Co. Clare

26 Oct '24

Dear Sir/Madam

I wish to object in the strongest possible terms to the above referenced windfarm (Knockishanvo).

Co. Clare has already too many wind turbines which should never have been built in the first place.

The term 'windfarm' is inappropriate. I know of no farm that emits noise and other disturbance to neighbours 24 hours a day. I know of no farm that prevents a peaceful walk in the countryside. I know of no farm that causes health effects due to noise and infrasound. I know of no farms that leads significant numbers of birds and wildlife.

If there is one thing I cannot understand about this country - it's the lack of attention/disregard of noise pollution. There are many people who move from urban areas to rural areas as they want peace and quiet. The farming community would not be aware of noise pollution (except of course if they were unlucky enough to have a motorway built beside them).

My suggestion would be to import nuclear energy and to have off shore wind or wave energy
