Please find pictures in emails to prove that ground has not been altered by more than one meter above the level of adjoining ground.

We have used measure sticks at each side of dividing wall to indicate the amount by which the ground was raised. There is also a picture of a drawing of back yard of 15 village view with dividing wall between dwellings 15 & 18

and dividing timber panels between dwelling 15 & 14. Ground has been raised 0.47 meters on side near 18 village view & 0.90 meters on side near 14 village view.

Pictures are numbered pic.1 to pic.6 and marked where they are on drawing, if you need any further information please contact us.

Kind regards
Richard Fitzgerald
