1 Summary of Cultural Heritage Assessment

Table 14-4-1: Summary of Cultural Heritage Assessment

CH No.	Quality of effect:	Description of effect	Proposed mitigation	Extent and Context of Effect	Probability and Duration of Effect:
CH001	Negative Effect	Imperceptible Effect	It is possible to incorporate a heritage opportunity into the Proposed Development design, which will enhance the surrounding monuments. This can be done by incorporating information boards on publicly accessible areas within the Proposed Development site. This can contain detailed information on archaeological, architectural and cultural heritage background of the Clydagh Valley and the Paps Archaeological Landscape	Indirect effect to the setting of the monument outside the Paps Landscape based on the result of the ZTV analysis.	Long-term, reversible Effects
CH002	Negative Effect	Moderate effect	It is possible to incorporate a heritage opportunity into the Proposed Development design, which will enhance the surrounding monuments. This can be done by incorporating information boards on publicly accessible areas within the Proposed Development site. This can contain detailed information on archaeological, architectural and cultural heritage background of the Clydagh Valley and the Paps	Indirect effect to the setting of the monument within the Paps Landscape based on the result of the ZTV analysis.	Long-term, reversible Effects

CH No.	Quality of effect:	Description of effect	Proposed mitigation	Extent and Context of Effect	Probability and Duration of Effect:
			Archaeological Landscape		
CH003	Negative Effect	Moderate effect	It is not possible to mitigate the potential indirect effect of the Proposed Development on the setting of the surrounding known monuments and the Paps Archaeological Landscape. However, it is possible to incorporate a heritage opportunity into the Proposed Development design, which will enhance the surrounding monuments. This can be done by incorporating information boards on publicly accessible area within the Proposed Development site. This can contain detailed information on archaeological, architectural and cultural heritage background of the Clydagh Valley and the Paps Archaeological Landscape	Indirect effect to the setting of the monument within the Paps Landscape based on the result of the ZTV analysis.	Long-term, reversible Effects
CH004	Negative Effect	Moderate effect	It is not possible to mitigate the potential indirect effect of the Proposed Development on the setting of the surrounding known monuments and the Paps Archaeological Landscape. However, it is possible to incorporate a heritage opportunity into the Proposed Development design, which will enhance the surrounding	Indirect effect to the setting of the monument within the Paps Landscape based on the result of the ZTV analysis.	Long-term, reversible Effects

CH No.	Quality of effect:	Description of effect	Proposed mitigation	Extent and Context of Effect	Probability and Duration of Effect:
			monuments. This can be done by incorporating information boards on publicly accessible area within the Proposed Development site. This can contain detailed information on archaeological, architectural and cultural heritage background of the Clydagh Valley and the Paps Archaeological Landscape		
CH005	Negative Effect	Moderate effect	It is not possible to mitigate the potential indirect effect of the Proposed Development on the setting of the surrounding known monuments and the Paps Archaeological Landscape. However, it is possible to incorporate a heritage opportunity into the Proposed Development design, which will enhance the surrounding monuments. This can be done by incorporating information boards on publicly accessible area within the Proposed Development site. This can contain detailed information on archaeological, architectural and cultural heritage background of the Clydagh Valley and the Paps Archaeological Landscape	Indirect effect to the setting of the monument within the Paps Landscape based on the result of the ZTV analysis.	Long-term, reversible Effects

CH No.	Quality of effect:	Description of effect	Proposed mitigation	Extent and Context of Effect	Probability and Duration of Effect:
CH006	Negative Effect	Moderate effect	It is not possible to mitigate the potential indirect effect of the Proposed Development on the setting of the surrounding known monuments and the Paps Archaeological Landscape. However, it is possible to incorporate a heritage opportunity into the Proposed Development design, which will enhance the surrounding monuments. This can be done by incorporating information boards on publicly accessible area within the Proposed Development site. This can contain detailed information on archaeological, architectural and cultural heritage background of the Clydagh Valley and the Paps Archaeological Landscape	Indirect effect to the setting of the monument within the Paps Landscape based on the result of the ZTV analysis.	Long-term, reversible Effects
CH007	Negative Effect	Moderate effect	It is not possible to mitigate the potential indirect effect of the Proposed Development on the setting of the surrounding known monuments and the Paps Archaeological Landscape. However, it is possible to incorporate a heritage opportunity into the Proposed Development design, which will enhance the surrounding monuments. This can be done by	Indirect effect to the setting of the monument within the Paps Landscape based on the result of the ZTV analysis.	Long-term, reversible Effects

CH No.	Quality of effect:	Description of effect	Proposed mitigation	Extent and Context of Effect	Probability and Duration of Effect:
			incorporating information boards on publicly accessible area within the Proposed Development site. This can contain detailed information on archaeological, architectural and cultural heritage background of the Clydagh Valley and the Paps Archaeological Landscape		
CH008	Negative Effect	Moderate effect	It is not possible to mitigate the potential indirect effect of the Proposed Development on the setting of the surrounding known monuments and the Paps Archaeological Landscape. However, it is possible to incorporate a heritage opportunity into the Proposed Development design, which will enhance the surrounding monuments. This can be done by incorporating information boards on publicly accessible area within the Proposed Development site. This can contain detailed information on archaeological, architectural and cultural heritage background of the Clydagh Valley and the Paps Archaeological Landscape	Indirect effect to the setting of the monument within the Paps Landscape based on the result of the ZTV analysis.	Long-term, reversible Effects
CH009	Negative Effect	Moderate effect	It is not possible to mitigate the potential indirect effect of the	Indirect effect to the setting of the monument within the Paps	Long-term, reversible Effects

CH No.	Quality of effect:	Description of effect	Proposed mitigation	Extent and Context of Effect	Probability and Duration of Effect:
			Proposed Development on the setting of the surrounding known monuments and the Paps Archaeological Landscape. However, it is possible to incorporate a heritage opportunity into the Proposed Development design, which will enhance the surrounding monuments. This can be done by incorporating information boards on publicly accessible area within the Proposed Development site. This can contain detailed information on archaeological, architectural and cultural heritage background of the Clydagh Valley and the Paps Archaeological Landscape	Landscape based on the result of the ZTV analysis.	
CH010	Negative Effect	Moderate effect	It is not possible to mitigate the potential indirect effect of the Proposed Development on the setting of the surrounding known monuments and the Paps Archaeological Landscape. However, it is possible to incorporate a heritage opportunity into the Proposed Development design, which will enhance the surrounding monuments. This can be done by incorporating information boards on publicly accessible area	Indirect effect to the setting of the monument within the Paps Landscape based on the result of the ZTV analysis.	Long-term, reversible Effects

CH No.	Quality of effect:	Description of effect	Proposed mitigation	Extent and Context of Effect	Probability and Duration of Effect:
			within the Proposed Development site. This can contain detailed information on archaeological, architectural and cultural heritage background of the Clydagh Valley and the Paps Archaeological Landscape		
CH011	Negative Effect	Moderate effect	It is not possible to mitigate the potential indirect effect of the Proposed Development on the setting of the surrounding known monuments and the Paps Archaeological Landscape. However, it is possible to incorporate a heritage opportunity into the Proposed Development design, which will enhance the surrounding monuments. This can be done by incorporating information boards on publicly accessible area within the Proposed Development site.
