Re: Quotation no. DOM6142

Dear Gerry,

Thank you for your enquiry for development at Oranmore, Co. Galway.

As per your requirements please find quotation and drawings attached.

I would be more than happy to arrange a system demonstration for you here in Tullamore at a time of your convenience in the coming weeks.

Should you require any additional information or assistance, please contact me on the details below.

Best Regards,

Bernard Allen

Usable tank capacity – 1,820 litres

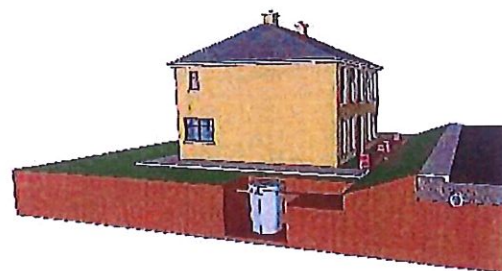

Foul pumping station – to a Septic tank or treatment system

These are often required where site levels or layout don't allow a gravity connection. We have packaged pumping stations available for this purpose. We will size the pump to suit your site.

Foul pumping station – Connection to mains sewer

We have packaged pumping stations available for this purpose. We will size the pump to suit your site. We can offer single pump options or duty-standby (2 pump) options for peace of mind.

Clear water pumping station

These are generally installed after a septic tank/sewage treatment system where site levels or layout don't allow a gravity connection. We will size the pump to suit your disposal system/site.
