

# 4.A.4 ZTV indicating the potential cumulative visibility of the proposed Maighne windfarm in combination with all other existing & permitted windfarms within the study area

- Proposed Maighne Turbines
  - ★
- Wind Farm Visibility
  - % of study area
  - 10.8% Areas where only turbines from existing and/or permitted windfarms are visible
  - 46.8% Areas where proposed Maighne turbines are simultaneously visible with turbines from other existing and/or permitted schemes
  - 19.7% Areas where the view includes Maighne turbines only

- Photomontage Locations
  -
- Distance Bands from Turbines
  - 10km Extent
  - 20km Extent
  - 30km Extent

This ZTV map has been calculated such that a turbine registers as being theoretically visible to observers in the surrounding landscape once there is an unobstructed line of sight to its nacelle.

Observer Height assumed: 2m to eye-level height  
Nacelle Heights: Variable

Note: This ZTV map is calculated for landform screening only and does not take account of the significant screening effects of vegetation (hedgerows, trees) and buildings inherent across this study area.
