Dear Sir/Madam,

There is nothing convincing in the additional information supplied by SSE to make me change my mind and I confirm that I am still opposing the construction of this development.

At 20 years of age, I have seen the constant destruction of the sand dunes at Brittas Bay south where I have visited since birth.

I dread the idea that the proposed 56 turbines for the entire length of the bank will destroy the coastal environment from Wicklow Head to north Co Wexford near Courtown.

As a student, I would like to know who will be held accountable for the probable environmental destruction?

There must be alternative available and suitable sites for this wind park

The Mac Lir site proposed by Source Galileo is evidence that it's possible to go further out from shore, build in deeper waters for more constant wind supply and preserve the Arklow Bsnk in it's natural state.

My generation and beyond can't risk that we will be left with massive tax implications when this goes wrong. So please refuse planning permission and insist that SSE provide much needed renewable wind energy from a safer and environmentally more friendly location.

Again, please do Not give planning permission for this development.

Thank you

Sam Martin
