Subject: An Bord Pleanála

Good Afternoon Councillor Keelan,

You asked for an update in relation to the North-South Electricity Interconnector project.

At present Eirgrid is involved in the pre-application procedure under Projects of Common Interest Regulation 347/2013.

Eirgrid submitted a Concept for Public Participation, as required under the Regulation, and the Concept was modified by An Bord Pleanála in its role as competent authority. A copy of the Concept and An Bord Pleanála's letter as competent authority is available on Eirgrid's website. The link is [here](#).

Also as part of the pre-application process Eirgrid has been requested to submit a proposal for the scope of material and level of detail of information to be submitted as part of the application file.

An Bord Pleanála (Competent Authority) currently awaits that material/information.

Regards.
Diarmuid Collins.

North South 400 kV Interconnection Development

North-South 400 kV Interconnection Development (also known as the Meath-Tyrone 400 kV Interconnection Development)

Overview

This project summary is available to download in report format via the following link: [Project Summary Report](#)

What is it?

EirGrid and SONI (System Operator for Northern Ireland) are jointly proposing a new high capacity electricity interconnector between the electricity networks of Ireland and Northern Ireland. Currently there is only a single such interconnector between the two networks and a second interconnector is now proposed as shown on the map below.

The planning of that portion of the proposed interconnector within Northern Ireland was originally undertaken by NIE (Northern Ireland Electricity). However on 30th April 2014 the responsibility for the development in Northern Ireland was transferred to SONI. For details on the NI portion of the development please see [SONI project website](#).

Why is it being proposed?

The new interconnector will increase the capacity, and the reliability, of interconnection between the two networks. This will allow the two independent networks to operate together as if they were one system for the mutual benefit of residents and businesses in both jurisdictions.

The increase in interconnection capacity will effectively eliminate current restrictions in cross border support in the event of a shortage of electricity in one jurisdiction, thus enhancing the security of electricity supply throughout the island of Ireland.

Operating the two networks as if they were one system will bring cost savings for all electricity consumers as larger electricity systems can be operated more efficiently than smaller ones.

The increase in interconnection capacity will also facilitate further and greater connection of wind generation in both parts of the island which will help achieve Ireland's renewable energy targets.

What has happened recently?

The project has been designated as a Project of Common Interest (PCI) by the European Commission and is now subject to EU Regulation No. 347/2013 (the Regulation). An Bord Pleanála (ABP) has been designated as the competent authority for managing the PCI process in Ireland. The PCI Pre-application Process commenced on 02nd July 2014 and in accordance with the Regulation on 31st July 2014 EirGrid submitted a Concept for Public

Participation (CPP) to ABP. ABP then had three months within which it could either approve the CPP or request modifications.

What is happening now?

On 10th September 2014 the CPP was approved, subject to modification, by ABP. The approved CPP therefore consists of the modification by ABP and the CPP document prepared by EirGrid.

EirGrid will now prepare a draft application file (consisting of a draft application for planning approval and a draft Environmental Impact Statement) and will in due course submit this to ABP for approval. Only after the draft application file is approved by ABP will EirGrid then submit the final application to ABP. Before doing so EirGrid will publish the information leaflet required by ABP as part of the approved CPP.

For further information on the project, you may contact us in the following ways:

Write: c/o EirGrid NS Project Manager, Block 2, Floor, 2, West Pier Business Campus, Dun Laoghaire, Co. Dublin, Ireland
