BH 2

Proposed Borehole to depth of 12m

BH 4

Proposed Rotary Core Borehole to prove rock

SAC Boundary

Further Investigation

In order to test the subgrade for the platform construction as BR470, plate load tests will be carried out in accordance with BS1377 part 9, with the aid of pocket penetrometer or a small hand shear vane if required. These tests will be carried out in shallow trial pits at the anticipated formation depth prior to platform construction.
