LVIA PHOTOMONTAGES

Proposed Extension to Agall Quarry

This book contains imagery for the viewpoints chosen for the LVIA study

December 2024

LVIA I TVIA I Landscape Design I Visibility Analysis I Glint and Glare I Verified Photomontages I CGI I Shadow Flicker Analysis

INDEX

Please Note: The proposed development is not visible in the following photomontages as it is completely screened by existing vegetation and/or landform

LVIA viewpoint locations selected for the Agall Quarry Extension project

Agall Quarry Extension

Imagery depicting the view towards the site (Existing)

Corcoran's Bridge on the Grand Canal at Loughroe VP1

Please Note: The proposed development is not visible from this viewpoint as it is completely screened by existing vegetation and/or terrain

These are 80° panoramic montages captured and presented in accordance with the guidance set by the British Landscape Institute 2011 - Advice Note 01/11.

To view these panoramas on a flat surface one must move from left to right along its length whilst maintaining a perpendicular viewing direction and the specified correct viewing distance of 30cm. To see this entire panoramic scene in reality would necessitate turning one's head through 40°.

Easting (ITM):	625749	Lens:	50mm / Full Frame Sensor	Date:	24/08/2023
Northing (ITM):	725089	Camera:	Canon 1-D Mark II digital SLR	Time:	18:06
Direction of View 152°	E of Grid North	Camera Height:	1.7m Above Ground Level		
Angle of View:	80°

APPENDIX 13

APPENDIX 13-1

APPENDIX 13-1

RECORDED MONUMENTS IN THE STUDY AREA

OF016-026---- Killina Designed landscape feature

This is the site of a natural ridge with a few trees planted on top. There is no evidence of any man made features on this ridge and there is no local tradition of any archaeological site in this area. Possibly a tree-ring or a natural hillock that was landscaped in the 18th-19th century.

OF016-027---- Killina Ritual site - holy well

Located on a slight rise of natural rock outcrop in an area of undulating countryside with good views. Disused dried up holy well (1.55m x 0.65m) known locally as St Anthony's Well with stone built cover made up of a large overlapping slabs similar to a corbelled roof (H 1.05m) with entrance (Wth 0.6m) facing S towards the mass-rock. Mass rock (OF016-027001-) located beside the well which has several initials, an IHS and a date of 1706 carved on its surface (Davies 1942). Bullaun stone (OF016-027002-) located approx. 5m to the S of the holy well, according to local information this bullaun stone came from Rahan monastery (OF016-015001-) (Pers. Comm. Darryl Hooper).

OF016-027001- Killina Mass-rock

Located on a slight rise of natural rock outcrop in an area of undulating countryside with good views. Disused dried up holy well known locally as St Anthony's Well (OF16-027----) located 1.5m to the N and bullaun stone (OF016-027002-) located 3.5m to the S. Mass rock (dims. 2.35m x 1.3m x 0.7m) located beside the holy well which has several initials, an IHS and a date of 1706 carved on its surface (ITA Survey 1942). Bullaun stone located in S corner of walled enclosure.

OF016-034002- Roscore Demesne Burial

Not visible at ground level. Described in 1942 as 'On a slight slope a little above a hollow. In digging a drain in it there were found beds of soft clay and human bones, with head to S.W. No tradition survived of a graveyard at this place' (ITA Survey 1842).

OF016-034001- Roscore Demesne House - fortified house

Not visible at ground level. S gable and part of W wall with projecting tower on SW angle with ground floor musket loops on S and W faces. Gable wall had small rectangular windows with wooden frames at ground and first floor level (ITA Survey 1942) Possible 17th-century fortified house.

Described in the ITA Survey as 'There survives the S. gable and part of the W wall of the castle, with a projecting tower on the S.W. of the S wall the gable survives to c. 35 ft high. The S wall is 2ft 7 ins thick, and the length from the S.E. corner to end of tower 14 ft 9 in ext. The tower projecting 3 feet

ft 6 in from S and W walls, length of its S wall 13 ft 6 in. There are ground floor loopholes in it the S and W walls; these slits are 2 inches wide and about 1 foot 5 inches high. The gable wall is built of rough stones well plastered inside and roughcast outside. There are small rect. Windows with wooden frames, the marks of the wood being visible on the roughcast; the lintels are wood outside and brick inside. There are two such windows in the S wall (excl. tower) on ground and first floors. The west wall survives to a height of about 5'. The E and N walls have been removed, save for a corner of the modern house, which is part of the E wall probably near the N.E. corner. There may however have been a tower beyond it. The length of the castle was thus over 33' . To the east of the castle are mortared field walls and perhaps traces of a baun (OF016-034003-). The present house is over 50 years old. The castle is apparently the house marked in the 1835 OS 6-inch map. as 'Roscore House in Ruins'. It seems to be XVII-century' (ITA Survey 1942).

OF016-034003- Roscore Bawn

Described in the ITA Survey as 'There survives the S. gable and part of the W wall of the castle (OF016-034001-), with a projecting tower on the S.W. of the S wall the gable survives to c. 35 feet high. The S wall is 2 feet 7 inches thick, and the length from the S.E. corner to end of tower 14 feet 9 inches ext. The tower projecting 3 feet 6 inches from S and W walls, length of its S wall 13 feet 6 inches. There are ground floor loopholes in it the S and W walls; these slits are 2 inches wide and about 1 foot 5 inches high. The gable wall is built of rough stones well plastered inside and roughcast outside. There are small rect. Windows with wooden frames, the marks of the wood being visible on the roughcast; the lintels are wood outside and brick inside. There are two such windows in the S wall (excl. tower) on ground and first floors. The west wall survives to a height of about 5'. The E and N walls have been removed, save for a corner of the modern house, which is part of the E wall probably near the N.E. corner. There may however have been a tower beyond it. The length of the castle was thus over 33' . To the east of the castle are mortared field walls and perhaps traces of a baun. The present house is over 50 years old. The castle is apparently the house marked in the 1835 OS 6-inch map as 'Roscore House in Ruins'. It seems to be XVII-century' (Davies 1942). Not visible at ground level.

OF016-037---- Glaskill Designed landscape - tree-ring

Unlocated tree-ring described in 1942 (ITA Survey 1942) as, 'a very slight mound at SW end of ridge, steep slope S & W, probably good view, but now situated in very thick wood. Apparently in a prominent position. Two low banks of loosely piled stones 9' [2.7m] apart now bound and enclose the circular area, which cannot be measured but is c. 30yds [27m] across. This place might be a small fort, but may well be a folly, though there are no traces e.g. of a summerhouse on it' (ITA Survey 1942, SMR File). Depicted as a circular landscape feature located in the centre of Glaskill Wood which is accessed via a network of pathways indicated on all editions of the OS 6-inch maps. Probably built as an ornamental feature in the 19th century as part of the landscaping of Glaskill Wood. Not indicated as an antiquity on any edition of the OS 6-inch maps. The cartographic evidence would suggest that this is not an archaeological monument but rather a tree-ring of 19th century date.

APPENDIX 13-2

APPENDIX 13-2

SITES IN THE SITES AND MONUMENTS RECORD IN THE STUDY AREA

OF024-074---- Glasshouse Glass works

Situated in the corner of a field of pasture beside the townland boundary between Glasshouse and Mough or Greatwood in undulating countryside are the low grass covered wall footings of a 17th century glass working site. The remains of the furnace form a low rocky mound (H 0.4m; dims. 16.8m E-W x 16.6m N-S) in the corner of the field. Several glass covered stones possibly the remains of a glass furnace protrude above the surface of the ground. Local landowner Mr. Deigan informed me that over the years of ploughing in this field numerous glass covered stones had been removed from the field. This furnace was located in the middle of a forest that in 17th century was known as 'The Great Wood of Fircall'. Probable 17th century Huguenot glass furnace. The glassworks are mentioned in the Civil Survey of 1654-56 as located 'in the barony of Ballyboy through the great wood of Fercall to the Glasshouse of Boneturrin and from the Glasshouse of Bonneturrin in an antient highway through the said greate wood of Fercall'

There are warnings associated with one or more model runs - see the 'Data Errors and Warnings' tables for each Analysis or Demand Set.

Values shown are the highest values encountered over all time segments. Delay is the maximum value of average delay per arriving vehicle.

Analysis Set Details

ID	Include in report	Network flow scaling factor (%)	Network capacity scaling factor (%)
A1	✓	100.000	100.000

2023, AM

Data Errors and Warnings

Severity	Area	Item	Description
Warning	Major arm width	Arm C - Major arm geometry	For two-way major roads, please interpret results with caution if the total major carriageway width is less than 6m.

Junction Network

Junctions

Junction	Name	Junction type	Major road direction	Use circulating lanes	Junction Delay (s)	Junction LOS
1	untitled	T-Junction	Two-way		0.00	A

Junction Network Options

Driving side	Lighting
Left	Normal/unknown

Arms

Arms

Arm	Name	Description	Arm type
A	L20113 (east)		Major
B	Quarry Access		Minor
C	L20113 (west)		Major

Major Arm Geometry

Arm	Width of carriageway (m)	Has kerbed central reserve	Has right turn bay	Visibility for right turn (m)	Blocks?	Blocking queue (PCU)
C	5.00			50.0	✓	0.00

Geometries for Arm C are measured opposite Arm B. Geometries for Arm A (if relevant) are measured opposite Arm D.

Minor Arm Geometry

Arm	Minor arm type	Lane width (m)	Visibility to left (m)	Visibility to right (m)
B	One lane	2.20	12	50

Slope / Intercept / Capacity

Priority Intersection Slopes and Intercepts

Junction	Stream	Intercept (Veh/hr)	Slope for A-B	Slope for A-C	Slope for C-A	Slope for C-B
1	B-A	465	0.088	0.224	0.141	0.319
1	B-C	603	0.096	0.244	-	-
1	C-B	603	0.244	0.244	-	-

The slopes and intercepts shown above do NOT include any corrections or adjustments.

Streams may be combined, in which case capacity will be adjusted.

Values are shown for the first time segment only; they may differ for subsequent time segments.

Traffic Demand

Demand Set Details

ID	Scenario name	Time Period name	Traffic profile type	Start time (HH:mm)	Finish time (HH:mm)	Time segment length (min)	Run automatically
D1	2023	AM	ONE HOUR	07:45	09:15	15	✓

Default vehicle mix	Vehicle mix varies over turn	Vehicle mix varies over entry	Vehicle mix source	PCU Factor for a HV (PCU)
✓	✓	✓	HV Percentages	2.00

Demand overview (Traffic)

Arm	Linked arm	Profile type	Use O-D data	Average Demand (Veh/hr)	Scaling Factor (%)
A		ONE HOUR	✓	6	100.000
B		ONE HOUR	✓	3	100.000
C		ONE HOUR	✓	9	100.000

There are warnings associated with one or more model runs - see the 'Data Errors and Warnings' tables for each Analysis or Demand Set.

Values shown are the highest values encountered over all time segments. Delay is the maximum value of average delay per arriving vehicle.

2023, AM

Data Errors and Warnings

Severity	Area	Item	Description
Warning	Major arm width	Arm C - Major arm geometry	For two-way major roads, please interpret results with caution if the total major carriageway width is less than 6m.

Junction Network

Junctions

Junction	Name	Junction type	Major road direction	Use circulating lanes	Junction Delay (s)	Junction LOS
1	untitled	T-Junction	Two-way		0.03	A

Junction Network Options

Driving side	Lighting
Left	Normal/unknown

Arms

Arms

Arm	Name	Description	Arm type
A	L2011 (south)		Major
B	L20113		Minor
C	L2011 (north)		Major

Major Arm Geometry

Arm	Width of carriageway (m)	Has kerbed central reserve	Has right turn bay	Visibility for right turn (m)	Blocks?	Blocking queue (PCU)
C	5.40			250.0	✓	0.00

Geometries for Arm C are measured opposite Arm B. Geometries for Arm A (if relevant) are measured opposite Arm D.

Minor Arm Geometry

Arm	Minor arm type	Lane width (m)	Visibility to left (m)	Visibility to right (m)
B	One lane	2.30	38	15

Slope / Intercept / Capacity

Priority Intersection Slopes and Intercepts

Junction	Stream	Intercept (Veh/hr)	Slope for A-B	Slope for A-C	Slope for C-A	Slope for C-B
1	B-A	462	0.086	0.218	0.137	0.312
1	B-C	589	0.093	0.234	-	-
1	C-B	719	0.286	0.286	-	-

The slopes and intercepts shown above do NOT include any corrections or adjustments.

Streams may be combined, in which case capacity will be adjusted.

Values are shown for the first time segment only; they may differ for subsequent time segments.

Traffic Demand

2041 with dev, PM

Data Errors and Warnings

Severity	Area	Item	Description
Warning	Major arm width	Arm C - Major arm geometry	For two-way major roads, please interpret results with caution if the total major carriageway width is less than 6m.

Junction Network

Junctions

Junction	Name	Junction type	Major road direction	Use circulating lanes	Junction Delay (s)	Junction LOS
1	untitled	T-Junction	Two-way		0.40	A

Junction Network Options

Driving side	Lighting
Left	Normal/unknown

Traffic Demand

Demand Set Details

ID	Scenario name	Time Period name	Traffic profile type	Start time (HH:mm)	Finish time (HH:mm)	Time segment length (min)	Run automatically
D14	2041 with dev	PM	ONE HOUR	16:45	18:15	15	✓

Default vehicle mix	Vehicle mix varies over turn	Vehicle mix varies over entry	Vehicle mix source	PCU Factor for a HV (PCU)
✓	✓	✓	HV Percentages	2.00

Demand overview (Traffic)

Arm	Linked arm	Profile type	Use O-D data	Average Demand (Veh/hr)	Scaling Factor (%)
A		ONE HOUR	✓	70	100.000
B		ONE HOUR	✓	5	100.000
C		ONE HOUR	✓	56	100.000
