Dear Sir/Madam,

I sent my objections for this wind park to you in August 2024 and I thought that would be enough. Now I find that I have to make more reasons for my objections because SSE provided more information. Most of it is completely over my head, as a 16 year old but after asking loads of adults that are living near the Brittas Bay beach for their opinions, I learn that very little has changed from the original EIA from SSE

I have spent all my holidays in Brittas bay since birth and I can see all the erosion of the dunes at the south end.

If this happens because of the new 56 turbines, then dunes and coastline will be destroyed from Wicklow Head to Kilgorman beach in Co Wexford.

This won't do much good for me or my future kids if there's no beaches to visit, maybe 10/20 years after the wknd farm is built.

As I said in my last email, do not give SSE permission to build on the Arklow Bank, there has to be somewhere else that is more suitable and safer for the environment and marine animals.

Renewable energy is needed but not at the chance of destroying the environment.

I would like to know who I get in touch with if the wind park goes ahead and then goes wrong?

Please Do Not give the permission.

Thank you

Adam Myers
