Dear Sir/madam

I would like to emphasise and reinforce my observation submitted in 2024 that I still stand on my beliefs and I am in opposition to the construction of 53 Eiffel Tower sized windmills on the Arklow Sandbank.

I have previously given my reasons but I also would like to add that the Eirgrid infrastructure is insufficient for our current electricity supply as reported on the 9 o'clock RTE 1 news tonight 28th July 2026 so how could the introduction of 53 more windmills be successful?

The Arklow Sandbank should be left to nature. All windmills should be located further out to sea on floating platforms where there would be no risk to the coastline or the sandbank. Please consider my observation positively.

Regards

Kate O'Mahoney
