Dear Sir/Madam

I would like to make an observation on the Arklow Bank Windpark Phase 2.

I am very concerned that should this Wind farm be built on the Arklow Sandbank that it will destroy the natural habitat of many birds and also the effect it will have on Brittas Bay beach. I swim all year round and enjoy the summers on the beach with my family. If these 50+ enormous windmills are built on the sandbank it will undoubtedly have a detrimental on the coastline. I believe there is no justification for this risk to seabed disturbance and water quality.

I am not against wind energy but I am against the positioning of Eiffel Tower sized windmills on the sandbank. Put them out further onto floating platforms.

Regards

Paula Sheehy
