TRAFFIC REPORT

FURTHER INFORMATION

PI REF 19/200

PATRICK LALOR

INTRODUCTION:

This report has been prepared at the request of Patrick Lalor. He is currently seeking planning permission for an Agricultural development at Grennan, Attanagh, Co Laois. The development as per application comprises:

- 1) Retention Permission and completion as necessary for a Slatted Tank, Animal Housing which incorporates Cubicle area, Calving boxes, Milking Parlour, Dairy, Office, Plant room, Slatted Feeding Area, Collecting area, Steel Uprights at slatted feeding area; and all associated Ancillary works and Services; 2) Permission to cut back steel uprights at slatted feeding area; 3) Permission to construct new crush in collecting yard.

Laois County Council issued a further information (FI) request on the 30th May 2019. Some items of the FI request relate to traffic and access, and the purpose of this report is to address these.

ACCESS:

The development is Agricultural in nature and located in an existing historical farmyard. The farmyard is approx. 300m from the public road. It is accessed via a lane which is in shared ownership with a farming neighbour to the east, and another landowner further east towards the main road. It is a fairly typical rural situation.

In addition to this shared lane, the applicant's son, who is the principle active farmer at this holding uses an internal Cow Lane.

TRAFFIC DATA COLLECTION :

Trafficomics were commissioned to carry out a traffic survey of all vehicle movements on the Access Lane. This survey was carried out from Tuesday 17th September to Tues 24th September inclusive. The results of same are attached in Appendix 1.

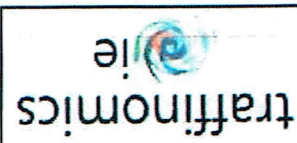

In addition the applicant kept a diary of all movements on the lane over a prolonged period from the 10th June 2019 to the 24th Feb 2020. A copy of this diary is attached in Appendix 2.

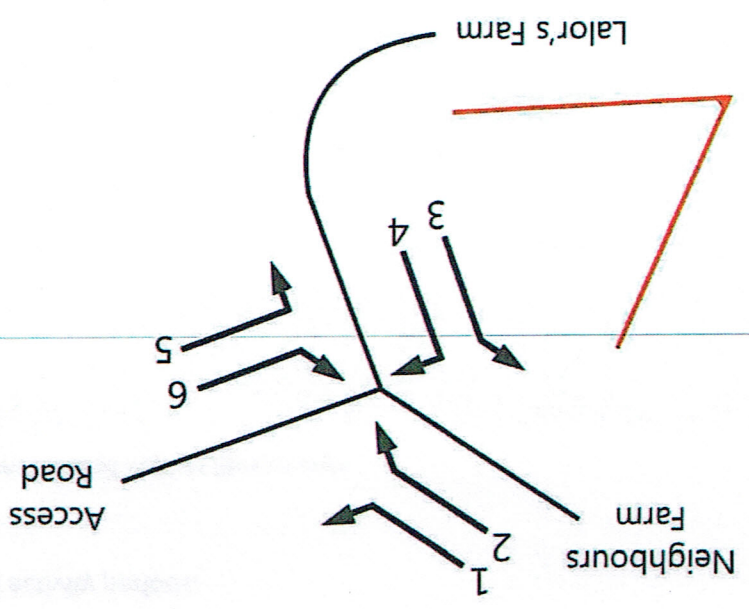

TRAFFIC DATA ANALYSIS

Trafficomics collected details of the following traffic movements:

- Movement 1 Vehicles leaving Neighbour's farm and going east to main road
- Movement 2 Vehicles leaving Neighbour's farm and going west to Applicant farm
- Movement 3 Vehicles leaving Applicant Farm and going to Neighbour's farm
- Movement 4 Vehicles leaving Applicant Farm and east to main road
- Movement 5 Vehicles entering Applicant's Farm from main road via access lane
- Movement 6 Vehicles entering Neighbour's Farm from main road via access lane

See also schematic prepared by Trafficomics on the following page.

Movement Numbering

Site Location

VEHICLE MOVEMENTS APPLICANT:

A summary of the traffic movements, coming and going to the Applicant farm during the period of the Survey can be seen on page 1 of the Trafficomics Survey.

The relevant possible movements are MVT 2 (Vehicles leaving Neighbour's farm going west to Applicant farm), MVT 3 (Vehicles leaving Applicant farm going to Neighbour's farm), MVT 4 (Vehicles leaving Applicant farm going east towards main road), and MVT 5 (Vehicles entering Applicant farm from Main Road). The totals of these are shown below in Table 1.

The total number of vehicle movements attributed to the Applicant Farm over the 8 days is 15. This is less than an average of 2 a day. The diary kept by the Applicant, shows a similar pattern of vehicle movements over the extended period from June 2019 to Feb 2020. This diary covers most of the seasonal activity periods.

In addition to noting the movements, Trafficomics also noted the vehicle types. These are listed below

Car	
LGV	Light Goods Vehicles, up to 3.5 tonnes
OGV	Other Goods Vehicles
OGV1	includes all rigid vehicles over 3.5 tonnes with 2 or 3 axles
OGV2	includes all rigid vehicles with 4 or more axles eg Milk Lorry
AGRI	Agriculture

Vehicle Type	CAR	LGV	OGV1	OGV2	AGRI
MVT 2 (Vehicles leaving Neighbour's farm and going west to Applicant farm)	0	0	0	4	0
MVT 3 (Vehicles leaving Applicant farm and going to Neighbour's farm)	0	0	0	0	0
MVT 4 (Vehicles leaving Applicant farm towards Main Road) and	2	0	0	4	2
MVT 5 (Vehicles entering Applicant farm from Main Road)	1	0	0	0	2
Total	3	0	0	8	4

Table 1 - Applicant Related Vehicle Movements

VEHICLE MOVEMENTS NEIGHBOUR:

A summary of the traffic movements, coming and going to the Neighbour's farm during the period of the Survey can be seen on page 2 of the Trafficomics Survey.

The relevant possible movements are MVT 1 (Vehicles leaving Neighbour's farm and going east to main road), MVT 2 (Vehicles leaving Neighbour's farm and going west to Applicant farm), MVT 3 (Vehicles leaving Applicant Farm going to Neighbour's farm), and MVT 6 (Vehicles entering Neighbour's Farm from main road). The totals of these are shown below in Table 2.

The total number of vehicle movements attributed to the Neighbour over the 8 days is 164. This is an average of 20 a day.

Table 2 - Neighbour Related Vehicle Movements

MVT 1 (Vehicles leaving Neighbour's farm towards main road)	MVT 2 (Vehicles leaving Neighbour's farm and going west to Applicant farm)	MVT 3 (Vehicles leaving Applicant Farm going to Neighbour's farm) and MVT 6 (Vehicles entering Neighbouring farm from Main Road)	Vehicle Type	CAR	LGV	OGV1	OGV2	AGRI
59	13	0	0	0	0	0	4	0
0	0	0	0	0	0	0	0	0
0	0	0	0	0	0	0	0	0
59	13	0	0	0	0	0	4	6
118	26	0	0	0	0	0	8	12
Total								

The average no of traffic movements on the lane, based on the above survey is approx. 22 per day, of which 2 are attributed to the Applicant Farm and 20 to the Neighbouring Farm. The combined total number of movements generated by both holdings is insignificant, and those generated by the applicant farm are negligible.

VEHICLE MOVEMENTS MILK LORRY:

Details of the Milk Lorry movements coming and going to both the Applicant farm and the Neighbour's farm during the period of the Survey can be seen on page 3 of the Trafficomics Survey.

Over the period of the survey, the Milk Lorry made 4 return trips to the location of both farms. The trips were made between 3 and 4am on the mornings of Tues, 17th, Thurs 19th, Sat 21st and Mon 23rd Sept.

The Milk Lorry comes down the Access Lane. The driver opens the gate into Lalor's farmyard, as this provides him with room to reverse into the Neighbour's yard and collect the Neighbour's milk. The lorry then reverses onto the lane and proceeds to the Applicant's farmyard, and collects the Applicant's milk. The Milk Lorry then returns to the main road.

The Applicant has no issue with their gateway/driveway being used by either the Milk Lorry or vehicles bringing supplies to their Neighbour. If this gateway were to be closed off and a 2m wall built across it as suggested in the third party submission, it would present a difficulty for The Milk Lorry and other vehicles of a similar size that need access to the Neighbour/third party objector.

FURTHER INFORMATION:

Issue No.4 Third Party Objection

A third party objection to the proposed development has been lodged with the Planning Authority, submit your comments and proposals in relation to all of the concerns raised.

Concerns noted in relation to traffic and the access lane include

- Traffic Safety
- Consideration of alternative access arrangements

Response: With regard to traffic safety, there is no history of incidents on the access lane. Those using the lane can see the entire length of the lane, and can therefore wait until a vehicle has completed its journey on the lane before proceeding. The volume of traffic on the lane as demonstrated by the surveys is not significant. The applicant farm has an average of 2 movements per day and the neighbour has an average of 20 movements per day. Traffic Safety is not a matter of concern.

Re consideration of alternative access arrangements, this relates to the existence of a Cow Lane, part of which is in the ownership of a third party. The Applicant has a ROW over that part. This Cow Lane while suitable for herding and operations within the farm, is not suitable for the Milk Lorry, vehicles delivering meal and other supplies, and cannot reasonably be made fit for same. In any event the Milk Lorry also collects from the neighbouring farm, so the most efficient route for the Milk Lorry is the existing lane. It is also the most suitable route for other suppliers serving both farms.

FURTHER INFORMATION:

Issue No.6 Access

[a] What are the precise arrangements for the development site given that 2 no. accesses are available, namely the cul-de-sac laneway due north-east and a farm road on the applicant's landholding due west.

Submit relevant details

Will both accesses be used equally or will one be favoured over the other.

Response: The farm road/cow lane on the applicant's landholding is not suitable for vehicular traffic other than on-site farm vehicles such as tractors and the applicant's son's four wheel drive. The Access Lane and Cow Lane serve 2 different purposes, so both will continue to be used for their specific purpose.

[b] Clarify the number and type of daily vehicle movements to the development site. In the data presented, the Planning Authority notes that apart from a Jeep/Car visiting between 10am – 12pm on Thursday, no other movements are recorded from 6am – 12 pm. Explain this given that the site accommodates a dairy and beef enterprise.

Also the Planning Authority notes that the data is for the week beginning 4th February 2019. Submit equivalent data for a week in late Spring or early Summer.

Response: A summary of the number and type of daily vehicle movements to and from the site is presented in Table 1. A copy of the survey conducted by Trafficnomics from which this summary is extrapolated is attached in Appendix 1. In addition a traffic diary kept by the applicant is attached in Appendix 2. The latter data covers an extended period from 10th June 2019 to the 24th Feb 2020, and includes Spring and Summer as requested.

CONCLUSIONS:

The new shed, the purchase of lands nearby and the migration from beef to dairy at this location has improved the overall efficiencies on this holding, resulting in reduced movement of stock, with resultant reduction in vehicle movements, and an improved situation not only for the Applicant but also the Neighbour and the environment.

The average number of traffic movements generated by the Applicant is 2 per day. The number generated by the neighbour is 20 movements per day.

Given the fact that the average number of movements generated by the Applicant is 2 per day, it can be stated with some certainty that there has been no increase in traffic resulting from the development the subject of this application.

Applicant Traffic Levels are of such a minimal scale that they have negligible impact upon the amenity of the neighbouring farm.

No new traffic safety, or traffic noise issues arise as a result of the development. Concerns in relation to traffic and possible associated traffic safety and traffic noise are unfounded.

Signed:

M. COTTER B.E. (Chartered Engineer)

Date:

6/3/00

APPENDIX 1

Traffonomics Survey/Report of all vehicle movements over a week long period from Tuesday 17th September to Tuesday 24th September inclusive on the shared access lane.
