Dear Sir/Madam,

I sent my objections about this wind park development in August 2024 and I send them again now because there is no real evidence that the further additional information will change anything for the better.

This proposed site is the wrong one and SSE should be forced to investigate a different site further out to sea and away from the Arklow Bank.

At 18 years of age, I will expect to continue to enjoy my visits to the Brittas Bay beach into the future and to, some day, bring my kids and hopefully grandkids also. But this won't happen if there's no beach as will probably happen if this development goes ahead. I've seen, with horror, the damage done to the beach and dunes already and if the 7 existing turbines have done this, then 56 more will destroy the whole coastline.

Tell SSE to go out further with their wind park development and leave the Arklow bank alone so it can protect the marine and coastal environment.

There are other more appropriate sites and don't let them tell you there aren't.

Again, please do not give permission for this development otherwise who is going to be responsible when the damage is done and unrepairable?

Thank you

Leah Martin
