An Coimisiún Pleanála Case Number: ABP-319864-24

Re. RESPONSE TO REQUEST FOR FURTHER INFORMATION AS PROVIDED FOR UNDER SECTION 292(1)(a) OF THE PLANNING AND DEVELOPMENT ACT 2000 (AS AMENDED) TO AN COIMISIÚN PLEANÁLA WITH REGARDS TO PROPOSED OFFSHORE WIND ENERGY DEVELOPMENT – ARKLOW BANK WIND PARK 2

A Chara,

The Applicant, Sure Partners Limited (SPL), has prepared this response to the Request for Further Information (RFI) that was issued by An Bord Pleanála, now known as An Coimisiún Pleanála (ACP) on 10th April 2025 in respect of the section 291 planning application under ACP Case Ref. ABP-319864-24.

As per the RFI correspondence from ACP on 10th April 2025, the final date for receipt of the RFI response and the response to the submissions / observations raised was to be within a period of nine months from the date of the RFI i.e. by 19th January 2026. Upon request of the Applicant, and as confirmed by ACP (correspondence dated 23rd April 2025), this was extended to 19th April 2026.

The Proposed Development is an offshore wind farm, located off the coast of Co. Wicklow and Co. Wexford, on the east coast of Ireland. A Maritime Area Consent (MAC) (Ref 2022-MAC-002) was granted in December 2022 for the construction and operation of an offshore windfarm and associated infrastructure (including decommissioning and other works) on and around the Arklow Bank in the Irish Sea. The site of the Proposed Development comprises an Array Area (the area within which the Wind Turbine Generators (WTGs), the Offshore Substation Platforms (OSPs), and associated cables (export, inter-array and interconnector cabling) and foundations will be installed and a Cable Corridor and Working Area (the area within which export, inter-array and interconnector cabling will be installed). The overall Proposed

Development site area is 139.4 km² and all of the Proposed Development will be seaward of the High Water Mark (HWM). The Array Area is located approximately 6 km to 15 km off the coast and covers an area of approximately 63.4 km². The Cable Corridor and Working Area extends from the Array Area to the HWM at Johnstown North, north of Arklow Town, Co. Wicklow where the offshore export cables make landfall (the Landfall). The area of the Cable Corridor and Working Area is 76.0 km².

Please see below a schedule of documentation, prepared by the Applicant which comprises the response to the RFI and the response to the issues raised in the submissions and observations received by ACP from members of the public and prescribed bodies and coastal planning authorities. It is submitted that all matters raised in the RFI issued by ACP on 10th April 2025 have been addressed, and all required further information has been provided as part of this response.

In providing this response to the matters raised in the RFI and the specific request to clearly annotate proposed amendments to the EIAR, NIS and other documentation, the Applicant is providing both an annotated copy of documentation which clearly identifies where changes have been made to the original submitted application. A clean copy of the documentation is also provided (i.e. without tracked changes). The annotated copy shows in **red** where text and content have been deleted (strike-through) from the original document and in **blue** where text and content has been added to the original document. The clean copy is simply a version of the document which accepts these changes i.e. red content removed and blue content included.

This approach and submission of both formats of documentation will therefore allow ACP and all stakeholders to clearly identify where changes have been made since the submission of the original application whilst also providing a clear document should any observer wish to view a more simple format of document without the annotations incorporated.

As requested by ACP, 2 no. hard copies and 1 no. electronic copy (USB stick) of both the annotated and clean version containing the RFI response and our response to submissions / observations as outlined in the Schedule below and are enclosed herewith.

If you should have any queries, please do not hesitate to contact the undersigned. We trust all is in order and look forward to a favourable decision in due course.

Yours Sincerely,

Kaj Christiansen

Development Manager
Arklow Bank Wind Park 2

The following is a schedule of all documentation (2 no. hard copies and 1 no. electronic copy) in support of this response to RFI issued by ACP on 10th April 2025 in respect of the planning application under case reference ABP-319864-24 for the proposed ABWP2.

Scope	Document Name	Document Number or Reference	Document Revision
Response Documentation	Cover Letter	n/a	New for RFI response
	Applicant Response to the Request for Further Information	n/a	New for RFI response
	Schedule of documentation submitted in response to RFI	Annex 1 to the Applicant's Response for Further Information	New for RFI response
	Mapping of submitted spatial files including: <ul style="list-style-type: none"> • Locations of infrastructure for coastal modelling (in response to 1f) • MSFD Mapping (in response to 3d) • Coastal modelling outputs (7f vi) 	Annex 2 to the Applicant's Response for Further Information	New for RFI response
	Post-application correspondence including: <ul style="list-style-type: none"> • Irish Coast Guard Letter • Department of Defence Letter • AirNav Ireland Letter 	Annex 3 to the Applicant's Response for Further Information	New for RFI response
