

a result of the construction of the underground cables should be identified and addressed in the EIAR.

Geotechnical and Peat Stability Assessment

A detailed assessment of the current ground stability of the site for the proposed renewable energy development and all proposed mitigation measures should be detailed in the EIAR. The assessment should include the impact the current turbines in place may have on the future stability of ground conditions, taking into consideration extreme weather events, site drainage and the potential for soil erosion. An accurate assessment of the potential impacts of the foundations on water quality and peat stability cannot be undertaken without this information. The EIAR should include provision for a peat stability monitoring programme to identify early signs of potential bog slides ('pre-failure indicators' see the Scottish Government's 'Peat Landslide Hazard and Risk Assessments: Best Practice Guide for Proposed Electricity Developments 2017)

<https://www.gov.scot/binaries/content/documents/govscot/publications/advice-andguidance/2017/04/peat-landslide-hazard-risk-assessments-best-practice-guide-proposedelectricity/documents/00517176-pdf/00517176-pdf/govscot%3Adocument/00517176.pdf>

Cumulative Impacts

All existing or proposed wind farm developments in the vicinity should be clearly identified in the EIAR. The impact on sensitive receptors of the proposed development combined with any other wind farm/renewable energy developments in the vicinity should be considered. The EIAR should include a detailed assessment of any likely significant cumulative impacts of the proposed renewable energy development.

HSE South Emergency Management Consultation Report				
Report to	Jane Power, PEHO, Wexford		Date	29 th August, 2022
Type of consultation: EIS <input type="checkbox"/> Scoping X Screening <input type="checkbox"/> EIAR <input type="checkbox"/> EPA <input type="checkbox"/>				
Other (please specify):				
Authority	Wexford County Council			
Authority Reference Number	EHIS 3376			
EM Reference Number	EMENV 175			
Applicant / Consultants	MKO, Tuam Road, Galway H91 VW84			
Proposal	Permission sought by Castledockrell Wind Group Ltd. Co. Wexford to extend the 12-turbine operational period of the wind farm for an additional 15 years - permission period expires August 2025			

HSE South Emergency Management Observations: Please be advised that the HSE South Emergency Management function does not have any specific observations to make with respect to this application. However, please note the following recommendations within the context of site operations:

1. Should an incident occur at the site and the site operator requires the assistance of the emergency services, the incident information should be provided in the 'ETHANE' format (please see attached).
2. Emergency Services access to the site should be clearly identified. This should be undertaken via appropriate high visibility signage, i.e.; a green sign with a yellow border and white lettering citing the abbreviation RVP
3. The site should have a mechanism in place to account for personnel during an evacuation in order to provide the responding emergency services with an estimate of the number of people accounted and unaccounted for.
4. The site should identify any critical / vulnerable facilities within the geographical catchment area, such as hospitals, schools, nursing homes, etc, that could be directly or indirectly affected by an incident at the site.
5. Where the 'off-site' impacts of an incident at the site affects a vulnerable cohort / population such as children within crèches, schools; patients / clients / residents within nursing homes, etc; the emergency services will require assistance from the site operator in determining the impact on the local community.
6. The site operator is encouraged to develop a business continuity plan that includes a plan for severe weather. For more advice on this, please see the Department of Business, Enterprise and Innovation, *Business Continuity Planning in Severe Weather*.
<https://dbei.gov.ie/en/Publications/Publication-files/Business-Continuity-Planning-in-Severe-Weather-Check-List-for-Businesses.pdf>

All correspondence or any queries with regard to this report should be forwarded to Ms. Maryanne Horgan, Emergency Management Office, HSE South, Eye, Ear and Throat Hospital, Western Road, Cork, T12 WP62 or maryanne.horgan@hse.ie

Dear Ms. McHugh,

Thank you for your email and associated attachment regarding input into the informal Environmental Impact Assessment Scoping request in relation to the proposal to extend the operational period of the existing Castledockrell Wind Farm. Co Wexford.

Based on the information provided, IAA's Aerodromes Division has no requirements for incorporation into the EAI Scoping request.

Best Regards

Dave

Sir/Madam,

Castledockrell Wind Group Ltd are proposing to apply to Wexford County Council to extend the operational lifetime of the existing Castledockrell Wind Farm, Co. Wexford for an additional 15 years after it's current planning permission period runs out in August 2025. The existing wind farm is located 8.1km west of Ferns and 6.5km south of Bunclody Co. Wexford. Further details on the proposed development can be found within the attached scoping letter.

If you have any comments or queries in relation to the attached scoping document, please don't hesitate to get back to me. All information will be gratefully received.

Kind regards,
Niamh

Subject: 210847 Castledockrell Wind Farm - Telecoms Scoping

[CAUTION: This email originated from outside of the organisation. Do not click links or open attachments unless you recognise the sender and know the content is safe]

Hi Matthew,

We are working on a constraints study for Castledockrell Wind Farm (Co. Wexford), located approximately 10.3km northwest of Enniscorthy and 7.5km south of Bunclody. The coordinates for the approximate centre of the site are 691972 (X, ITM) ; 649250 (Y, ITM). The site location can be seen in the attached map, and I have also attached a kmz file for your convenience.

Could you let us know if there are any existing or planned links in this area, and we shall incorporate these into our constraints mapping. If there are any links in the area, could you also send me the associated buffer of said links. Castledockrell is an existing windfarm that we are applying for an extension of duration for, therefore it will be helpful if you could let us know if there have been any pre-existing issues for the same.

If you have any queries, please do not hesitate to contact me. Thank you for your time and consideration to this matter,

Kind Regards,
Sanghamitra.

Subject: 210847 Castledockrell Wind Farm - Telecoms Scoping

Hi Denis,

We are working on a constraints study for Castledockrell Wind Farm (Co. Wexford), located approximately 10.3km northwest of Enniscorthy and 7.5km south of Bunclody. The coordinates for the approximate centre of the site are 691972 (X, ITM) ; 649250 (Y, ITM). The site location can be seen in the attached map, and I have also attached a kmz file for your convenience.

Could you let us know if there are any existing or planned links in this area, and we shall incorporate these into our constraints mapping. If there are any links in the area, could you also send me the associated buffer of said links. Castledockrell is an existing windfarm that we are applying for an extension of duration for, therefore it will be helpful if you could let us know if there have been any pre-existing issues for the same.

If you have any queries, please do not hesitate to contact me. Thank you for your time and consideration to this matter,

Kind Regards,
Sanghamitra.

Subject: RE: 210847 Castledockrell Wind Farm - Telecoms Scoping

Hi Sanghamitra

The BAI does not perform an in-depth analysis of the effect of wind turbines on FM networks. However, we are not aware of any issues from existing windfarms into existing FM networks. Also, the proposed windfarms are not located close to any existing or planned FM transmission sites.

Regards

Roger

Subject: 210847 Castledockrell Wind Farm - Telecoms Scoping

Hi all,

We are working on a constraints study for Castledockrell Wind Farm (Co. Wexford), located approximately 10.3km northwest of Enniscorthy and 7.5km south of Bunclody. The coordinates for the approximate centre of the site are 691972 (X, ITM) ; 649250 (Y, ITM). The site location can be seen in the attached map, and I have also attached a kmz file for your convenience.

Could you let us know if there are any existing or planned links in this area, and we shall incorporate these into our constraints mapping. If there are any links in the area, could you also send me the associated buffer of said links. Castledockrell is an existing windfarm that we are applying for an extension of duration for, therefore it will be helpful if you could let us know if there have been any pre-existing issues for the same.

If you have any queries, please do not hesitate to contact me. Thank you for your time and consideration to this matter,

Kind Regards,
Sanghamitra.
