Good morning Mr O'Reilly,

Apologies for the hold up with this reply.

In response to your query, Eirgrid had pre-consultation discussions with An Bord Pleanála (Strategic Infrastructure Section) and those records and Inspector's report are available on the ABP website. It remains, however, a matter for EirGrid to finalise its documentation and submit an application to An Bord Pleanála. The details of the application are a matter for EirGrid to decide upon.

Regards,

Seamus Grant

Seamus,

I note from the presentation given by Philip Green at the recent Eolas seminar that the North-South interconnector is described as a 768MW line. Can you confirm that this indeed is the case, as all EirGrid historic and latest EirGrid information refers to it as a 1500MW line.

Thanks  
Padraig
