Part 2 - Winter Bird Survey Results - 2022 - 2024

J.1 Part 2 - Winter Bird Survey Results 2022 - 2024

Appendix J – Part 2: Summary of Wintering Bird Survey Data

Appendix J – Part 2 presents the results of the wintering bird surveys undertaken between December 2022 and March 2023, and September 2023 and March 2024. Those bird species listed as SCIs for Lough Corrib SPA, Inner Galway Bay SPA, Connemara Bog Complex SPA, Lough Rea SPA and Rahasane Turlough SPA for their wintering populations are highlighted in Green in **Table 1** below. While Cregganna Marsh SPA lies within the ZOI of the Project, the sole SCI species for Cregganna Marsh SPA, Greenland White-fronted Goose *Anser albifrons flavirostris*, was not recorded from any of the winter bird sites surveyed for the Project and thus is not included in **Table 1** below.

The wintering bird survey methodology is described in Section 4.4.1.7 of the NIS and the survey areas shown on Figure 10.
