	Bord na Mona Mountdillon Mountdillon, Lanesboro, Co Long 0892 1.4		

A description of the activities/processes at the site for the reporting year. This should include information such as production increases or decreases on site, any infrastructural changes, environmental performance which was measured during the reporting year **and an overview of compliance with your licence** listing all exceedances of licence limits (where applicable) and what they relate to e.g. air, water, noise. Activities on site can be divided into two components, firstly the milling, harrowing, ridging and harvesting of peat into stockpiles and secondly the transportation of that peat via an internal rail network to the Power Station and lorry outloading facilities. Production achieved was approximately 524,000 tonnes. Infrastructurally, there was bog development works at Coolcraff bog in Cuil na Gun. Works included ditching and levelling on an area of approximately 180 hectares and the construction of appropriately sized silt settlement ponds. There was 3 environmental complaint received during the reporting period, this was reported to the Agency through ALDER. In relation to silt pond cleaning, 100% of ponds received two cleanings with some ponds receiving three. The site was 100% compliant in relation to quarterly grab and dust results. In relation to composite sampling there was nine trigger level exceedences, seven for Ammonia and two for COD. Decommissioning and Rehabilitation works are described in an attachment.

## **Declaration:**

All the data and information presented in this report has been checked and certified as being

Signature Group/Facility manager (or nominated, suitably qualified and experienced deputy)

# Mountdillon Decommissioning and Rehabilitation AER Overview 2015.

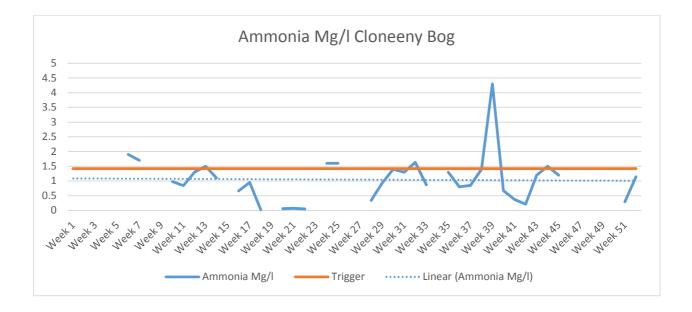

Within the Mountdillion licensed area (P0504-01) there was no entire bog units available for rehabilitation in 2015. Ongoing monitoring of cutaway areas was carried out within the Mountdillon area with Corlea and Coolcraff bogs having been re-surveyed in 2015.

Draft rehabilitation plans for the Mountdillon bogs licensed area, including more detailed draft plans for each component bog unit were submitted to the EPA in 2013 and these were reviewed and updated in 2015.

The annual Biodiversity Action Plan review day was held in November 2015 and this included an update on progress of this plan, bog restoration and cutaway rehabilitation for a wide range on statutory and non-statutory consultees including members of the EPA, NPWS, BWI, Bord na Mona, Coillte, Inland Fisheries Ireland, An Taisce, IPCC, Irish Red Grouse Association, Irish Wildlife Trust, NARGC, local game councils, Midland Regional Planning Authority as well as a range of local community groups and Heritage Officers from counties Laois, Offaly, Kildare, Roscommon, Longford, Meath, Galway, Westmeath and Dublin. At this meeting the draft of the new Biodiversity Action Plan was discussed, with a further extensive engagement with consultees held online.

The new Biodiversity Action Plan will be available from April 2016. A copy of our Biodiversity Action Plan is available to view and download at http://www.bordnamona.ie/our-company/biodiversity/

Clooneeny bog is an active production bog with the composite sampler located here during 2015. The composite sampler takes a flow proportional composite sample over a 24 hour period. The sampler had 17% downtime during the period and returned 36 weekly ammonia results. The ammonia trigger level of 1.42mg/l, as agreed with the Agency, was exceeded 7 times during the period. Overall the results are trending downwards as peat extraction continues and this is in-line with the downwards trends submitted to the EPA in 2013 as required by condition 6.14. Due to the new licence condition 6.2, where all monitoring locations are required to be sampled at least once in a 5 yr period, it is not possible to trend these ammonia results for each individual location due to the new licence requirement. However the ammonia trends on the 24/7 composite sampler 2015, gives a good representation of the ammonia in the Mountdillon bogs which are very slightly on a downward trend.

## 2. PRTR CLASS ACTIVITIES

Activity Number	Activity Name
50.1	General

### 3. SOLVENTS REGULATIONS (S.I. No. 543 of 2002)

Is it applicable?	No
Have you been granted an exemption ?	
If applicable which activity class applies (as per	
Schedule 2 of the regulations) ?	
Is the reduction scheme compliance route being	
used ?	
4. WASTE IMPORTED/ACCEPTED ONTO SITE	Guidance on waste imported/accepted onto site
Do you import/accept waste onto your site for on-	

site treatment (either recovery or disposal activities) ? No

This question is only applicable if you are an IPPC or Quarry site
