

GORTLOUGHRA WIND FARM, CO. CORK

VOLUME III – EIAR FIGURES

TABLE OF CONTENTS

Figure Number	Figure Name
1.1	Site location map
1.2	Site layout map
1.3	Receptors within 2 km of the Proposed Turbines
2.1	Wind Farms within 20 km
2.2	Turbine Hardstand
2.3	Site Entrance
2.4	Turbine Delivery Route
2.5	Typical Access Track Construction
2.6	Watercourse Crossing
2.7	Met Mast Schematic
2.8	Substation Details
2.9	Internal Cable Trench Details
2.10	Grid Connection
2.11 (a)	Drainage Details
2.11 (b)	Drainage Details
2.12	Drainage Details
2.13	Drainage Details
2.14	Temporary Construction Compound
3.1	Constraints Map
3.2	Iterations 1-4
3.3	Iterations 5-8
3.4	Iterations 9-12
5.1	Study Area 1
5.2	Study Area 2
6.1	Area of Search
6.2	Target notes
6.3	Aquatic Monitoring
6.4	Fisheries Monitoring
6.5	Kerry Slug Survey Transects
6.6a	SACs
6.6b	SPAs
6.7a	Article 17 Habitats
6.8	Habitat Map
6.9	TDR Habitat Map Location 29
6.10	TDR Habitat Map Location 28
6.11	TDR Habitat Map Location 7

Figure Number	Figure Name
6.12	TDR Habitat Map Location 12c
6.13	TDR Habitat Map Location 14
6.14	TDR Habitat Map Location 17a
6.15	TDR Habitat Map Location 17c
6.16	TDR Habitat Map Location 17d
6.17	TDR Habitat Map Location 18b
6.18	TDR Habitat Map Location 19
6.19	TDR Habitat Map Location 19a
6.20	TDR Habitat Map Location 20
6.21	TDR Habitat Map Location 20a
6.22	TDR Habitat Map Location 20b
6.23	TDR Habitat Map Location 21
6.24	TDR Habitat Map Location 21a
6.25	TDR Habitat Map Location 22
6.26	Fisheries Monitoring Points
8.1	Bedrock Geology (100K)
8.2	Quaternary Geology (Subsoil Susceptibility)
8.3	Previously Recorded Landslide Events
8.4	Geological Survey of Ireland (GSI) Landslide Susceptibility Mapping with Hillshade
8.5	Geological Survey of Ireland (GSI) Geological Heritage Sites (Audited)
8.6	Geological Survey of Ireland (GSI) Mapped Mineral Locations
8.7	Bedrock Geology (100K) Susceptibility Along the Proposed Turbine Delivery Route (TDR)
8.8	Quaternary Geology (Soil Susceptibility) Along the Proposed Turbine Delivery Route (TDR)
8.9	Previously Recorded Landslides Along the Proposed Turbine Delivery Route (TDR)
8.10	Geological Survey of Ireland (GSI) Landslide Susceptibility Along the Proposed Turbine Delivery Route
8.11	Geological Survey of Ireland (GSI) Heritage Sites (Audited) Along the Proposed Turbine Delivery Route (TDR)
8.12	Geological Survey of Ireland (GSI) Mapped Mineral Locations Along the Proposed Turbine Delivery Route
9.1	Comparison of the Character of the Predicted Impact to the Sensitivity of the Receiving Environment

Figure Number	Figure Name
9.2	One in a 100 Year Rainfall Events, 1-day duration (left) and 1-hour duration (right)
9.3	Surface water bodies and hydrological flow model surrounding the proposed site
9.4	Water quality monitoring locations
9.5	Protected areas relative to the site and grid connection route options
9.6	3D hydrological and topographical model of the proposed Gortloughra windfarm site
9.7A	Watercourse crossings and drain diversions
9.7B	Watercourse crossings and drain diversions
9.8	Watercourse positions relative to the 50m buffer zone and design layout
9.9	Water Framework Directive (WFD) catchment areas relative to the site and grid connection route options
9.10	Water Framework Directive (WFD) subcatchment areas relative to the site and grid connection route
9.11	Past flood event locations relative to the proposed site and grid connection route options
9.12	The national indicative fluvial mapping – low probability – high-end future scenario
9.13	Present day medium probability fluvial flood extent with an annual exceedance probability of 1%
9.14	GSI groundwater vulnerability mapping of the site and grid connection route
9.15	GSI groundwater body mapping of the site and grid connection route
9.16	Dwellings near the site and water resources relative to the site and grid connection route
9.17	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.18	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.19	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.20	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.21	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.22	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.23	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.24	Hydrological features and constraints along the proposed turbine delivery route (TDR)

Figure Number	Figure Name
9.25	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.26	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.27	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.28	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.29	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.30	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.31	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.32	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.33	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.34	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.35	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.36	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.37	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.38	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.39	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.40	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.41	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.42	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.43	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.44	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.45	Hydrological features and constraints along the proposed turbine delivery route (TDR)

Figure Number	Figure Name
9.46	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.47	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.48	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.49	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.50	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.51	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.52	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.53	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.54	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.55	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.56	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.57	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.58	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.59	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.60	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.61	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.62	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.63	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.64	Hydrological features and constraints along the proposed turbine delivery route (TDR)
9.65	Hydrological features and constraints along the proposed turbine delivery route (TDR)
11.1	Full 20 km Extent of the Study Area
11.2	Aerial photograph showing the landscape context of the site and its immediate surrounds

Figure Number	Figure Name
11.3	Aerial photograph showing the landscape context of the Wider Study Area
11.4	Excerpt from Cork County Development Plan (2022-2028). Appendix F, Map 2 showing approximate location of proposed development in relation to Landscape Character Types. Site located within LCT15a
11.5	Excerpt from Cork County Development Plan (2022-2028), showing transition landscape character types in relation to the location of the proposed development
11.6	Excerpt from County Cork Draft Landscape Strategy 2007. Map 1 showing approximate location of proposed site in relation to Landscape Character Areas
11.7	Excerpt from Cork County Development Plan (2022). Chapter 14, Figure 14.2 showing approximate location of proposed development in relation to high value landscapes
11.8	Excerpt from Cork County Development Plan (2022), Chapter 13, Figure 13.2 showing approximate location of proposed development in relation policy considerations for wind energy projects
11.9	Excerpt from Cork County Development Plan (2014), Chapter 9, Figure 9.3 showing approximate location of proposed development in relation Cork's Wind Energy Strategy
11.10	Bare-ground Zone of Theoretical Visibility (ZTV) Map based on a turbine tip height of 175 m
11.11	Map showing selected representative viewpoints within the Study Area
11.12	Notable aspects of scenic amenity (yellow arrows) along the S29 designated scenic route in relation to the proposed turbines
11.13	Cumulative ZTV (Zone of Theoretic Visibility) showing the potential for intervisibility of the Proposed Development and other existing and permitted developments within the Study Area
11.14	Cumulative ZTV (Zone of Theoretic Visibility) showing the potential for intervisibility of the Proposed Development and other existing, permitted and in-planning developments within the study area.
13.1	Archaeological sites within 2 km Study Area
13.2	Archaeological sites within environs of Proposed Development
13.3	Archaeological sites with potential alignments within 5 km of Proposed Development
13.4	National Monuments and Preservation Order sites within 10 km of Proposed Development
13.5	1st Edition OS map of Proposed Development
13.6	2nd Edition OS map of Proposed Development
13.7	LiDAR imagery of Proposed Development
13.8	Archaeological Sites located within GCR study area
