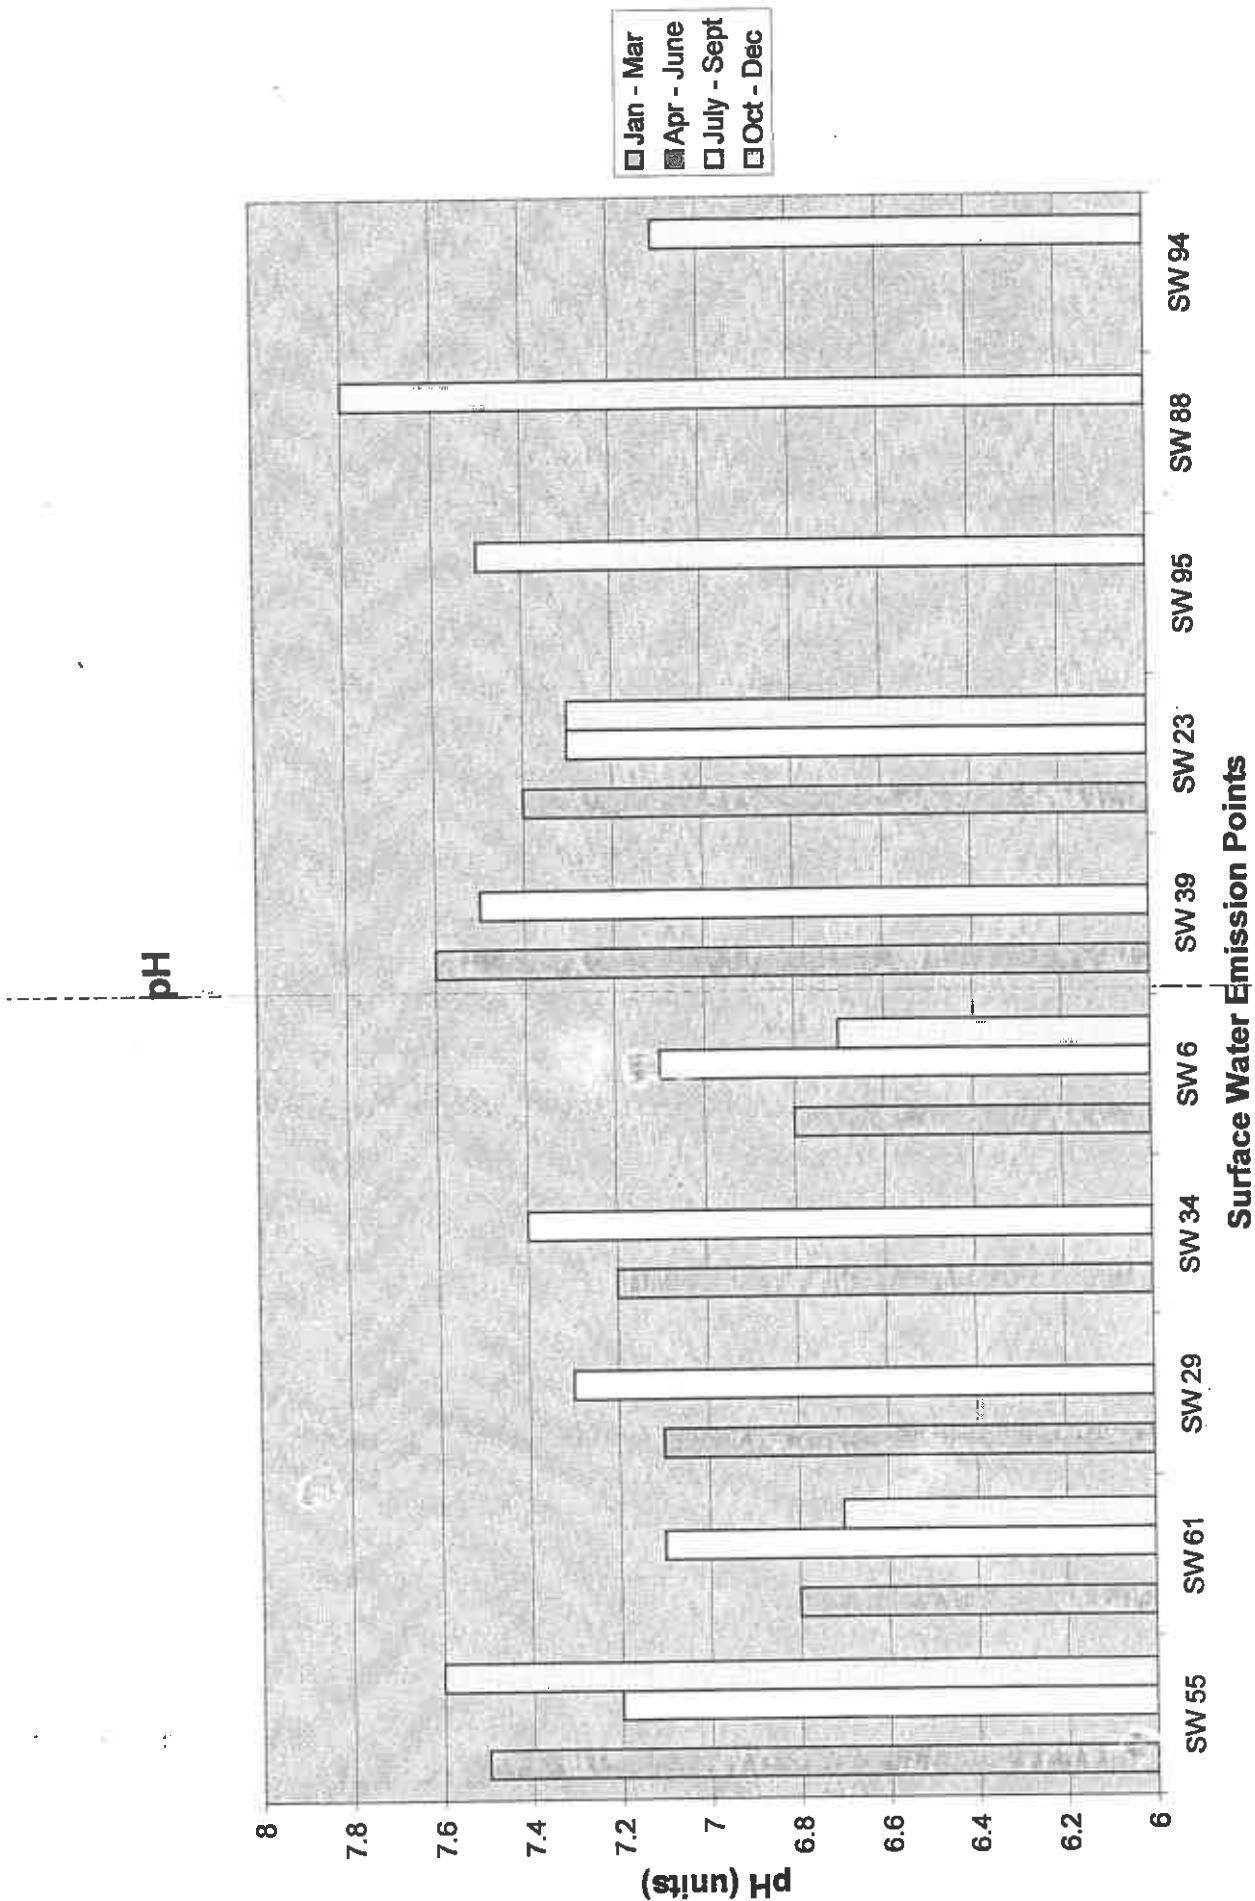

2.0 Summary Information

2.1 Emissions to Water Summary

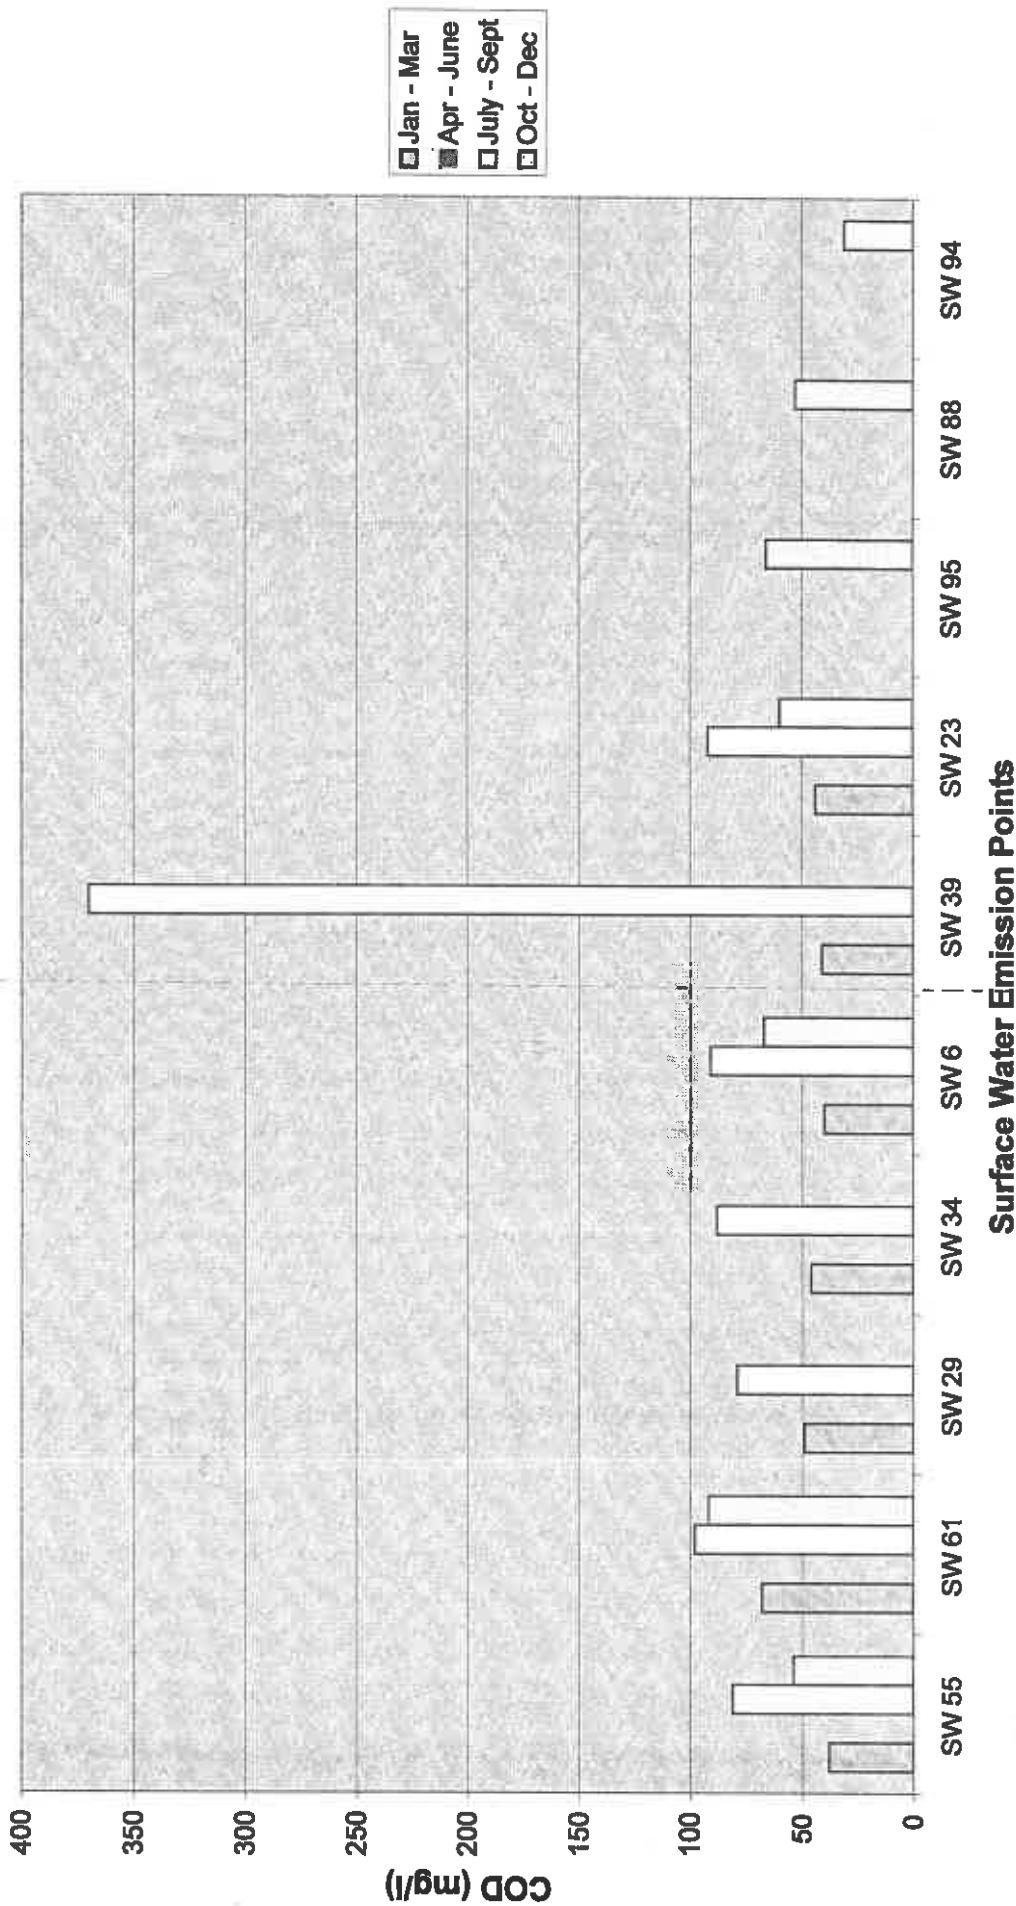

2.1.1 Silt Pond Emissions

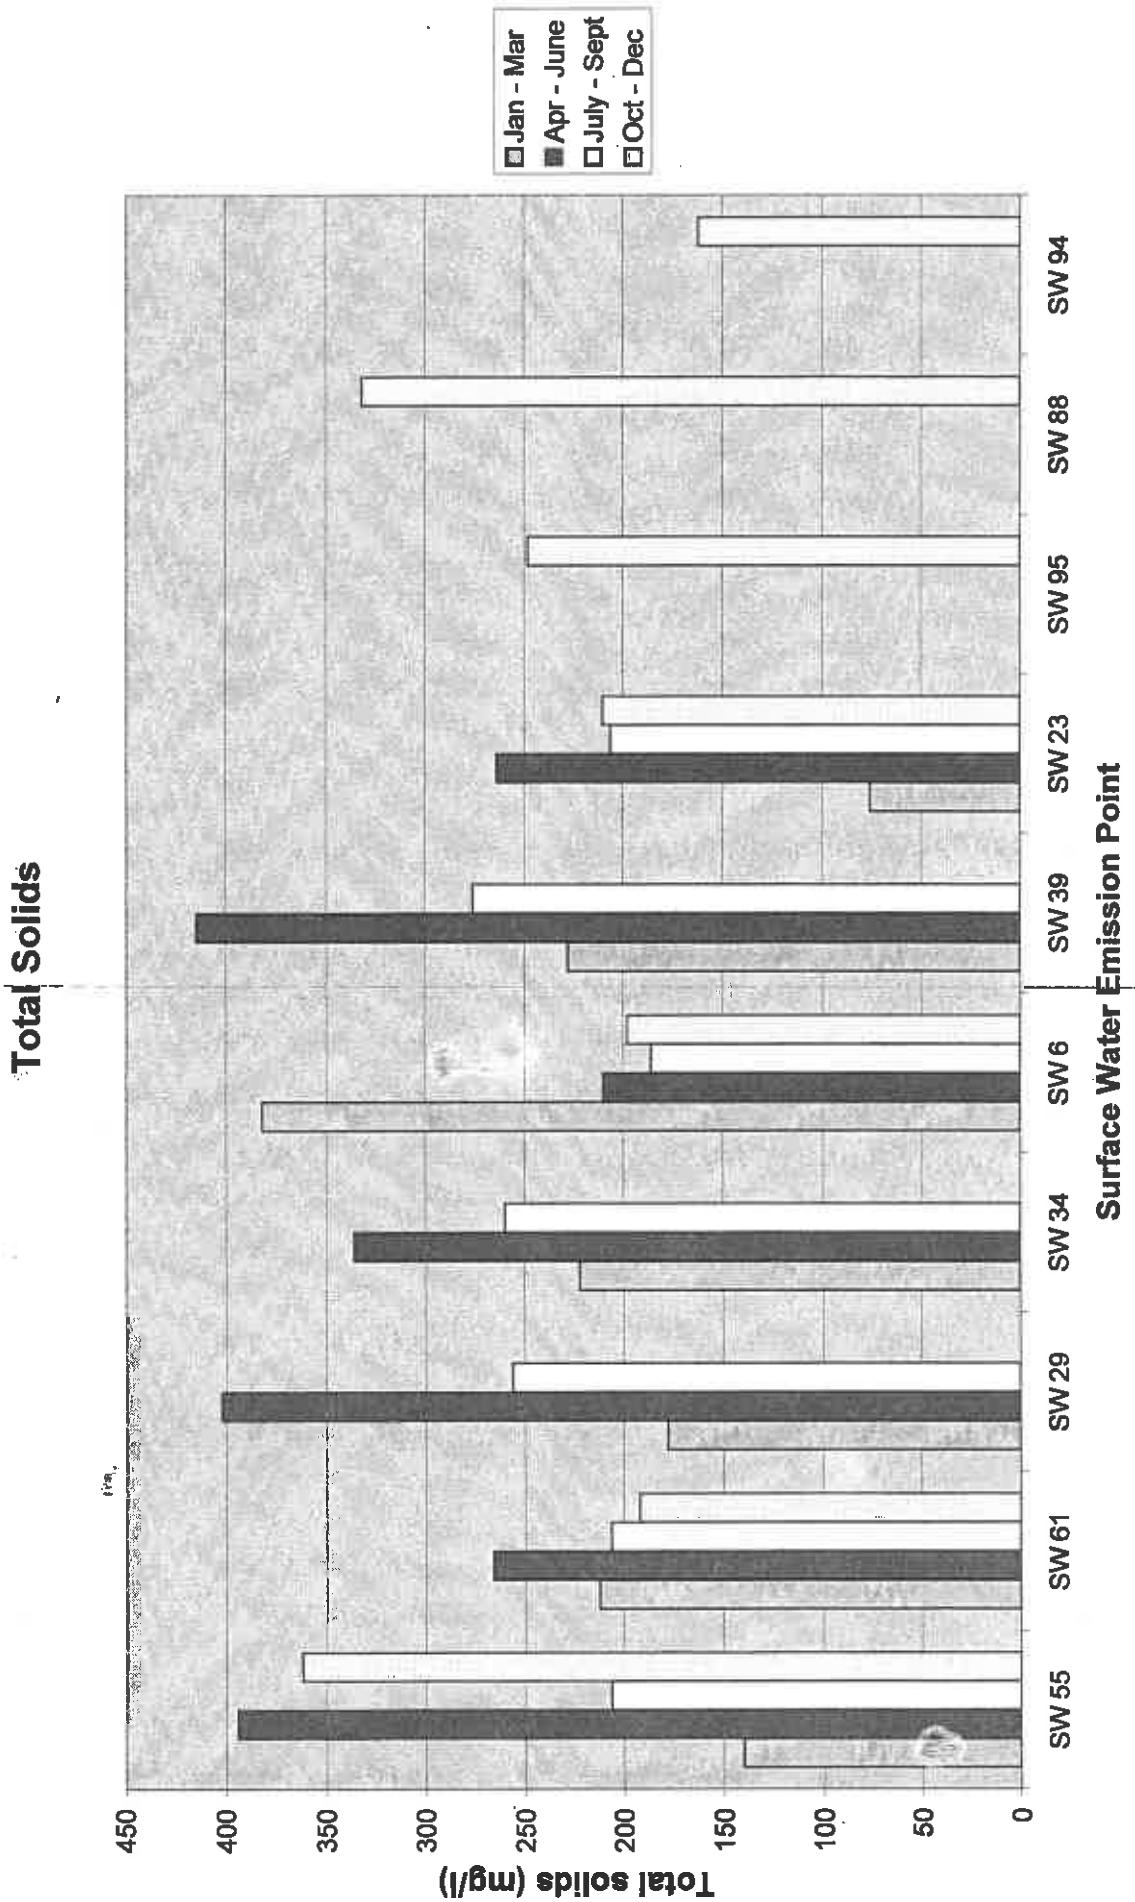

Monitoring and sampling from agreed discharge points are carried out quarterly in the form of grab samples. Samples were taken each quarter from each of the agreed outlets in accordance with the regular sampling programme. The results of the analyses of these samples are presented below in Tables 1A – 1G.

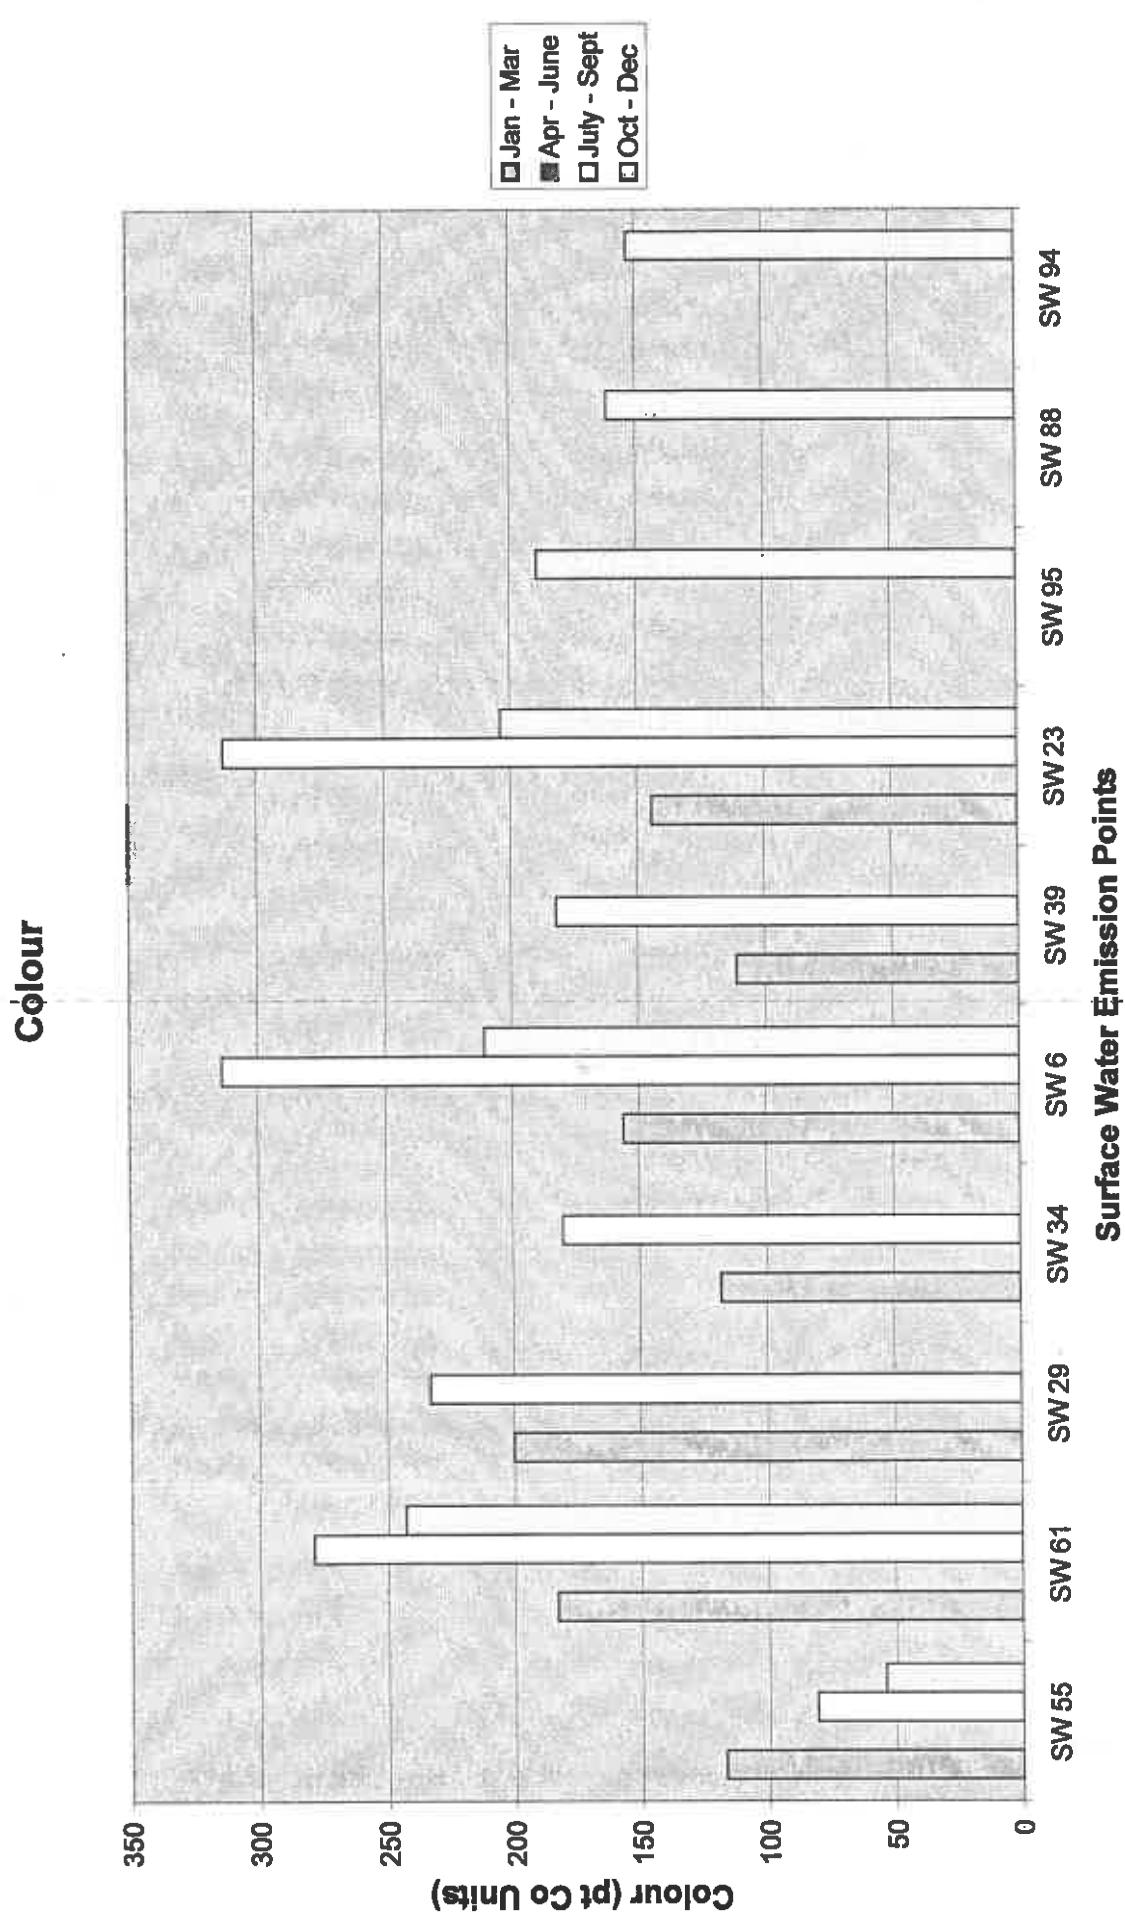

During dry months or when the flow is backed –up there is no measured flow

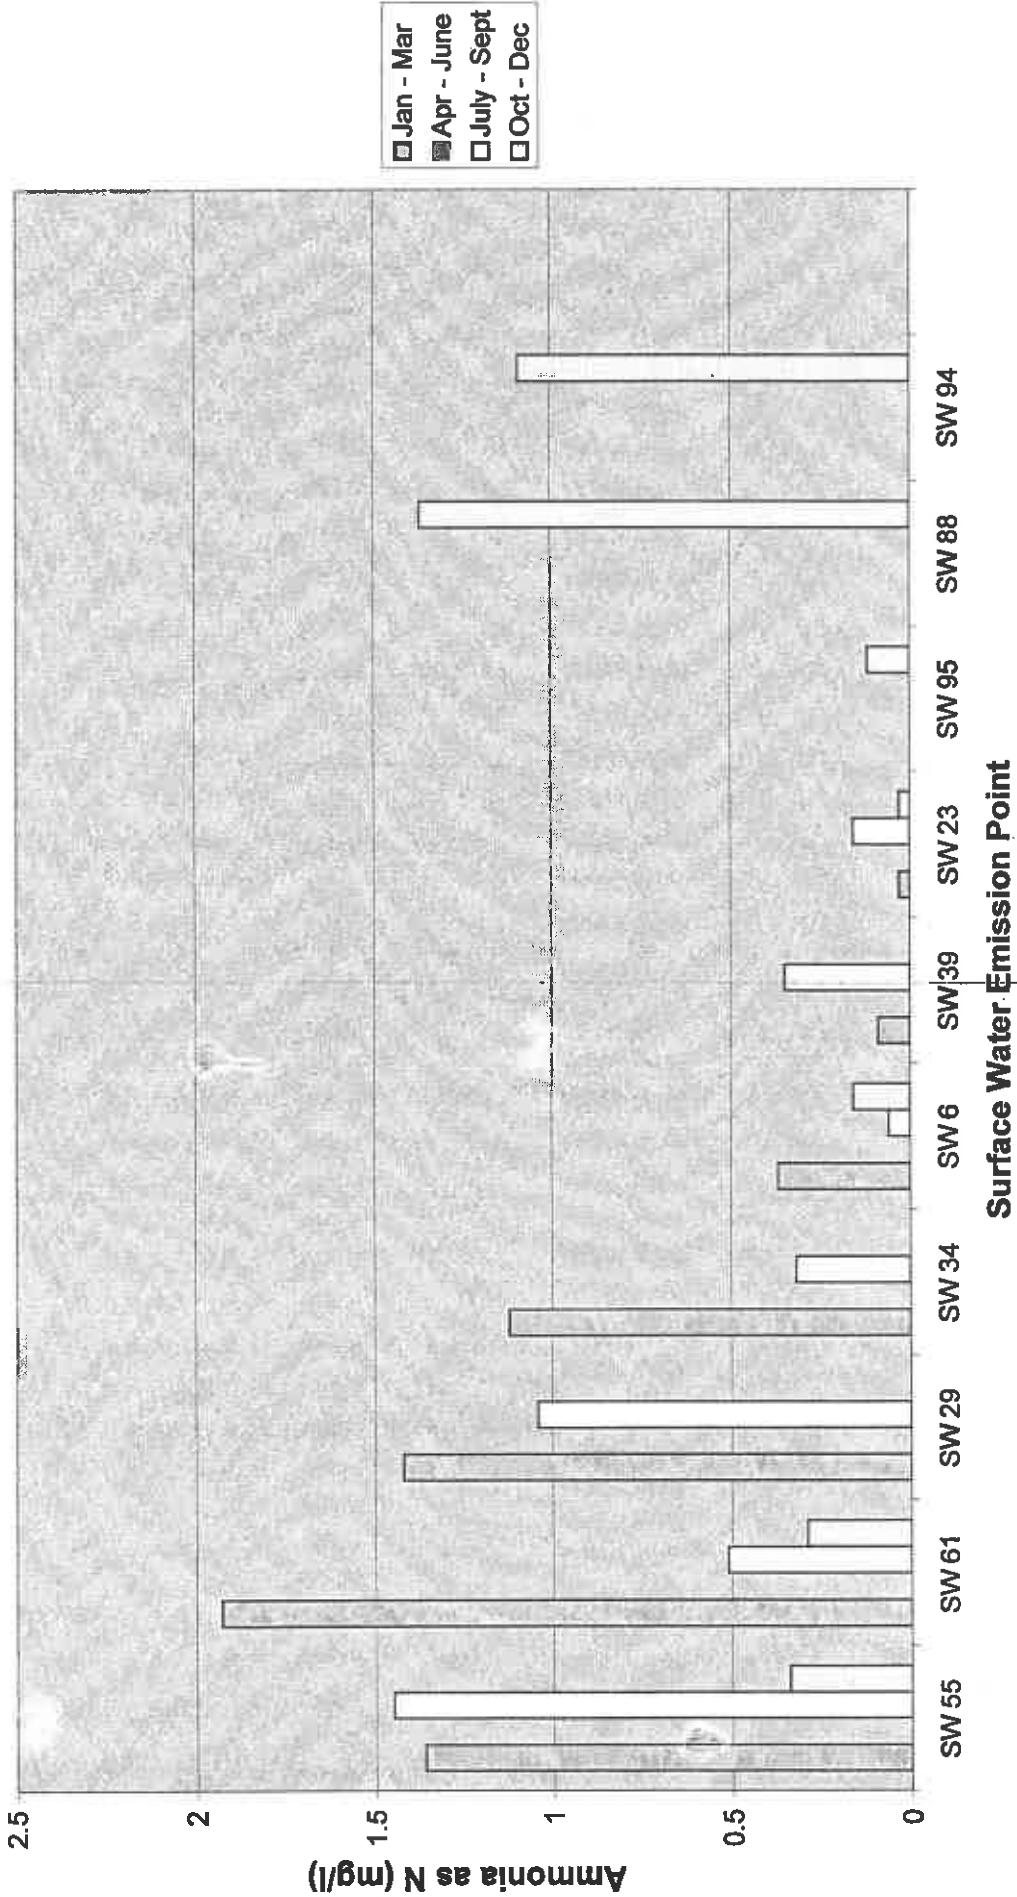

COD

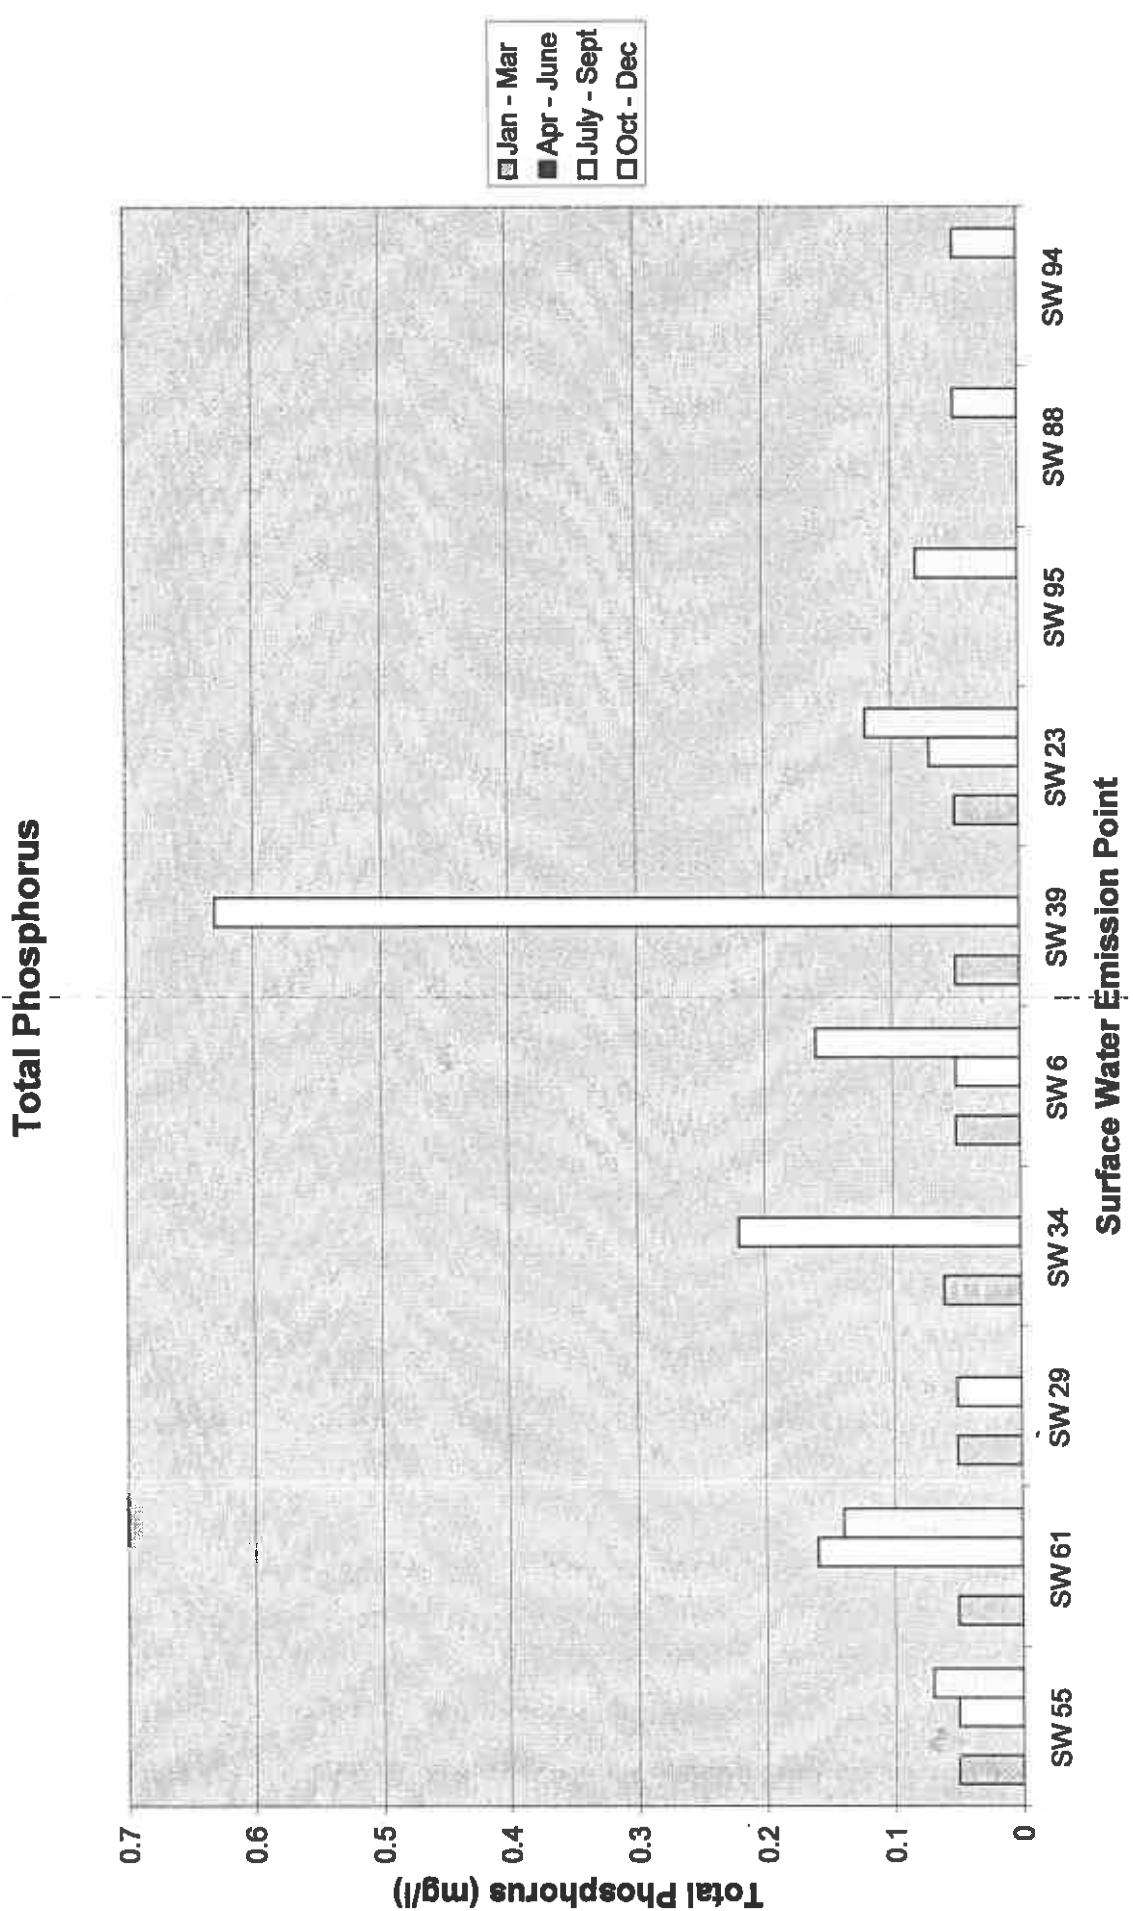

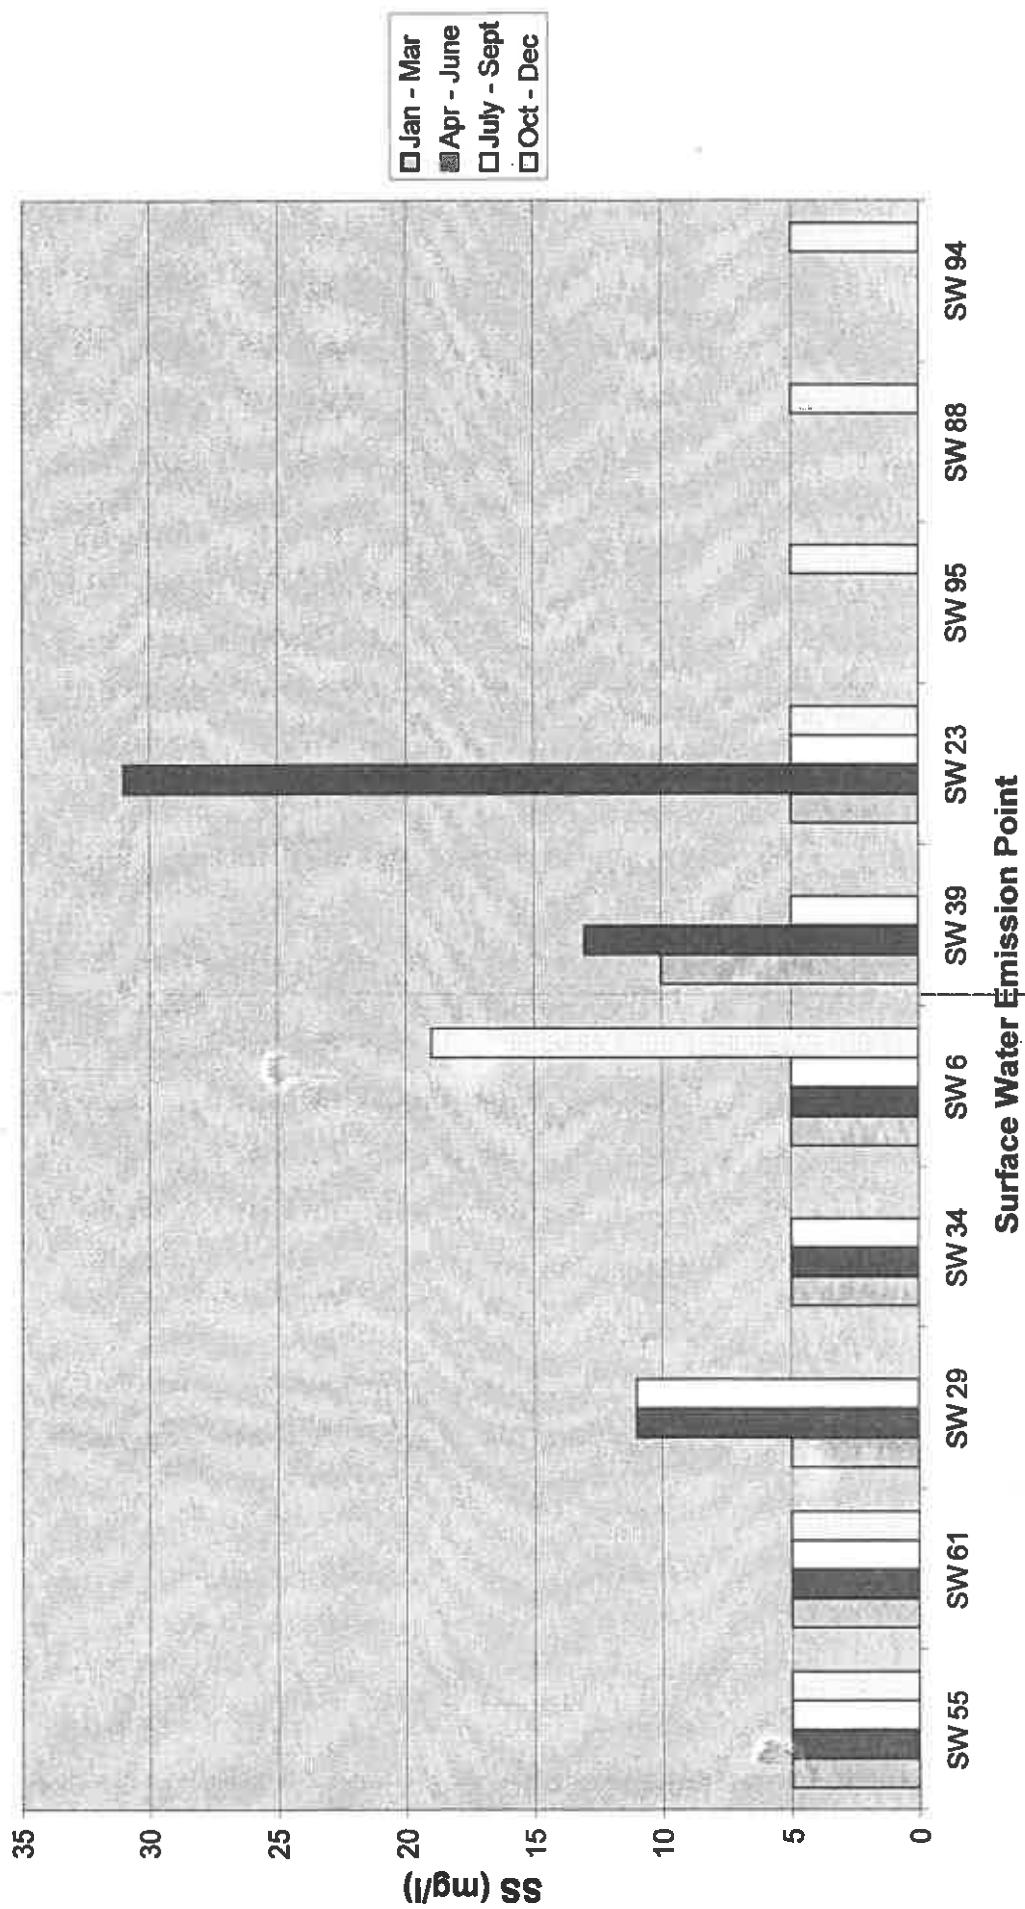

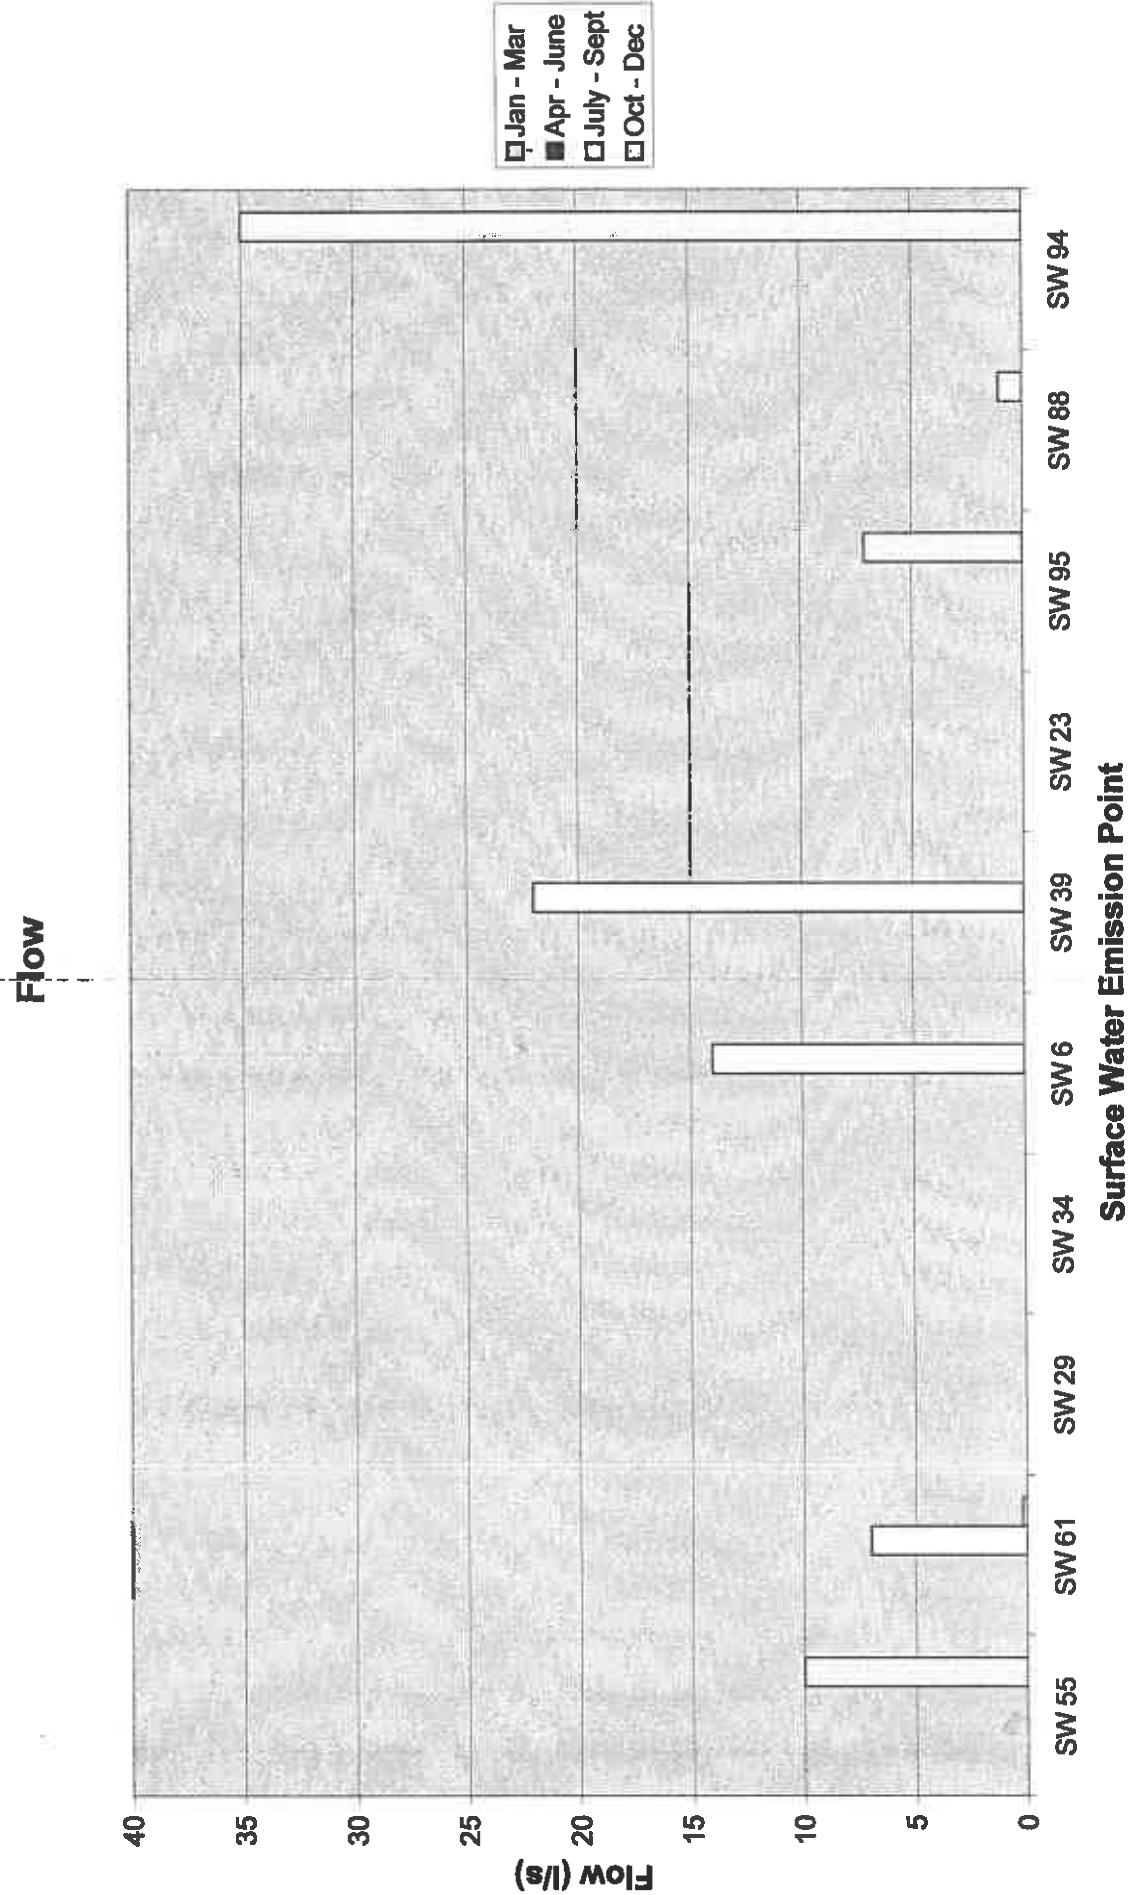

Ammónia

Suspended Solids

2.1.2 Yard Discharges

Surface Water Emission pt.	Reporting Period: January – December 2004												Emission Limit V value
	January	February	March	April	May	June	July	August	September	October	November	December	
	COD (mg/l)												
SWE-1 w/shop	33	15	34	14	No run off	20..	20	39	No run off	146	58		N/A
SWE-2 w/shop	32	31	52	76	No run off	No run off	No run off	63	No run off	51	94		“
SWE-1 yard	32	No run off	36	No run off	126	No run off		“					
SWE-2 yard	30	No run off	60	28	No run off	No run off	No run off	85	75	No run off	109	54	“
SWE-1 p/stat *	No run off	No run off	No run off	No run off	No run off	No run off	No run off	No run off	No run off	No run off	No run off		“
SWE-1 (Cuil na Geun)	47	36	62	88	No run off	No run off	No run off	14	No run off	54	38		“

All of the yard run-off in the Mountdillon Group have oil interceptors installed at the works. Condition 9.1.8 calls for all surface water discharges to be fitted with an oil-interceptor within 12 mths of the date of licence. Results of which are included in the monthly monitoring programme, and reported on quarterly

* No run off due to refueling area totally roofed

2.1.3

Composite Sampler Report

The Composite Sampler has been operational since May 2001. It has been visited on a weekly basis since, and the samples have been removed and returned to Bord na Mona's Laboratory in accordance to sampling protocol. On the few occasions samples have not been recorded it has been due to one of the following : 1. No Flow 2. Power failure 3. Pond frozen. The Composite sampler has been relocated to Lough Bannow bog silt pond no.LW4 (SW76) IN june 2003 and the agency notified

The following are the parameters to be monitored .

Parameter	Monitoring Frequency	Location of analysis
pH (pH units)	Weekly	Laboratory
Flow (l/s)	Daily	On-site
Suspended Solids (mg/l)	Daily	Laboratory
Total Solids (mg/l)	Daily	Laboratory
Total Phosphorus as p (mg/l)	Weekly	Laboratory
Ammonia as N (mg/l)	Weekly	Laboratory
Colour (hazen units)	Weekly	Laboratory
COD (mg/l)	Weekly	Laboratory

See results in appendix 1

2.1.4 Non compliance

DATE	Non - Compliance	Cause	Corrective – Action
JAN 14 – JAN 21	1 Non Compliance	Ditching during wet weather	Presonell instructed during subsequent training sessions

2.2 Emissions to Air

2.2.1 Dust Monitoring Locations Programme

Emission Point	DATE	Parameter	Average Emission (mg/m ³ /day)	Emission Limit Value
DM-01	21/06/04 – 21/07/04	Dust	206	(350mg/m ³ /Day)
DM-02	10/06/04 – 12/07/04	Dust	371	(350mg/m ³ /Day)

Emission Point	DATE	Parameter	Average Emission (mg/m ³ /day)	Emission Limit Value
DM-01	22/07/04 – 24/08/04	Dust	412	(350mg/m ³ /Day)
DM-02	12/07/04 – 12/08/04	Dust	56	(350mg/m ³ /Day)

Emission Point	DATE	Parameter	Average Emission (mg/m ³ /day)	Emission Limit Value
DM-01	24/08/04 – 23/09/04	Dust	149	(350mg/m ³ /Day)
DM-02	12/08/04 – 16/09/04	Dust	35	(350mg/m ³ /Day)

2.2.2 Non compliance

DATE	Non - Compliance	Cause	Corrective – Action
Jun 03 – Sept 03	2	Dry weather and High Winds	See ref. 0005 and 0006

The Agency has been notified see Ref. 0005 and 0006

2.3 Waste Arisings

2.3.1 Hazardous Waste

2.4 Energy and Water Consumption

2.4.1 Energy Consumption

Fuel JAN – Dec 2004	Megawatt / HRS	Volume cu/mts	Tonnes
Diesel / Heating Oil	10880	1110.9	
Petrol	39.31	4.35	
Electricity	1299		
Peat Briquettes	653.5		130.7

2.4.2

The only water used in Mountdillon is in teacentres, workshops and office's and is negligible

2.5 Environmental Incidents and Complaints

2.5.1 Incidents

There were no incidents reported in mountdillon in 2004

2.5.2. Complaints

Environmental Complaints	Number of complaints
Complaints received	4
Complaints requiring corrective action	
Categories of complaint	
Odour	
Noise	
Water	
Air	4
Procedural	
Miscellaneous	

These have been reported to the E.P.A.

3.0 Management of the Activity

3.1 Environmental Management Programme Report 2005

Environmental Management Programme Report 2005	
Project	
Project 1. Reduction of fugitive dust emissions.	<p>Training</p> <p>Training in Mountdillon was provided for all personnel during 2004, and will be repeated in 2005. This will be in the form of a Cleaner Production Video, This video was completed in may 2004, and covers all aspects of the I.P.C. licence, and in particular, cleaner production methods, good and bad practice, pollution prevention and codes of practice. A quiz on the contents of the video and items relating to the target audience, accompanies the 1 hour training session.</p> <p>An internal audit of all I.P.C. licenced sites also occurred during may and june of 2004</p> <p>Headland Peat</p> <p>BNM recently took delivery of 4 new mechanical bin harvesters. These were manufactured in Finland, and are currently been modified in Ireland. These types of harvesters are specifically for use in lifting dry peat from headlands at DSL's and will be engaged alone in tackling dust sensitive areas in each licence, for 2005 production season. In addition two Headland Harvester Units were in operation. These units operated in Boora and Mountdillon in 2004, and will continue to operate in these areas. In total, these 6 units will operate specifically at DSL in Poco bogs, and will be assessed during 2005 season as to their effectiveness at reducing headland peat and reducing incidents of dust generation.</p> <p>The total expenditure on the additional bin harvesters, hydraulic harrows and polyrollers (project 5) for the 2004 season is 670,600, which is 400,000 above what was budgeted.</p> <p>Hydraulic harrows</p> <p>As was proposed for 2004 8 newly fabricated hydraulic harrows were purchased and distributed to DSL's within the 9 IPC licenced sites, these have proved successful in reducing dust generation.</p> <p>In Mountdillon Two were used in Edera Bog and one in Derryadd Bog it is proposed to install one extra hydraulic harrow in Cloonshannagh Bog in 2005</p>

Project 2. Minimisation of Suspended Solids	This project is on-going and is primarily one of training for all production personnel, and is covered in the Cleaner Production Video, as in Project 1 (training).
Project 3. Effective spill/leak management of mobile fuelling tanks	All of BNM's production bogs now have locations highlighted as being suitable for re-fuelling on the bog, and this is being brought to the attention of all personnel. These locations have been chosen having due regard to location of water courses and drains.
Project 4. Re-use of silt pond waste	There are over 850 silt ponds in operation in the 9 IPC Licensed BNM bogs. These are located in low areas on the bog perimeters, due to drainage requirements. All of these ponds are excavated into the mineral layer, and as a result of this, all silt removed from the ponds have high levels of grit, stones etc. All of these make the peat unsuitable for combustion purposes. In addition, over 95% of the silt excavated is water, which would require it to be spread out on the bog to be allowed to dry to the required moisture content. Given the small volumes of silt excavated, it is therefore not feasible to reuse this silt pond waste.
Project 5. Collection, storage and re-use of polythene.	Polythene collection is ongoing in BNM, and volumes collected and recycled are recorded in the Non-hazardous Waste records in the AER.

**Project 6. Condition 2.2.2 (v) Provision of
measures to protect dust sensitive areas.**

All DSL's have been identified within BNM group. A programme of tree planting was undertaken in Mountdillon bogs in 2004, in total 1290 trees were planted in dust sensitive areas. These trees were planted in raised or mounded areas.

3.1 Environmental Management Programme Proposal for 2005

ENVIRONMENTAL MANAGEMENT PROGRAMME PROPOSAL FOR 2005	
Project	
Project 1. Reduction of fugitive dust emissions.	<p>Training</p> <p>Continue with the training programme for 2005. 15 Training sessions have already taken place at 6 of the IPC Licensed works, since January 05'. This has targeted management and production personnel (teamleaders) and will be extended to include all seasonal staff to be engaged this year. It is targeted to have all production personnel trained by the commencement of production for 2005.</p>
Headland Peat	<p>The 6 new headland peat harvester units will be deployed for the 2005 production season. These units are a mixture of the bin harvester system (4 units) and the same field harvester (2 units), and will be operated in dust sensitive locations. The bin harvester units, while having been experimented with previously in BNM, are a relatively new technology in BNM's modern day operations, and so will be monitored closely over the coming season to asses their performance. All trials, observations and tests will be monitored and recorded by the EMP system as to their effectiveness and suitability.</p>
Hydraulic harrows	<p>14 new hydraulic harrows have been made over 04/05 and will be in operation between now and the end of 2005. In line with BNM's policy to fabricate 40 hydraulic harrows over 5 years, this current no. brings the total to-date to 22 in operation by the end of 05'. This is well ahead of what was planned in the 2004 EMP proposal. In addition, 3 new units are budgeted for fabrication by the end of 05. When completed, all DSL's will be equipped with a hydraulic harrow.</p>
Project 2. Minimisation of Suspended Solids	<p>This project is on-going and is primarily one of training for all production personnel, and is covered in the Cleaner Production Video, as in Project 1 (Training). It will also include inspections at a number of production units during the 05 production season, to assess compliance with the good practice and codes of practice developed by BNM and communicated through the training programmes and the video.</p>

<p>Project 3. Effective spill/leak management of mobile fuelling tanks</p>	<p>As reported in the 2004 EMP report, all areas have designated areas for re-fuelling. This project is therefore completed. Compliance with the original requirements of this project will however be checked through the inspections as highlighted in project 2 above.</p> <p>Specific training has also been provided for oil spill management and clean-up, as part of the management of oil spill kits and procedures etc. and will continue to be facilitated during 2005.</p>
<p>Project 4. Re-use of silt pond waste</p>	<p>This project is also not feasible, as highlighted in the 2004 report, but will be reviewed where necessary, if a use (other than fuel use) emerges.</p>
<p>Project 5. Collection, storage and re-use of polythene.</p>	<p>Banner recycling are currently taking BNM's rolled and loose polythene, for recycling to their permitted yards in Co.Clare. Two additional interested parties are also being investigated, one locally in Co Kildare and a potential recycler in Belgium who may be in a position to reuse the polythene to process pellets to be used in the manufacture of new polythene to be used by BNM. An additional order for 22 polyrollers have been placed, to be delivered by the end of March, so that all bog units will have a roller for stripping piles. This will put an end to loose polythene gathering around the bog.</p>
<p>Project 6. Condition 2.2.2 (v) <i>Provision of measures to protect dust sensitive areas.</i></p>	<p>This project is on-going. All dust sensitive locations will have bergerhoff dust gauges installed for the 2005 season.</p> <p>The tree planting programme will continue for 2005</p>

3.2 Environmental Expenditure

Expenditure Related to the Operation of the Mountdillon IPC Licence During the Period JAN 2004 – DEC 2004	
Description	Cost Euros
Capital Costs	
Plant	
Labour	124895
Materials	34991
Overheads (ESB, Phones, Consumables)	6000
External Environmental Consultancy	
EPA Fees	8773
Monitoring Cost	8307.64
Total	182966.64

4.0 Licence Specific Reports

4.1 Surface Water Discharge Monitoring Location Programme Review

The surface water discharge monitoring location programme has been submitted and accepted by the Agency in July 2000. Three sampling locations have been changed in 2004 and the Agency notified. Monitoring will be carried out at these locations in the forthcoming year. The three new ponds are DS 3. SW 94 DC 1. SW 88 and LB 3. SW 95

See results in 2.1.1

4.2 Bunding Programme

Recently installed tanks have been Bunded at the power station and a service pit installed. A concrete spill area has been installed at the refuelling area. All yards and depots are now fully bunded

4.3 Boiler Combustion Efficiency

Boiler at the main workshop has been tested by Boiler Services Allenstown Broadway Co Wexford on 13/12/04 with efficiency levels of 87.4% to 88.1%

4.4 Resource Consumption Summary

There was a total of 867,875 tonnes of peat produced and 218,419 tonnes of peat sold to Lanesboro Power station during the reporting period Jan – Dec 04

4.5 Report on de – silting Programme

De-silting Report

JAN – Dec

2004

Area Cleaned	0	1	2	3

4.6 Bog Development and Operational Programme

There are two bogs under development in the Mountdillon group of bogs namely Milkernagh and Cuil na gCun. Milkernagh bog produced 22824 tonnes of milled peat in the year 2004, production will continue for the year 2005. This bog is covered by adequately sized silt ponds and are cleaned twice a year, these silt ponds are included in the quarterly grab sampling by the E.P.A.

Development will continue in Cuil na gCun bog for the year 2005. Adequately sized silt ponds have been constructed.

The results have been included in the Appendix ii

4.7 Bog rehabilitation progress report

There has been no Bog Rehabilitation carried out in the Midlands other than Oweninny and Boor

4.8 Silt pond upgrade programme

The Silt pond up – grade programme was submitted 30 November 2000.

Stage 1 of Silt Pond upgrade programme (100% effluent treatment)

Stage 2 (100% design standard)

Pipes have been installed in order to increase the control over the discharges

Stage 3 (Pipe and weir installation)

All silt ponds in mountdillon area have been fitted with pipes on inlet and outlet.

A programme of installing weirs or sluice gates has commenced. To date 7 weirs or sluice gates have been fitted on pond numbers DS3 (SW79) DS5 (SW83) DS6 (SW84) BH5 (SW55) DD1 (SW68) DC10 (SW93) DC5(SW91) LB3(SW95) MN2(SW19) GN4(SW23) CH1(SW6)

5.0. Summary

Summary

With regard to environmental compliance at the Mountdillon Group of Bogs, there were no exceedences in the quarterly grab sampling of the ponds in the Surface Water Discharge Monitoring Location Programme. There was one non compliance see 2.1.4 in relation to the Composite Sampler during the operation period of Jan to the end of December. Mountdillon received four complaint in relation to dust monitoring these have been reported to the Agency

The staff awareness through training and involvement in the operation of the licence has also improved immensely. A full programme of training and awareness has been conducted at the works and has targeted all personnel ie. office, workshop, transport and production.

Bord na Mona Energy Ltd are represented on the Management Group of both the Shannon River and Eastern River Basin District Management Systems, set up under the Water Framework Directive, and on the Steering Group of the Catchment Management on the River Barrow.

Bord na Mona Energy Ltd would like to take this opportunity to advise the Environmental Protection Agency of its continued commitment to improving its environmental performance by adopting cleaner production methods and improving its environmental protection measures.
