Re: Our Clients: Donal O Regan Senior and Don O'Regan of Moate Road Ballyragget Co Kilkenny
Quarry lands at Lismaine Jenkinstown Co Kilkenny

Dear Sir,

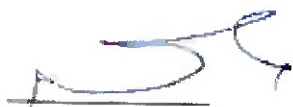

We refer to your letter to our clients dated 17 May 2022, under the above-mentioned reference.

We now attach the following for your attention:

1. Submission
2. Enclosures referred to therein.
3. Video file referred to therein (email only).

Please note this matter is connected to matter reference APB-313514-22 and we are replying to correspondence from you dated 10th May 2022, in similar terms under separate cover.

Yours sincerely,

Martin O'Carroll

Referrals by Kilkenny County Council ("KCC") to An Bord Pleanála ("the Bord") pursuant to Section 5(4) of the Planning and Development Act, 2000 (as amended) - ref: ABP-313122-22 and ref: ABP-313514-22.

1. INTRODUCTION

- 1.1 We refer to the referral dated 16 March 2022 under ref: ABP-313122-22 ("**the Referral**") made by KCC to the Bord pursuant to Section 5(4) of the Planning and Development Act, 2000 (as amended) ("**the Act**"), in respect of the quarry located in the Townland of Lismaine, Jenkinstown, Co Kilkenny ("**the Quarry**").
- 1.2 We also refer to the Submission made by way of response on behalf of our clients dated 19 May 2022 ("**the Reply**").
- 1.3 In the intervening period, the Bord wrote to our clients on 10 May 2022 enclosing a separate referral made under the Act to KCC to the Bord and specifically to a letter from KCC dated 6 May 2022 which in turn refers to a referral made by Mr Aidan Brophy to KCC under section 5 of the Act on 14 March 2022 ("**the Brophy Referral**"). In their letter of 6 May 2022, KCC state that Mr Brophy has raised questions relating to (a) historical quarrying activity at the Quarry and (b) intensified quarrying works at the Quarry and further state that *"Kilkenny County Council under previous correspondence dated 16 March 2022 has posed similar questions to An Bord Pleanála relating to recent works at the quarry (the construction of lagoons) and the operation of the quarry."* KCC further states that having regard to the questions raised by Mr Brophy and the questions posed by KCC to the Bord on 16 March in the Referral and having regard to the provisions of section 5 of the Act (in particular section 5(4)), they believe that it is appropriate that Mr Brophy's "question" is also referred to the Bord.
- 1.4 The Bord wrote to our clients on 10 May 2022 in respect of the Brophy Referral under a new ref: ABP-313514-22 and invited submissions from our clients by way of response within 4 weeks i.e. by 7 June 2022.
- 1.5 The Bord sent a further letter to our clients on 17 May 2022 enclosing a separate submission made by Mr Brophy (and apparently on behalf of others) to the Bord in respect of the Referral ("**the Brophy Submission**") and invited submissions from our clients by way of reply to be received on or before 7 June 2022.

- 1.6 In these circumstances, we will now respond to the Brophy Referral and to the Brophy submission (made in the context of the Referral) below. Consequently, this submission is made in respect of both the Referral and the Brophy Referral and a copy is being submitted separately for each referral. Please note that many of the issues being addressed by way of reply to the Brophy Referral and the Brophy Submission have already been addressed in the Reply sent to the Bord on 19 May 2022 and in these circumstances reference will be made where appropriate to points already made in the Reply and this submission should be read in conjunction with the Reply.

2. THE BROPHY REFERRAL

- 2.1 As has been made clear in the Reply,¹ Mr Brophy has for many years been conducting an orchestrated campaign against the operations of the Quarry and also against development generally in the vicinity of his property. In this regard and by way of further background, we refer to a copy of a letter which was obtained from the files of KCC (during an inspection of those files) from Mr Brophy to the Planning Department of KCC dated 22 February 2017. We respectfully submit that when considering the Brophy Referral, the Bord should have regard to the relevant factual background and conduct of Mr Brophy when considering the motivation and intent of Mr Brophy in framing and raising the questions referred.

1994 Status

- 2.2 Mr Brophy asserts that having regard to the reasoning of *Waterford County Council v John A Wood Ltd* [1998] SC 32, the Quarry land as purchased by our clients in 1994 does not have pre-1963 user rights. This assertion is very surprising as Mr Brophy fails to acknowledge, let alone address, the fact that KCC has accepted that this is not the case. In this regard, we refer to the Referral as made to the Bord by KCC in which KCC's state, inter alia:-

"Quarrying in this area started prior to 1963 and aerial photos from the 1970s shows the quarry as extant. The lands and original ownership of James Tracey in 1964 would have constituted all the lands currently in the ownership and use by both Brenstone (William and Liam Brennan), Lismaine Concrete and Asphalt Roofing (Donal O'Regan and Donie O'Regan). This land was sold off in batches in the 1970s and 1980s ...

¹ See, in particular, Paragraphs 15, 16.4 and 16.5

The map attached shows the area of land currently in the ownership/under the control of Mr Don O'Regan, Mr Donie O'Regan and the Asphalt Roof Company where the business of Asphalt Roofing is being carried on and where the current quarry activity is being carried out ... The Planning Authority has accepted that the quarry has existed at Lismaine, Jenkinstown, County Kilkenny prior to 1964 ... The establishment of a quarry use prior 1964 at Lismaine is not disputed by the Planning Authority" (Emphasis added).

- 2.3 The position of KCC is clear and unequivocal and applies equally to both our clients and the quarrying activity currently being carried out by Brenstone (the Brennan brothers) on their lands adjoining the Quarry.
- 2.4 KCC's position is also not surprising when considering the grounds put forward by Mr Brophy in order to allege that the Quarry does not have the benefit of pre-1963 user. In this regard, Mr Brophy alleges:-

"... the existing pit as of June 1994 was a considerable distance from the lands sold to O'Regan and O'Brien and no pit face had reached the boundary of the land sold."

- 2.5 This assertion is incorrect as the lands sold to Messrs. O'Regan and O'Brien were part of the original quarry site and are not a considerable distance from the original pit. KCC have acknowledged that the parcels of land sold to our clients, and to the Brennan brothers and Lismaine Concrete, all formed part of the original quarry site and are all in close proximity to the original quarry pit. In these circumstances, there is no question of there being a "*wholly new extraction point unrelated to anything which had gone before*" as alleged by Mr. Brophy. What has occurred, on our client's lands (and the adjoining lands) is a proportionate and natural working out across the original quarry site and the continued use of quarrying of the same seam. There has been no change of use. The quarrying activity continues in the same manner which involves the extraction and removal of rock with no washing and/or use of water. There has also been no intensification of use (addressed below). The nature of the activity being carried out remains the same.

Section 261 Registration

- 2.6 It is unclear what point is being made by Mr Brophy in relation to this issue. As far as our Clients are concerned, this issue is straight forward. The section 261 registration was submitted within the prescribed time period (as has been belatedly acknowledged by KCC having regard to the clear case law referenced in our Reply) and that registration was in respect of the pre-1964 use (also acknowledged by KCC) which continues at the Quarry. In this regard, the continuous quarrying operations carried out by our clients on the lands sold to them which formed part of the original quarry site have been comprehensively addressed on Affidavit by our clients in the s160 Proceedings. In this regard and for ease of reference, we refer to the averment made at paragraph 7 by Mr. Don O'Regan in his first affidavit (which has already been provided to the Bord) which is as follows:

"Over the years there have been a number of companies operating from the Quarry"

Asphalt Roofing Limited (1982 - 2003)

During this period (following the acquisition of the first parcel of land on the site by Donal O'Regan and John O'Brien in 1981), the quarry activity was carried out by Asphalt Roofing Limited, a company owned and operated by Donal O'Regan and John O'Brien.

The company was a roofing contractor but was also a producer of Asphalt Material which it used as part of its contracting activities. It operated from a yard on the site originally purchased in 1981. In order to produce the asphalt product, it required sand and limestone chippings and these materials were sourced from the land originally purchased in 1981. As these resources became depleted, my father and John O'Brien purchased the next door site which was part of the original quarry lands and it is this site ("the Quarry") which is the subject of these proceedings.

Asphalt Roofing Limited continued to quarry the lands at the Quarry from 1994 until 2001.

Foulksrath Developments Limited (2003 - 2012)

This was a company which was also owned by Donal O'Regan and John O'Brien. It was a stand-alone company that was set up in order to undertake the quarry

activity on the Quarry. It extracted limestone and sand and gravel which was used by Asphalt Roofing Limited, Kilkenny Asphalt Roofing Limited and was also sold to third party customers including Booth Concrete and Lismaine Concrete (see below).

Kilkenny Asphalt Roofing Limited (2010 - Jan 2020)

Following on from the Recession which started in 2008, Asphalt Roofing Limited ceased trading in 2010.

It was immediately replaced by Kilkenny Asphalt Roofing Limited which was also a company owned and operated by my sister and her husband and which operated from the same premises. It essentially took over the previous activities of Asphalt Roofing Limited.

In order to carry out its operations at the quarry, Kilkenny Asphalt Roofing Limited retained Kilcarrig Quarries Ireland Limited, which came into the Quarry on a "contract crushing' basis. Essentially, Kilcarrig dug out and crushed the stone and dug out gravel and was paid a fee for doing so by on a per ton basis and it also purchased quarry material for onward sale to third party customers.

Kilkenny Asphalt also used crushed rock which was quarried by Kilcarrig Quarries under their contract crushing arrangement for its own manufacturing purposes.

Kilkenny Sand and Gravel Limited (Jan 2020 -)

This company was registered on the 20th day of January 2020. My wife is the sole director and shareholder of this company and I am the Company Secretary and the Quarry Manager.

It commenced operations at the Quarry in January 2020 and continued to engage Kilcarrig Quarries under a contract crushing arrangement on the same basis as with Kilkenny Asphalt Roofing Limited.

Kilkenny Sand and Gravel Limited continues to sell crushed rock and gravel to Booth Concrete, Kilcarrig Quarries and to Lismaine Concrete Limited which has a concrete facility on lands adjacent to the Quarry.

- 2.7 It seems that the point that Mr Brophy in fact wishes at address is alleged intensification which we will now address below.

Development 2005 to 2018

- 2.8 Firstly, Mr Brophy asserts *“The site appears to have been developed sporadically between 2005 and 2018, with little or no activity in 2015 to 2018”*. This assertion is surprising as it is assumed that Mr. Brophy has had sight of the affidavits sworn by our clients in the s160 Proceedings. In these circumstances, it is also surprising that Mr. Brophy had failed to make reference to, let alone address, the very clear averments that have been made by our clients in relation to the activity that has been carried out on a continuous basis during this period.
- 2.9 In this regard, we refer in particular to paragraph 7 of Mr Don O’Regan’s first affidavit (as referred to above) and we also refer to exhibit DORJ1 to that affidavit which clearly evidences that ongoing and continuing activity and a copy of that exhibit is provided with this Further Reply.
- 2.10 Mr Brophy then alleges that by 2015 *“... extraction at the site had clearly breached the water table, see Appendix 3”* and alleges that this amounts to a material change in use.
- 2.11 It is unclear which document is *“Appendix 3”* or how any of the documents provided (comprising of a Land Registry map and what appear to be Google Earth photographs) in any way support an assertion that quarrying is being carried out below the water table. The final sentence of the relevant paragraph of the Brophy Referral (first paragraph under Section 5: Development 2005 to 2018) suggests that this assertion is linked to the discharge of groundwater. However, as explained in the Reply and elsewhere in this submission, the groundwater running off the site does not arise or result from extraction activity. In this regard, we refer to the report of Mr Conor

McGrath of AWN dated 5 October 2021, which makes clear that the Quarry does not abstract water or use water to wash stone on the site and that the water discharging is, in effect, storm water which would run-off the lands regardless of there was a quarry present and operational on site or not.

2.12 For completeness and in any event, it should also be stated that, as a matter of law, it is not case that pre-1964 user and/or Section 261 registration are restricted, conditional or contingent on no extraction occurring below the water table or any that extraction below the water table necessarily equates to an intensification of use such as to give rise to a material change of use.

2.13 Mr Brophy then makes the following statement:-

“The treatment of the site under Section 261A is unclear and ultimately immaterial to the current state of development as the area then developed by 2012 was less than the minimum EIA screening level of 2.5 hectares and there is likely no proof of discharge at that time which might have required full Appropriate Assessment.”

2.14 The point being made is not understood. In particular, it is unclear from where Mr Brophy has taken the ‘*the minimum EIA screening level of 2.5 hectares*’. This does not correspond to the applicable thresholds for quarries / extraction of stone and gravel in either Part 1 (§19 - quarries where the surface area of the site exceeds 25 hectares, not 2.5 hectares) or Part 2 (§2(b) – extraction of stone, gravel, sand or clay where the area of extraction would exceed 5 hectares) of Schedule 5 to the Planning and Development Regulations 2001 as amended.

2.15 Section 261A required KCC in 2012 to consider whether the quarry was one which ought to have been but was not subject to EIA or Appropriate Assessment and it is clear that KCC considered that it was not. In this regard, we have already made detailed submissions in the Reply regarding the screening for Appropriate Assessment carried out by KCC pursuant to section 261A and its determination there was no requirement for an Appropriate Assessment. .

2.16 Mr Brophy then refers to a 2018 Google photograph and states:-

“The 2018 photograph shows less than half of the site under development and a sizeable pond in the north-west corner of the site. Even at this stage, given the tiny incursion into the field in 2005 which would have

formed the legitimate 'snapshot' if section 261 registered then, the relative increase in scale was sufficient to breach the pre-63 user now claimed by the owners."

- 2.17 Again, the point being made is not clear or understood. Firstly, the s.261 registration was validly made as now conceded by KCC. If, in fact, the claim being made by Mr. Brophy is that there has been an intensification of use which would result in the quarrying activity being outside of the pre-1964 use, then that claim is strenuously disputed, and is made in complete disregard to the facts and to the position of KCC. The quarrying activity that has been carried out at the Quarry (which has the benefit of pre-1964 user) since it was acquired has been consistent with the original user of the original quarry land and consistent with the s261 registration. This has involved the excavation of the Quarry face in the main quarry pit on a benching basis (which is entirely normal and expected) and an increase in surface quarrying activity and this occurred over many years across an area of just under 2.5 hectares. The expansion of the Quarry has, at all times, involved a proportionate increase in output and a natural working out of the Quarry. This progression does not contravene the pre-1964 user of the Quarry.
- 2.18 It is also the case that the quarrying activity has, at all times, been "dry" as there is no use of water/washing in the production process. For the avoidance of doubt it has always been necessary for the Quarry to deal with the discharge of storm water/surface water that flows down into the Quarry site (as it has since time immemorial) and the issue of discharge of water into the public drain, either directly or via a lagoon for over 30 years has been fully explained in the Reply.

Development 2018 to Date

- 2.19 Mr Brophy refers to a 2021 photograph which shows the current extent of the excavation at the Quarry. He states that the site has "*more than doubled in size in two to three years*". This is not correct. Whilst there has been an increase in excavation at surface level, this excavation is entirely consistent with ongoing quarrying activity. We again refer to exhibit DORJ1 which exhibits relevant sales invoices for this period.
- 2.20 Mr Brophy alleges that there has been some shift to development of the site by "*commercial quarry operators*" during this period. This is incorrect. We refer again to the averments made by Mr Don O'Regan as to what entities have been quarrying

the site at all relevant times. The Quarry has always been operated commercially, by commercial quarry operators since 2003, and, prior to that point, by Asphalt Roofing which primarily, but not exclusively, used the material produced for their own asphalt adoption requirements.

2.21 Mr Brophy then makes an unfounded allegation that a large area has been extracted to below the water table with the implication that the water being discharged from the Quarry has been caused or produced as a result of the Quarry activity. This allegation is not supported by any evidence and is, again, incorrect. In this regard, we refer to the detailed submissions already made on this issue in the Reply and in particular to the points made in relation to the report of Mr Conor McGrath of Awn dated 5 October 2021 including the fact that Mr McGrath concludes that the site is not using water as part of its quarrying operations and is not discharging polluted matters. He states that the Quarry does not abstract water and does not use water to wash stone on site. He adds that the water discharging from the Quarry is, in effect, storm water and he notes that ground water has been flowing from the Quarry lands for many years and will continue to do so regardless of whether any quarrying activity is being undertaken on the site.

2.22 Mr Brophy then proceeds to make a completely unfounded and scurrilous allegation that the discharge of water from the Quarry is impacting on adjacent dwellings with septic tanks being flooded which he says results in *"a very likely impact through contamination of groundwater."* This allegation fundamentally calls into question the bona-fides of Mr. Brophy and his motivation in making a referral. As the Bord is well aware from the Reply, there is no question of any of the surface or storm water which is discharged from the Quarry site containing any contaminants or pollutions. Storm water from the Quarry is discharged into the local watercourse. It is not discharged into neighbouring lands. Mr. Brophy's lands are located in an area prone to flooding. Waters emanating from the Quarry merge with waters already in the local watercourse and the allegations that our Clients are causing any flooding is not based on any evidence. Further, we are instructed that Mr Brophy was involved in assisting KCC officials with the flawed exercise of taking of samples from point A (which is not the discharge point from the Quarry) and we reiterate that since this flaw has been pointed out to KCC, they are no longer (understandably) seeking to pursue the unfounded allegation previously made in relation to pollutants or contaminants emanating from the Quarry. It is unfortunate that, Mr Brophy is not prepared to proceed in the same manner.

2.23 Mr Brophy then makes assertions at i) to iv) in support of the points that he has made and we will now respond to those assertions as follows:-

i) while the site appears to have been developed without any rights, any pre-63 user rights which the Circuit Court has inferred into the site were intensified in scale and area since 2005 at an alarming rate rendering the site unauthorised;

2.24 It is incorrect for Mr Brophy to allege that there has been an intensification since 2005 and/or that any level of intensification has occurred which could result in the section 261 registration not being valid or appropriate. The total site area is just under 2.5 hectares and the existing use of quarrying activity has been carried out in a proportionate and natural manner over the preceding years.

ii) the development of a rock quarry below the water table is a material change of use also rendering the site intensified and unauthorised;

2.25 There is no evidential or legal basis for this assertion by Mr. Brophy; we again refer to the report and evidence of Mr Conor McGrath of AWN which makes clear that the Quarry does not abstract water or use water to wash stone on site and that the water discharging from the lands does not arise or accumulate as a result of extraction activity. Rather, it is the discharge of storm water/surface water that flows naturally down into the Quarry site and which would flow into and off the lands irrespective of the existence and operation of the Quarry.

iii) the 3.0 hectare level of extractive development now present is above the sub-threshold ELA screening threshold which constitutes an ELA offence;

2.26 The area being extracted is less than 2.5 hectares in total. The relevant area prescribed by Part 2 of Schedule 5 of the Planning and Development Regulations 2001 – 2018 is an extraction area of greater than 5 hectares (and the relevant threshold for Part 1 is a quarry where the surface of the site exceeds 25 hectares).

iv) the development of an unauthorised discharge causing substantial harm to neighbouring septic tanks with the soiled water then running in an uncontrolled manner to a Natura site cannot be screened out for Appropriate Assessment and so constitutes an NIA offence associated with the development.

2.27 It is completely unfounded to allege that there is unauthorised discharge from the Quarry involving soiled water causing substantial harm to neighbours of any adjoining lands. What is being discharged is natural water and all of the tests carried out (from the Quarry floor and the appropriate discharge point) show that this is clearly the case. As set out in detail in the Reply, naturally occurring, seasonal, storm-water/ground-water is neither produced, nor processed, in the Quarry. As above, it is not discharged into neighbouring lands. The flooding alleged by Mr. Brophy is directly caused by rainfall and is due to the fact that his lands are prone to flooding and in this regard we refer again to Mr Brophy's letter to KCC of 22 February 2017 in which he reiterated his concerns about planning permission having been granted for a house in the locality in 2011 due to the flooding in the locality. Our Clients carry out no activity which increases the volume of water emanating from their lands. Further, the question of the necessity for Appropriate Assessment was specifically considered by KCC in the context of the S.261A registration; KCC carried out an Appropriate Assessment screening and determined that the operation of the quarry was not likely to have a significant effect on any Natura site and that an Appropriate Assessment was not therefore required.

3. THE BROPHY SUBMISSION

3.1 By way of preliminary objection, it is not clear to us on what statutory basis the Board is considering Mr. Brophy's submission in the context of the Referral made by KCC. This Referral (ABP-313122-22) was received by the Bord on or about 22 March 2022. While Section 130 of the PDA 2000 allows the Board to entertain unsolicited submissions on a referral, Section 130(1)(b) provides that a submission received after the expiration of the period specified in Section 130(3) "*shall not be considered by the Board*". The relevant time period for referrals as set out in Section 130(3)(d) is a period of four weeks beginning on the day of receipt by the Board of the referral concerned. Mr. Brophy's submission appears to be dated 13 May 2022 and to have been received by the Board on 16 May 2022, well beyond the four-week time limit and therefore cannot be considered by the Board. In so far as this submission, including the balance of this Section, addresses the substantive contents of the Brophy Submission, same is strictly without prejudice to the foregoing submission that the Brophy Submission is out of time and cannot be considered by the Board.

3.2 Brophy alleges that there is excess pumping of water from the Quarry which is having a devastating impact on local lands and he alleges that water is being pumped on to the

neighbouring farm land of Mr. Cahill causing “untold damage”. These allegations are completely unfounded and untrue and we have dealt with this above.

- 3.3 As Mr. Brophy well knows, the only water that is being discharged from the Quarry is natural water which flows from the higher lands and underground and is storm/ground water. In this regard, if there was no Quarry pit in existence, that very same water would flow across our client’s lands as has occurred from time immemorial and flow into the roadside drain and/or directly on to adjacent lands. In these circumstances, our clients are not causing any damage as alleged or at all. The flooding which Mr. Brophy has evidenced in certain photographs is natural flooding which has always occurred in the locality and is not the fault of our clients and this flooding occurs notwithstanding the flood relief works carried out by KCC in 2010 to deal with the confluence of waters emanating from various lands in the locality²

- 3.4 We refer again to the report of Mr. Conor McGrath of AWN Consulting as previously provided. We refer to the following extracts:-

“Groundwater flooding is common in the locality (insert 3.1). Groundwater flooding occurs where a natural underground drainage system is incapable of sufficiently draining itself, resulting in the emergence of groundwater at the surface. Groundwater flooding can occur in this area following prolonged rain fall causing water table rise.

The prevalence of groundwater flooding in the area is fundamentally linked to the bedrock geology. As discussed in Section 3.2, karstification, has created a network of water-bearing fractures and conduits. Surface drainage systems are frequently absent within well-developed karst landscapes. Instead, the groundwater flow system acts as the main drainage mechanism for the region.

There is very little room within the groundwater system to store excess recharge. This combination of low storeativity and shallow depth to groundwater renders this area susceptible to groundwater flooding.

During prolonged rainfall, the groundwater system is unable to drain recharge quickly causing surface flooding in topographic depressions (insert 3.2). AWN understand that water has been flowing from the site for many years...”

² See paragraph 13 of the Replying Affidavit of Don O’Regan dated 18 November 2021

The Quarry does not abstract water and does not use water to wash stone on site. The water discharging from the O'Regan Quarry is effect storm water...It is understood that groundwater has been flowing from the Quarry lands for many years and will continue to do so regardless of whether any Quarry activity is being undertaken on the site or not."

3.5 It is incorrect for Mr. Brophy to allege that the Quarry is "continually pumping" water from the site. He alleges that the single floating pump which is located in the Quarry pit (which he refers to as a large pump in an artificial lake) runs at a minimum of 12 hours a day and he estimates that upwards of 750,000 litres of water are pumped nightly. This is incorrect and (again) has no evidential basis. The pump does not operate all year round. As set out in the report of Mr Conor McGrath of AWN of 5 October 2021³, the pumping frequency is influenced by seasonal factors and ranges from 20 minutes per day in the summer time to 2 times hourly per day in the winter time. That water, then flows from the existing lagoon system by way of gravity down into the road-side drain and this water discharges in a controlled manner and does not cause any flooding. As stated above, if there was no quarry pit and no managed discharge of natural water from the quarry pit, the very same water would flow out across our client's lands and into the roadside drain and/or directly on to adjoining lands. In these circumstances, the current system of discharge of natural water from the quarry in a controlled manner is to the benefit of Mr. Brophy and the other neighbouring owners. It should be noted, that if (which appears to be the case) and notwithstanding the flood relief works carried out by KCC in 2010, the local watercourse is not capable of containing stormwater emanating from those local lands, including our client's lands, and flooding results down-stream, our clients cannot be blamed for causing such flooding.

3.6 Mr. Brophy also alleges that the quarry pit is beneath the water table and that large volumes of water can be seen gushing from the rock face. This is not correct. The water "gushing from the rock face" is in fact water that cascades from higher lands down on to the Quarry site and into the Quarry pit and we refer to a video showing how this water cascades from higher ground at times of heavy rainfall. It is natural storm or ground water that is flowing by way of gravity and is not water that is being extracted as a result of quarry operations as Mr. Brophy seems to suggest and in this regard, we

³ See paragraph 2.2

refer again to the report of Mr McGrath of AWN Consulting dated 5 October 2021. In these circumstances, the quarry activity is having no impact on domestic wells as no abstraction of water is taking place as alleged.

3.7 Similarly, the water flowing from the Quarry (in the circumstances referred to above) is not causing any flooding on land owned by Mr. Brophy or any other neighbours. That flooding is occurring as a result of local natural conditions and particularly having regard to the natural drainage system in place as referred to by AWN Consulting and it is not caused by any actions of our client.

3.8 We note that Mr. Brophy states that he refutes that the any water being discharged from the quarry is surface water. This position is unsustainable and we reiterate the points made above in this regard and we refer again to the report of Mr. McGrath of AWN Consulting included with the Reply.

3.9 Mr. Brophy also alleges that the operation of the quarry is having an impact on the quality of life of residents. He makes unfounded allegations that those activities result in:

- (i) Excessive noise;
- (ii) Dust;
- (iii) Flooding;
- (iv) Vibrations;
- (v) Excessive traffic.

3.10 We respectfully submit that Mr Brophy has throughout his Referral made bald assertions with no evidence whatsoever to ground his points. No particulars in relation to these latter allegations are provided and again, it is unsurprising as they are unfounded. In this regard, we refer again to the averment made by Mr. O'Regan in his Replying Affidavit of 6 May 2021 and in particular the averments made at paragraph 22. Mr. O'Regan has referred to the multiple inspections that have been carried out by State Agencies including the Health & Safety Authority/ESB/Environmental Department of KCC which our clients understand took place following a spate of (unmeritorious) complaints made by Mr. Brophy and unfortunately, these

unmeritorious allegations are continued in his Referral and his unsolicited reply to the KCC Referral.

Conclusion

- 3.11 Our Clients, for several decades, have continued on the pre-1964 user of the Quarry and the expansion of the Quarry has, at all times, involved a proportionate increase in output and a natural working out of the Quarry, consistent with the pre-1964 user. This has been recognised and accepted by KCC.
- 3.12 The activity involving the pumping and/or discharge of water has similarly been exercised for decades and concerns the controlled management of naturally occurring storm-water/groundwater.

Knockroe,
Jeninstown,
Co.kilkenny.
22/02/2017

Anne Maria Walsh,
Planning department,
Kilkenny county council.

Re. Planning and flooding at Knockroe, Lismane, Jeninstown.

I refer to my many previous letters and photographs sent in to Kilkenny county council for the years 2007 up to and including my letter and photographs on 21st January 2015. I have raised numerous serious issues with regards to flooding, planning and illegal quarrying with the planning department and enforcement section of Kilkenny county council at the above addresses. I find it hard to believe that exactly fifteen months after my letter to you on the 11/may/2010, the planning section granted full planning permission for a house, plan ref no. P11/60 with not the slightest mention of flooding either on the road or on the lands that planning was granted for. The local engineer Mr Beubry had no objections to the planning. I find it extraordinary that Mr Beubry who has seen floods on this road every year for the last ten years made no mention of it in his report, even more so considering the site entrance on to the road is less than 50m from where the road floods.

The site characterisation assessment on the same planning submitted to you by Mr Billy Moran made no mention of flooding of the site. The photos I sent into you over the years shows a small lake on parts of this site. The second assessment report four years later was a copy with exactly the same results. I would be grateful if Mr Beubry and Mr Moran could explain their incompetence in this matter.

Susan Galvin, executive planner. 3/08 /2011.
Ross o Shea , acting senior executive planner. 4/08/2011.
Anne Maria Walsh, senior executive officer. 5th/08/2011.
The above three officers granted this planning in full.

Would you not agree that this decision is unbelievable, bizarre and unprecedented.

I recently had a meeting on 6/02/2017 with your officer Mary brophy at your Castlecomer office. I pointed out quite clearly to her the above matter to which she could not give me an explanation for. The reason I was at that meeting was to discuss development charges due to you for planning I received. I informed Mary that it was never my intention not to pay the development charges. I feel that in light of the continued incompetence of both the planning department and the enforcement section of Kilkenny county council over ten years to deal with the illegal landfill, quarrying and poor planning standards, this sum will remain outstanding €2060.00.

The following are just some of the people who have been contacted over the last ten years but all failed to sort out the problems.

Mr Michael delahunty, Kilkenny county council.

Mr P. Hogan TD.

Mr John Mulholland, Kilkenny county council. (he was out on site).

The environment protection.

ESB.

An garda siochanna .

Mr Beuberry, Kilkenny county council. (he was out on site).

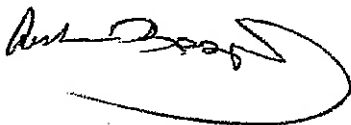

Anne Maria Walsh, Kilkenny, county council.

Mr Brendan o Shea, enforcement section. (he was out on site)

Mr Tony Parker, enforcement section. (he was out on site)

I met with Mr Tony Parker in may 2015 with my neighbour, Mr. Sean Cahill who's land is also being flooded by this illegal development. Mr parker assured us that he would deal with this matter. To this day we have not heard another word from Mr parker. The time has well passed for both myself and Sean Cahill to employ someone else who either through the media or legally will get for us the answers as to what is going on in the planning department and more importantly the enforcement section of Kilkenny county council as to why they have failed to act. I will put you on notice that I will wait three weeks from the above date for your reply.

Yours sincerely.
