I would have no objections to receipt of the 'Missing Information' in the form set out in Eirgrid's letter dated 27th February 2015.

I note that the letter also refers to 'Alterations to the Draft Application File'. Subject to such alterations being in relation to further expansion of issues in the documentation and information to be lodged with the pending S.I. application rather than changes to the fundamental scope and nature of development itself and considered by the Board under the pre application consultation 02. VC0054 and scoping opinion 02. VS0002 I would also not object the approach set out by Eirgrid in its letter.

Having regard to the above and as part of the identification of the above 'alterations' Eirgrid may also wish to highlight and clarify in summary form the extent of any further minor changes/amendments made to the proposed development since formal closure of the SI pre app process (should any such minor changes be proposed).
